

NS0-185 Testking Learning Materials and Network Appliance NS0-185 Well Prep: NetApp Storage Installation Engineer, ONTAP Professional Exam Pass for Sure

The Network Appliance NS0-185 web-based practice test software is very user-friendly and simple to use. It is accessible on all browsers (Chrome, Firefox, MS Edge, Safari, Opera, etc). It will save your progress and give a report of your mistakes which will surely be beneficial for your overall exam preparation.

Before you choose to end your practices of the NS0-185 study materials, the screen will display the questions you have done, which help you check again to ensure all questions of NS0-185 practice prep are well finished. The report includes your scores of the NS0-185 learning guide. Also, it will display how many questions of the NS0-185 exam questions you do correctly and mistakenly. In a word, you can compensate for your weakness and change a correct review plan of the study materials.

NS0-185 Well Prep & Valid NS0-185 Guide Files

The Exams4sures Network Appliance NS0-185 practice test software is offered in two different types which are NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) desktop practice test software and web-based practice test software. Both are the Prepare for your NS0-185 practice exams that will give you a real-time NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) exam environment for quick NS0-185 exam preparation. With the NS0-185 desktop practice test software and web-based practice test software you can get an idea about the types, structure, and format of real NS0-185 exam questions.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q79-Q84):

NEW QUESTION # 79

When you start a new Service Event Report, what must be entered first?

- A. the case ID number
- **B. the node serial number**
- C. the sales order number
- D. the project number

Answer: B

Explanation:

A Service Event Report (SER) is used to document installation, maintenance, or corrective actions performed on NetApp systems. Thenode serial numberis the primary identifier used to associate the report with specific hardware.

Other identifiers such as case ID, project number, or sales order number are supplementary and may not always exist at the time the SER is created.

Therefore, the correct answer isC (the node serial number).

NEW QUESTION # 80

You used the system controller environment show command.
Which issue would be diagnosed with this command?

- A. shelf cabling issues
- B. controller version issues
- C. controller configuration issues
- D. controller hardware issues

Answer: D

NEW QUESTION # 81

Which tool checks a newly installed environment for configuration errors?

- A. Config Advisor
- B. Synergy
- C. FilerView
- D. BNA

Answer: A

Explanation:

After installing a NetApp storage system, it is critical to validate the environment for configuration and cabling errors. Config Advisor is the NetApp-recommended tool specifically designed for this purpose.

Config Advisor performs automated checks against NetApp-supported configuration rules, including hardware cabling, HA setup, disk ownership, shelf connectivity, network configuration, and firmware compatibility. It identifies misconfigurations that could lead to operational issues if left unresolved.

FilerView and BNA are legacy or unrelated tools, and Synergy is not used for ONTAP installation validation.

Therefore, the correct answer is D (Config Advisor).

NEW QUESTION # 82

What is the minimum number of disks required in a SAS shelf?

- A. one
- B. half of the shelf's capacity
- C. there is no minimum
- D. two

Answer: A

Explanation:

From a hardware installation perspective, NetApp SAS shelves are designed to function with a minimum of one installed disk. While performance, redundancy, and aggregate creation require additional disks, the physical shelf itself does not mandate a minimum disk count beyond one for detection and operation.

This flexibility allows administrators to stage hardware installations or expand capacity incrementally.

However, ONTAP best practices strongly recommend populating shelves in ways that support RAID protection and performance requirements.

Therefore, the minimum number of disks required in a SAS shelf is one, making option B correct.

NEW QUESTION # 83

A customer has two Cisco 40GbE data switches. They want to connect the switches to an AFF A400 HA pair.
The switches and the AFF A400 are approximately seven meters apart.

Referring to the exhibit, which two supported actions would allow you to accomplish this task? (Choose two.)

- A. Relocate the switches or the AFF A400 so that the distance is less than five meters.
- B. Change the requirement for optical cables.

- C. Change the requirement for Ethernet cables.
- **D. Install 10 meter NetApp supported copper cables.**

Answer: B,D

Explanation:

NetApp hardware installation documentation strictly defines supported cable types and distances for Ethernet connectivity. For 40GbE connections using QSFP+ interfaces, NetApp supports both copper and optical cabling, each with specific distance limitations.

The exhibit shows supported copper cable options, including 10-meter NetApp-supported copper cables, which exceed the current seven-meter requirement. Installing these supported cables is a valid and compliant solution.

Alternatively, the customer can change the requirement to optical cables, which support significantly longer distances and are fully supported for AFF A400 40GbE connectivity. Optical cables are commonly used when distance exceeds passive copper limitations.

Relocating equipment is not required when supported cabling options exist. Changing "Ethernet cable requirements" generically is not a valid technical action.

Therefore, the correct answers are B and D.

NEW QUESTION # 84

.....

There is an irreplaceable trend that an increasingly amount of clients are picking up NS0-185 study materials from tremendous practice materials in the market. There are unconquerable obstacles ahead of us if you get help from our NS0-185 Exam Questions. So many exam candidates feel privileged to have our NS0-185 practice braindumps. And our website is truly very famous for the hot hit in the market and easy to be found on the internet.

NS0-185 Well Prep: <https://www.exams4sures.com/NetworkAppliance/NS0-185-practice-exam-dumps.html>

The Network Appliance NS0-185 certification test, however, is a valuable and difficult credential, We aim to provide the best service on NS0-185 exam questions for our customers, and we demand of ourselves and our after sale service staffs to the highest ethical standard, though our NS0-185 study guide and compiling processes have been of the highest quality, 24/7 customer support for your questions and queries about NS0-185 Dumps PDF.

The WebServer Generator, This change makes the entity more NS0-185 reusable, but it's also more difficult to use because the entity must be configured for each environment.

The Network Appliance NS0-185 certification test, however, is a valuable and difficult credential, We aim to provide the best service on NS0-185 Exam Questions for our customers, and we demand of ourselves and our after sale service staffs to the highest ethical standard, though our NS0-185 study guide and compiling processes have been of the highest quality.

The Best NS0-185 Testking Learning Materials - New & Trustable NS0-185 Materials Free Download for Network Appliance NS0-185 Exam

24/7 customer support for your questions and queries about NS0-185 Dumps PDF, All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our NS0-185 test guide' growth.

These NS0-185 practice tests simulate the actual exam conditions and provide applicants with an accurate assessment of their readiness for the test.
