

NGFW-Engineer Most Reliable Questions & NGFW-Engineer Exam Sample Questions

What's more, part of that Itcertking NGFW-Engineer dumps now are free: https://drive.google.com/open?id=1S8AJk2bNKOWGQI7-Q_ZVwzV__Huy3zEd

If you want to constantly improve yourself and realize your value, if you are not satisfied with your current state of work, if you still spend a lot of time studying and waiting for NGFW-Engineer qualification examination, then you need our NGFW-Engineer material, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our NGFW-Engineer Study Materials have three different versions, including the PDF version, the software version and the online version.

Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA-Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics.
Topic 2	<ul style="list-style-type: none"> PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings.
Topic 3	<ul style="list-style-type: none"> PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active <ul style="list-style-type: none"> active and active passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPSec, quantum-resistant cryptography, and GRE tunnels.

NGFW-Engineer Most Reliable Questions - Palo Alto Networks First-grade NGFW-Engineer Exam Sample Questions

We all have same experiences that some excellent people around us further their study and never stop their pace even though they

have done great job in their surrounding environment. So it is of great importance to make yourself competitive as much as possible. Facing the NGFW-Engineer exam this time, your rooted stressful mind of the exam can be eliminated after getting help from our NGFW-Engineer practice materials. They do not let go even the tenuous points about the NGFW-Engineer exam as long as they are helpful and related to the exam. And let go those opaque technicalities which are useless and hard to understand, which means whether you are newbie or experienced exam candidate of this area, you can use our NGFW-Engineer real questions with ease.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q72-Q77):

NEW QUESTION # 72

During an upgrade to the routing infrastructure in a customer environment, the network administrator wants to implement Advanced Routing Engine (ARE) on a Palo Alto Networks firewall.

Which firewall models support this configuration?

- A. PA-455, VM-Series, PA-1410, PA-5450
- B. PA-7050, PA-1420, VM-Series, CN-Series
- C. PA-3260, PA-5410, PA-850, PA-460
- **D. PA-5280, PA-7080, PA-3250, VM-Series**

Answer: D

NEW QUESTION # 73

Which protocol and port number are used by default for IKE Phase 1 negotiations in an IPSec VPN?

- A. TCP 22
- B. TCP 443
- **C. UDP 500**
- D. UDP 4500

Answer: C

NEW QUESTION # 74

An administrator is configuring dynamic updates on a Palo Alto Networks firewall that protects a hospital's patient record system. The primary concern is ensuring maximum stability and avoiding any service disruption from a potentially problematic content update. To align with Palo Alto Networks best practices for such environments, which threshold should the administrator set for content updates?

- A. 0 hours
- B. 12 hours
- **C. 48 hours**
- D. 24 hours

Answer: C

Explanation:

For highly sensitive and mission-critical environments such as healthcare systems, Palo Alto Networks best practices recommend using a longer content update threshold to allow sufficient soak time for new updates, reducing the risk of instability or service disruption caused by newly released content.

NEW QUESTION # 75

An organization runs multiple Kubernetes clusters both on-premises and in public clouds (AWS, Azure, GCP). They want to deploy the Palo Alto Networks CN-Series NGFW to secure east-west traffic within each cluster, maintain consistent Security policies across all environments, and dynamically scale as containerized workloads spin up or down. They also plan to use a centralized Panorama instance for policy management and visibility.

Which approach meets these requirements?

- A. Configure the CN-Series only in public cloud clusters, and rely on Kubernetes Network Policies for on-premises cluster

security. Synchronize partial policy information into Panorama manually as needed.

- B. Install standalone CN-Series instances in each cluster with local configuration only. Export daily policy configuration snapshots to Panorama for recordkeeping, but do not unify policy enforcement.
- C. Use Kubernetes-native deployment tools (e.g., Helm) to deploy CN-Series in each cluster, ensuring local insertion into the service mesh or CNI. Manage all CN-Series firewalls centrally from Panorama, applying uniform Security policies across on-premises and cloud clusters.
- D. Deploy a single CN-Series firewall in the on-premises data center to process traffic for all clusters, connecting remote clusters via VPN or peering. Manage this single instance through Panorama.

Answer: C

Explanation:

This approach meets all the requirements for securing east-west traffic within each Kubernetes cluster, maintaining consistent security policies across on-premises and cloud environments, and allowing for dynamic scaling of the CN-Series NGFWs as containerized workloads spin up or down. By using Kubernetes-native deployment tools (such as Helm), the CN-Series NGFWs can be deployed and scaled dynamically within each cluster. Local insertion into the service mesh or CNI ensures that the NGFW can inspect traffic at the appropriate points within the cluster.

Centralized management via Panorama ensures that security policies are uniform across both on-premises and cloud environments, providing visibility and control across all clusters.

NEW QUESTION # 76

In an active/active high availability (HA) configuration with two PA-Series firewalls, how do the firewalls use the HA3 interface?

- A. To perform session cache synchronization among all HA peers having the same cluster ID
- B. To synchronize sessions, forwarding tables, IPSec security associations, and ARP tables between firewalls in an HA pair
- C. To exchange hellos, heartbeats, HA state information, and management plane synchronization for routing and User-ID information
- D. To forward packets to the HA peer during session setup and asymmetric traffic flow

Answer: D

Explanation:

The HA3 interface, a Layer 2 link using MAC-in-MAC encapsulation, enables packet forwarding between active/active firewalls to handle asymmetric routing and ensure proper session setup when traffic arrives at the non-owner peer.

NEW QUESTION # 77

.....

Our NGFW-Engineer learning materials provide multiple functions and considerate services to help the learners have no inconveniences to use our product. We guarantee to the clients if only they buy our NGFW-Engineer study materials and learn patiently for some time they will be sure to pass the NGFW-Engineer test with few failure odds. The price of our product is among the range which you can afford and after you use our study materials you will certainly feel that the value of the product far exceed the amount of the money you pay. Choosing our NGFW-Engineer Study Guide equals choosing the success and the perfect service.
