100% Pass Fortinet - FCSS_EFW_AD-7.4 - FCSS - Enterprise Firewall 7.4 Administrator Pass-Sure PDF Questions

Where can you purchase the best quality and cheapest FCSS_EFW_AD-7.4 exam dumps? DumpsMaterials will meet all examinees'needs with cheaper price and high quality FCSS_EFW_AD-7.4 exam dumps and answers. The sales of FCSS_EFW_AD-7.4 certification training materials on DumpsMaterials site is in front of the same work areas. The passing rate of our FCSS_EFW_AD-7.4 VCE Dumps is 100%. In a word, choosing DumpsMaterials for you to pass FCSS_EFW_AD-7.4 test is equal to choose success.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q52-Q57):

NEW QUESTION # 52

Examine the following traffic log; then answer the question below.

date=20xx-02-01 time=19:52:01 devname=masterdevice_id="xxxxxxx" log_id=0100020007 type=event subtype=system pri critical vd=root service=kemsel status=failure msg="NAT port is exhausted." What does the log mean?

- A. There is not enough available memory in the system to create a new entry in the NAT port table.
- B. The limit for the maximum number of entries in the NAT port table has been reached.
- C. The limit for the maximum number of simultaneous sessions sharing the same NAT port has been reached.
- D. FortiGate does not have any available NAT port for a new connection.

Answer: C

NEW QUESTION # 53

Which statement about network processor (NP) offloading is true?

- A. When NP acceleration is enabled, firewall sessions may not offload if proxy-based security profiles are included in the firewall policy.
- B. You can disable the NP for each firewall policy using the command np-acceleration set to loose.
- C. For UDP traffic, the FortiGate CPU offloads the first packet to identify it as fast-path traffic.
- D. The FortiGate CPU offloads all firewall sessions that require FortiOS session helper to the network processing unit (NPU).

Answer: A

NEW QUESTION # 54

Examine these partial outputs from two routing debug commands:

```
# get router info routing-table database
S 0.0.0.0/0 [20/0] via 100.64.2.254, port2, [10/0]
S *> 0.0.0.0/0 [10/0] via 100.64.1.254, port1
# get router info routing-table all
S* 0.0.0.0/0 [10/0] via 100.64.1.254, port1
```

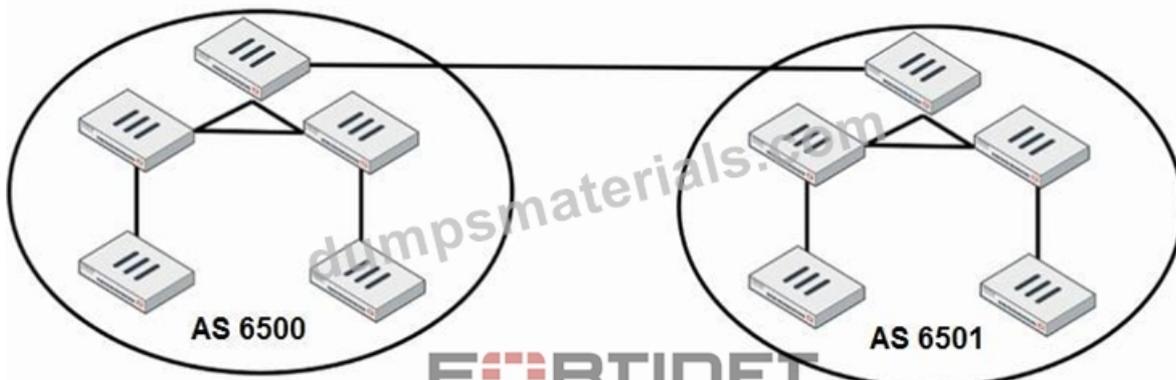

Why is the default route that uses port2 not in the output of the second command?

- A. There can be only one default route present in an active routing table.
- B. It has a higher priority than the default route using port1.
- C. It is disabled in the FortiGate configuration.
- D. It has a higher distance than the default route using port1.

Answer: D

NEW QUESTION # 55

Refer to the exhibit.

An administrator wants to expand the network by adding two additional FortiGate devices into AS 6500.

Which configuration is the most effective way to improve BGP convergence in this scenario?

- A. Prefix list
- B. BFD
- C. Neighbor group
- **D. Route reflector**

Answer: D

NEW QUESTION # 56

Refer to the exhibit, which shows a physical topology and a traffic log.

The administrator is checking on FortiAnalyzer traffic from the device with IP address 10.1.10.1, located behind the FortiGate ISFW device.

The firewall policy in on the ISFW device does not have UTM enabled and the administrator is surprised to see a log with the action Malware, as shown in the exhibit.

What are the two reasons FortiAnalyzer would display this log? (Choose two.)

- **A. The firewall policy in NGFW-1 has UTM enabled.**
- B. ISFW is not connected to FortiAnalyzer and must go through NGFW-1.
- **C. ISFW is in a Security Fabric environment.**
- D. Security rating is enabled in ISFW.

Answer: A,C

Explanation:

From the exhibit, ISFW is part of a Security Fabric environment with NGFW-1 as the Fabric Root.

In this architecture, FortiGate devices share security intelligence, including logs and detected threats.

ISFW is in a Security Fabric environment:

Security Fabric allows devices like ISFW to receive threat intelligence from NGFW-1, even if UTM is not enabled locally.

If NGFW-1 detects malware from IP 10.1.10.1 to 89.238.73.97, this information can be propagated to ISFW and FortiAnalyzer.

The firewall policy in NGFW-1 has UTM enabled:

Even though ISFW does not have UTM enabled, NGFW-1 (which sits between ISFW and the external network) does have UTM enabled and is scanning traffic. Since NGFW-1 detects malware in the session, it logs the event, which is then sent to FortiAnalyzer.

NEW QUESTION # 57

.....

A second format is a FCSS_EFW_AD-7.4 web-based practice exam that can take for self-assessment. However, it differs from desktop-based FCSS_EFW_AD-7.4 practice exam software as it can be taken via any browser, including Chrome, Firefox, Safari, and Opera. This Fortinet FCSS_EFW_AD-7.4 web-based practice exam does not require any other plugins. You can take this FCSS_EFW_AD-7.4 self-assessment test on Windows, iOS, Linux, Mac, and Android. It also includes all of the functionalities of desktop FCSS_EFW_AD-7.4 software and will assist you in passing the FCSS_EFW_AD-7.4 certification test.
