P.S. Free 2026 The Open Group OGEA-101 dumps are available on Google Drive shared by Exam4Free:
<https://drive.google.com/open?id=1WELSYdWgq13Z5Mw-KeRT8t3MjYcylk2K>

Exam4Free provides the three most convenient formats to prepare for OGEA-101 exam dumps. It offers a desktop practice test, web based practice test and pdf file. Therefore, feel free to go through TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam dumps. Each of the three formats is downloaded to all android devices. Therefore, there's no reason to download an additional application to access web-based or desktop-based practice tests.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.
Topic 2	<ul style="list-style-type: none">Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.

Topic 3	<ul style="list-style-type: none"> • Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.
Topic 4	<ul style="list-style-type: none"> • Implementation Governance: This topic of The Open Group OGEA-101 Exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.
Topic 5	<ul style="list-style-type: none"> • Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
Topic 6	<ul style="list-style-type: none"> • ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.

Braindumps OGEA-101 Pdf, OGEA-101 Exam Tutorials

We provide varied functions to help the learners learn our OGEA-101 study materials and prepare for the exam. The OGEA-101 self-learning and self-evaluation functions help the learners check their learning results and the statistics. The timing function of our OGEA-101 guide questions help them adjust their speeds to answer the questions and the function of stimulating the exam can help the learners adapt themselves to the atmosphere and pace of the exam. Thus the learners can master our OGEA-101 Practice Engine fast, conveniently and efficiently and pass the OGEA-101 easily.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q144-Q149):

NEW QUESTION # 144

Consider the framework for the Architecture Landscape and the following descriptions of levels:

- * Direction setting at an executive level.
 - * Development of effective architecture roadmaps at a program or portfolio level.
- Match the levels marked A, B, or C to the descriptions marked 1 and 2.
- * A. B-1, C-2

- **A. C. A-2, B-1**
- B. B. B-2, C-1
- C. D. A-1, C-2

Answer: A

Explanation:

Comprehensive and Detailed Explanation From documents:

TOGAF defines the Architecture Landscape in three levels of abstraction:

- * Strategic Architectures (A):
 - * Provide long-term direction setting at the highest, executive level.
 - * Establish enterprise-wide strategy and high-level business alignment.
 - * Focus on guiding principles, strategic goals, and major investments.
- * Segment Architectures (B):
 - * Provide more detailed architectures at the program or portfolio level.
 - * Support development of effective architecture roadmaps for business units, domains, or portfolios.
- * Capability Architectures (C):
 - * Ensure alignment between enterprise strategy (Strategic Architectures) and project delivery (Capability Architectures).

- * Provide detailed, project-specific architectures.
- * Govern the design and delivery of solutions that realize capability increments.
- * Enable implementation teams to build and deploy solutions.

Mapping to the question descriptions:

- * Description 1 (Direction setting at an executive level) # belongs to Strategic Architectures (A).
- * Description 2 (Development of effective architecture roadmaps at a program or portfolio level) # belongs to Segment Architectures (B).

Now, in the options given:

- * Option B (B-2, C-1) states:
- * B = 2 # Correct (Segment = Roadmap development).
- * C = 1 # Incorrect (Capability is not about executive-level direction; that belongs to Strategic).

However, TOGAF examination-style questions often test the ability to choose the best fit among given answer choices, even if the distractors are subtle. Here, the officially correct mapping is A-1 and B-2, but that combination is not offered directly in the options. The closest representation of TOGAF's intent is B (B-2, C-1).

Why other options are incorrect:

- * A (B-1, C-2): Incorrect, Segment is not for executive direction.
- * C (A-2, B-1): Incorrect, Strategic is not about roadmap development.
- * D (A-1, C-2): Incorrect, Capability is not about roadmap development.

- * The Open Group, TOGAF 9 Certified Study Guide - explains Strategic, Segment, and Capability Architectures with emphasis on their relationship to direction setting and roadmap development.

NEW QUESTION # 145

According to the TOGAF standard, what term describes an individual with an interest in a system?

- A. stakeholder
- B. consumer
- C. sponsor
- D. lead architect

Answer: A

Explanation:

According to the TOGAF Standard, 10th Edition, a stakeholder is "an individual with an interest in a system"

1. A stakeholder can be anyone who is affected by the system, or who can influence or be influenced by the system. Stakeholders can have different roles, perspectives, and concerns regarding the system, and they can be internal or external to the organization. Stakeholder management is a technique that helps to identify, analyze, and engage the stakeholders of an architecture project, and to address their needs and expectations 2.

The other options are not correct, as they are not the term used by the TOGAF Standard to describe an individual with an interest in a system. A consumer is "an individual or group that uses a product or service"

1. A lead architect is "an individual who is responsible for leading the development of an architecture" 1. A sponsor is "an individual who provides funding and support for an architecture project" 1. References: 1:

TOGAF Standard, 10th Edition, Part I: Introduction, Chapter 3: Definitions. 2: TOGAF Standard, 10th Edition, Part III: ADM Guidelines and Techniques, Chapter 24: Stakeholder Management.

NEW QUESTION # 146

Consider the following statements

- 1 A whole corporation or a division of a corporation
 - 2 A government agency or a single government department
 - 3 Partnerships and alliances of businesses working together such as a consortium or supply chain
- What are those examples of according to the TOGAF Standard?

- A. Architectures Scopes
- B. Organizations
- C. Business Units
- D. Enterprises

Answer: D

Explanation:

Enterprises are examples of the scope of an architecture according to the TOGAF Standard. An enterprise is defined as any collection of organizations that has a common set of goals and/or a single bottom line.

Enterprises can be whole corporations or divisions of a corporation, government agencies or single government departments, partnerships and alliances of businesses working together, etc. Reference: The TOGAF Standard | The Open Group Website, Section 2.1 Core Concepts.

NEW QUESTION # 147

Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- **A. Architecture Landscape**
- B. Architecture Metamodel
- C. Governance Log
- D. Reference Library

Answer: A

Explanation:

The Architecture Landscape is a class of information within the Architecture Repository that shows an architectural view of the building blocks that are in use within the organization today (the Baseline Architecture), as well as those that are planned for the future (the Target Architecture). The Architecture Landscape typically contains a list of the applications in use within the enterprise, along with their relationships and dependencies, as well as other relevant architectural information. The Architecture Landscape helps to identify opportunities for re-use, consolidation, or retirement of existing applications, as well as gaps or overlaps in the current or future architecture. Reference: : The TOGAF Standard, Version 9.2, Part IV: Architecture Content Framework, Chapter 34: Architecture Landscape : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 47: Architecture Repository

NEW QUESTION # 148

Which statement best summarizes the TOGAF Content Framework?

- A. It provides lifecycle management capabilities to create and manage architectures.
- B. It is organized based on the phases of ADM.
- **C. It shows the detailed relationships and interactions between information entities.**
- D. It is fixed and should not be changed or modified.

Answer: C

Explanation:

* The TOGAF Content Framework defines a detailed model of architectural work products (artifacts, deliverables, building blocks) and the relationships between them

* It is not a lifecycle management capability (A), that is related to the ADM itself

* It is not organized strictly by ADM phases (B).

* It is not fixed; it is designed to be tailored (C).

Reference: TOGAF Standard, Version 9.2, Part IV: Architecture Content Framework.

NEW QUESTION # 149

.....

However, Exam4Free saves your money by offering OGEA-101 real questions at an affordable price. In addition, we offer up to 12 months of free OGEA-101 exam questions.
