How our DevOps-Foundation study questions can help you successfully pass your coming DevOps-Foundation exam? The answer lies in the outstanding DevOps-Foundation exam materials prepared by our best industry professionals and tested by our faithful clients. Our exam materials own the most authentic and useful information in questions and answers. For our DevOps-Foundation practice material have been designed based on the format of real exam questions and answers that you would surely find better than the other exam vendors'.

The DevOps-Foundation PDF Questions of Exam4Tests are authentic and real. These PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam questions help applicants prepare well prior to entering the actual PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam center. Due to our actual DevOps-Foundation Exam Dumps, our valued customers always pass their Peoplecert DevOps-Foundation exam on the very first try hence, saving their precious time and money too.

DevOps-Foundation Test Questions | Lab DevOps-Foundation Questions

According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion that the majority learners have the same problems to a large extent, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our DevOps-Foundation test prep is totally designed for these study groups to improve their capability and efficiency when preparing for DevOps-Foundation Exams, thus inspiring them obtain the targeted DevOps-Foundation certificate successfully. There are many advantages of our DevOps-Foundation question torrent that we are happy to introduce you and you can pass the exam for sure.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20

According to the State of DevOps Reports, LOW performing organizations have:

- A. Faster mean times to recovery
- B. Faster lead times from commit to deploy
- C. More frequent code deployments
- D. Higher change failure rates

Answer: D

Explanation:

The State of DevOps Reports show thatLOW performing organizations have higher change failure rates, meaning a larger

percentage of changes lead to incidents, outages, or degraded service. In contrast, high performers have more frequent deployments, faster lead times, and quicker recovery from incidents.

Reference: DevOps Foundation v3.6 syllabus section 2.2; Accelerate: The Science of Lean Software and DevOps.

NEW QUESTION # 21

Which of the following helps an organization to practice DevSecOps?

- A. Engaging external testing services
- **B. Security as code**
- C. Embracing a "shift right" testing strategy approach can take advantage of continuous integration and test-driven development practices
- D. Conducting frequent security audits after deployment

Answer: B

Explanation:

DevSecOps is about integrating security into every stage of the software delivery lifecycle rather than treating it as a separate, post-development activity. PeopleCert DevOps Foundation v3.6 stresses that security must shift left-moving testing, vulnerability scanning, and compliance checks earlier in the process.

Security as Code means embedding security policies, controls, and checks directly into infrastructure and application code. This includes:

* Automated vulnerability scanning in CI/CD pipelines

* Infrastructure-as-code with integrated security configurations

* Policy-as-code to enforce compliance automatically

* Static and dynamic application security testing (SAST/DAST) integrated into build pipelines While A incorrectly says "shift right" (testing later in production), DevSecOps emphasizes shifting left. B (post-deployment audits) and C (external testing) can complement DevSecOps but don't fully embed security into the delivery workflow.

Therefore, D - Security as code is the most direct enabler of DevSecOps practices.

NEW QUESTION # 22

Several members of an IT service provider's development and operations teams recently attended a local DevOps meetup. They came away very excited about applying a DevOps approach to their organization.

Which of the following would be a critical success factor for their DevOps program?

- A. Additional budget for new automation
- **B. Management commitment to culture change**
- C. The design and development of a deployment pipeline for continuous integration and continuous delivery
- D. Reorganization of the IT organization into DevOps Teams

Answer: B

Explanation:

Successful DevOps transformation hinges on management commitment to cultural change. This includes leadership support for breaking down silos, encouraging collaboration, fostering psychological safety, and aligning incentives.

While budget, reorganization, and deployment pipelines are important enablers, they cannot deliver sustainable transformation without cultural alignment. Leaders must model desired behaviors, remove systemic blockers, and reinforce the new ways of working.

Without cultural change, DevOps becomes a tooling initiative rather than a true organizational shift.

NEW QUESTION # 23

Which of the following would enable an IT organization to consolidate gains from a DevOps pilot?

- A. Hiring new people to expand the DevOps program
- B. Introducing more advanced tools and techniques
- C. Sharing lessons learned
- D. Rewarding the people who participated in the pilot

Answer: C

Explanation:

After a DevOps pilot, consolidating gains requires capturing and sharing lessons learned so that other teams can benefit from successes and avoid repeating mistakes.

This practice supports scaling DevOps practices across the organization by creating a shared knowledge base and promoting continuous improvement.

A (rewards) can motivate but doesn't spread the learning. B (hiring) may expand resources but doesn't ensure knowledge transfer. D (advanced tools) may enhance capability but should come after understanding what worked in the pilot.

Thus, C is the most effective action for consolidating pilot gains.

NEW QUESTION # 24

IT Operations have created a set of centralized platforms and tooling services that any dev team can use to be more productive using guidance from The DevOps Handbook.

Which of the following key characteristics does it have?

- A. A shared version control repository with pre-blessed security libraries
- B. A deployment pipeline that automatically runs code quality and security scanning tools
- C. All of the above
- D. Deploys applications into known good environments with production monitoring

Answer: C

Explanation:

A centralized platform in DevOps provides standardized, reusable services to development teams, improving productivity and reducing duplication. Characteristics include:

* A: Centralized version control with approved security libraries promotes consistent and secure coding practices.

* B: Automated pipelines that include quality and security scans ensure compliance and quality are built-in, not bolted on.

* C: Deployment to validated environments with monitoring enables quick detection and resolution of issues.

Since all three characteristics (A, B, C) are described in PeopleCert and The DevOps Handbook as best practices, D-All of the above-is correct.
