Answer: A

NEW QUESTION # 38

Which of the following are considered to be enablers of shared understanding?

- A. Domain-specific standards
- B. Large and diverse teams
- C. Geographic distance
- D. Informed mutual trust

Answer: A,D

NEW QUESTION # 39

In regard to stakeholder requirements, which of the following sentences is true?

- A. They set required domain properties.
- B. They set what the users desire from their perspective.
- C. They set business goals and objectives of an organization.
- D. They set what the system shall do.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The CPRE materials distinguish several abstraction levels: business, stakeholder (including user), system and domain requirements. Business requirements express organizational goals. Stakeholder requirements describe what stakeholders, including users, want from their point of view, often in their language and context. User requirements are a subset of stakeholder requirements. System requirements refine these into what the system must do or how it must behave, while domain requirements describe properties and rules of the domain itself.

Therefore the statement that stakeholder requirements set what users desire from their perspective is the best fit among the options.

NEW QUESTION # 40
