Trustable 010-160 New Dumps Free - Win Your Lpi Certificate with Top Score

Our 010-160 exam questions have three versions: the PDF, Software and APP online. Also, there will have no extra restrictions to your learning because different versions have different merits. All in all, you will not be forced to buy all versions of our 010-160 Study Materials. You have the final right to select. Please consider our 010-160 learning quiz carefully and you will get a beautiful future with its help.

Lpi Linux Essentials Certificate Exam - version 1.6 Sample Questions (Q63-Q68):

NEW QUESTION # 63
Which command displays file names only and no additional information?

- A. ls -alh
- B. ls -l
- C. ls -a
- D. ls -nl
- E. ls -lh

Answer: C

Explanation:
The ls command is used to list the files and directories in a given path. By default, the ls command displays only the file names, without any additional information. However, the ls command can also take various options to modify its output. For example, the -l option tells ls to display the long format, which includes the file permissions, owner, group, size, date, and name. The -h option tells ls to display the file sizes in a human-readable format, such as KB, MB, GB, etc. The -a option tells ls to display all files, including the hidden ones that start with a dot (.). The -n option tells ls to display the numeric user ID and group ID instead of the user name and group name. Therefore, the only option that does not add any additional information to the file names is the -a option. The command ls -a will display all the file names in the current directory, including the hidden ones, but nothing else. Reference:

2.1 Lesson 1 - Linux Professional Institute Certification Programs, slide 6.

NEW QUESTION # 64
The file script.sh in the current directory contains the following content:
#!/bin/bash echo $MYVAR
The following commands are used to execute this script:
MYVAR=value
./script.sh
The result is an empty line instead of the content of the variable MYVAR. How should MYVAR be set in order to make script.sh display the content of MYVAR?

- A. env MYVAR=value
- B. !MYVAR=value
- C. MYVAR=value
- D. export MYVAR=value
- E. $MYVAR=value

Answer: D

NEW QUESTION # 65
Which of the following are typical services offered by public cloud providers? (Choose three correct answers.)

- A. Graphics as a Service (GaaS)
- B. Internet as a Service(IaaS)
- C. Platform as a Service(PaaS)
- D. Software as a Service (SaaS)
- E. Infrastructure as a Service(IaaS)

Answer: C,D,E

NEW QUESTION # 66
Which of the following commands creates an archive filework.tarfrom the contents of the directory./ work/?

- A. tar work > work.tar
- B. tar --new work.tar ./work/
- C. tar -cf work.tar ./work/
- D. tar -create work.tgz -content ./work/
- E. tar work.tar < ./work/

Answer: C

Explanation:
Explanation
The tar command in Linux is used to create, extract, list, and manipulate archive files1. The -c option tells the command to create a new archive file. The -f option specifies the name of the archive file. The last argument is the name of the directory or file to be archived. Therefore, the command tar -cf work.tar ./work/ will create an archive file named work.tar from the contents of the directory ./work/. The other options are either invalid or do not create the desired archive file. Option A uses an unrecognized option --new. Option C uses an incorrect option --content and an incorrect extension .tgz for a plain tar archive. Option D and E use an incorrect syntax for redirecting the input or output of the tar command.
