Modern technology has changed the way how we live and work. In current situation, enterprises and institutions require their candidates not only to have great education background, but also acquired professional AZ-500 certification. Considering that, it is no doubt that an appropriate certification would help candidates achieve higher salaries and get promotion. However, when asked whether the AZ-500 Latest Dumps are reliable, costumers may be confused. For us, we strongly recommend the AZ-500 exam questions compiled by our company, here goes the reason. On one hand, our AZ-500 test material owns the best quality.

The Microsoft AZ-500 exam consists of various topics such as securing Azure resources and data services, implementing platform protection, managing identity and access, monitoring and reporting on Azure security, and responding to security incidents. To pass the exam, you need to have a solid understanding of Azure security features, tools, and best practices. It is recommended that candidates have at least one year of experience in implementing security controls in Azure environments.

Microsoft AZ-500 Certification Exam is a valuable credential for professionals who want to demonstrate their expertise in securing Microsoft Azure environments. Microsoft Azure Security Technologies certification exam demonstrates the candidate's knowledge and skills in implementing security controls in Azure, identifying and mitigating threats, and complying with regulatory requirements. Microsoft Azure Security Technologies certification can help professionals advance their careers in cloud security, increase their earning potential, and gain recognition in the industry.

Microsoft AZ-500 Certification Exam is an excellent choice for professionals looking to advance their careers in cloud security. Microsoft Azure Security Technologies certification is highly respected in the industry, and it demonstrates that the holder has the skills and knowledge required to secure Azure environments effectively. It also provides a solid foundation for other Azure certifications, such as the Azure Solutions Architect Expert certification.

Test Microsoft AZ-500 Pdf & AZ-500 Valid Test Objectives

With the Microsoft Azure Security Technologies AZ-500 exam, you will have the chance to update your knowledge while obtaining dependable evidence of your proficiency. You can benefit from a number of additional benefits after completing the Microsoft Azure Security Technologies AZ-500 Certification Exam. But keep in mind that the AZ-500 certification test is a worthwhile and challenging certificate.

Microsoft Azure Security Technologies Sample Questions (Q448-Q453):

NEW QUESTION # 448

Your on-premises network contains the servers shown in the following table.

- You have an Azure subscription That contains multiple virtual machines that run either Windows Server 2019 OfSLES.

Answer:

Explanation:

NEW QUESTION # 449

You have an Azure subscription that contains an Azure web app named Appl.

You plan to configure a Conditional Access policy for Appl. The solution must meet the following requirements:

- * Only allow access to App1 from Windows devices.
- * Only allow devices that are marked as compliant to access Appl.

Which Conditional Access policy settings should you configure? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 450

Your network contains an on-premises Active Directory domain that syncs to an Azure Active Directory (Azure AD) tenant. The tenant contains the users shown in the following table.

The tenant contains the groups shown in the following table.

You configure a multi-factor authentication (MFA) registration policy that and the following settings:

Assignments:

Include: Group1

Exclude Group2

Controls: Require Azure MFA registration

Enforce Policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer:

Explanation:

NEW QUESTION # 451

You need to create Role1 to meet the platform protection requirements.

How should you complete the role definition of Role1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Scenario: A new custom RBAC role named Role1 must be used to delegate the administration of the managed disks in Resource Group1. Role1 must be available only for Resource Group1.

Azure RBAC template managed disks "Microsoft.Storage/"

Topic 2, ContosoPlease wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live

environment. While most functionality will be available to you as it would be in a live environment some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all Please note that once you submit your work by clicking the Next button within a lab.

Task 1:

You need to configure Azure to allow RDP connections from the Internet to a virtual machine named VM1.

The solution must minimize the attack surface of VM1.

To complete this task, sign in to the Azure portal.

Task 2:

You need to add the network interface of a virtual machine named VM1 to an application security group named ASG1.

To complete this task, sign in to the Azure portal.

Task 3:

You need to perform a full malware scan every Sunday at 02:00 on a virtual machine named VM1 by using Microsoft Antimalware for Virtual Machines.

Task 4:

The developers at your company plan to create a web app named App10317806 and to publish the app to

<https://www.contoso.com>.

You need to perform the following tasks:

* Ensure that App10317806 is registered to Azure Active Directory (Azure AD).

* Generate a password for App10317806.

Task 5:

You need to prevent administrative users from accidentally deleting a virtual network named VNET1. The administrative users must be allowed to modify the settings of VNET1.

Task 6:

You need to ensure that a user named user210317806 can manage the properties of the virtual machines in the RG1lod10317806 resource group. The solution must use the principle of least privilege.

Task 7:

You need to ensure that only devices connected to a 131.107.0.0/16 subnet can access data in the railod10317806 Azure Storage account, Task 8:

You need to email an alert to a user named admin1@contoso.com if the average CPU usage of a virtual machine named VM1 is greater than 70 percent for a period of 15 minutes.

Task 9:

You need to collect all the audit failure data from the security log of a virtual machine named VM1 to an Azure Storage account.

To complete this task, sign in to the Azure portal.

This task might take several minutes to complete. You can perform other tasks while the task completes.

Task 10:

You need to prevent HTTP connections to the rg1lod10317806n1 Azure Storage account.

Task 11:

You need to ensure that the rg1lod10317806n1 Azure Storage account is encrypted by using a key stored in the KeyVault10317806 Azure key vault.

Task 12:

You need to create a new Azure Active Directory (Azure AD) directory named 10317806.onmicrosoft.com

The new directory must contain a user named user10317806.onmicrosoft.com who is configured to sign in by using Azure Multi-Factor Authentication (MFA).

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The company hosts its entire server infrastructure in Azure.

Contoso has two Azure subscriptions named Sub1 and Sub2. Both subscriptions are associated to an Azure Active Directory (Azure AD) tenant named contoso.com.

Technical requirements

Contoso identifies the following technical requirements:

- * Deploy Azure Firewall to VNetWork1 in Sub2.
- * Register an application named App2 in contoso.com.
- * Whenever possible, use the principle of least privilege.
- * Enable Azure AD Privileged Identity Management (PIM) for contoso.com

Existing Environment

Azure AD

Contoso.com contains the users shown in the following table.

Contoso.com contains the security groups shown in the following table.

Sub1

Sub1 contains six resource groups named RG1, RG2, RG3, RG4, RG5, and RG6.

User2 creates the virtual networks shown in the following table.

Sub1 contains the locks shown in the following table.

Sub1 contains the Azure policies shown in the following table.

Sub2

Sub2 contains the virtual machines shown in the following table.

All virtual machines have the public IP addresses and the Web Server (IIS) role installed. The firewalls for each virtual machine allow ping requests and web requests.

Sub2 contains the network security groups (NSGs) shown in the following table.

NSG1 has the inbound security rules shown in the following table.

NSG2 has the inbound security rules shown in the following table.

NSG3 has the inbound security rules shown in the following table.

NSG4 has the inbound security rules shown in the following table.

NSG1, NSG2, NSG3, and NSG4 have the outbound security rules shown in the following table.

Contoso identifies the following technical requirements:

- * Deploy Azure Firewall to VNetwork1 in Sub2.
- * Register an application named App2 in contoso.com.
- * Whenever possible, use the principle of least privilege.
- * Enable Azure AD Privileged Identity Management (PIM) for contoso.com

NEW QUESTION # 452

You are configuring network connectivity for two Azure virtual networks named VNET1 and VNET2.

You need to implement VPN gateways for the virtual networks to meet the following requirements:

- * VNET1 must have six site-to-site connections that use BGP.
- * VNET2 must have 12 site-to-site connections that use BGP.
- * Costs must be minimized.

Which VPN gateway SKI) should you use for each virtual network? To answer, drag the appropriate SKUs to the correct networks. Each SKU may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Answer:

Explanation:

Explanation:
