The more time you spend in the preparation for C_S4TM_2023 training materials, the higher possibility you will pass the exam. And with our C_S4TM_2023 study torrent, you can make full use of those time originally spent in waiting for the delivery of exam files. There is why our C_S4TM_2023 test prep exam is well received by the general public.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q56-Q61):

NEW QUESTION # 56

You want to optimize the load that you have planned for one of your trucks.

From which of the following can you start the load planning function? Note: There are 2 correct answers to this question.

- A. Vehicle resource
- B. Freight booking
- C. Freight order
- D. Transportation cockpit

Answer: C,D

Explanation:

Transportation Planning

NEW QUESTION # 57

Which of the following configuration settings can be used to automatically assign business partners?

Note: There are 2 correct answers to this question.

- A. Partner function
- B. Freight unit type
- C. Business function
- D. Freight order type

Answer: A,D

Explanation:

Master Data

NEW QUESTION # 58

The Core Interface or CIF is the technology that is used to transfer the master data from ERP to TM. Master data is normally scheduled for batch transfer once a day. The transfer of master data changes can be scheduled periodically as a job. You have to define a variant (containing the target system - TM - and the selection of master data objects) for the program RCPTRAN4 (hidden behind transaction CFP1).

Before you transfer the master-data, the following prerequisites need to be satisfied:

(2 correct answers)

- A. For sales orders, destination locations are stored on root level
- B. You have completed the SAP ERP system configuration to connect to the SAP TM system, this defines the specific server and client to which SAP ERP will transmit the data
- C. You have completed the SAP TM system configuration to connect to the SAP ERP system, since SAP TM can be integrated with your SAP ERP system, SAP TM needs to know the physical location and client of the SAP ERP system to which it will transmit planning and execution data

Answer: B,C

NEW QUESTION # 59

In which SAP Fiori apps can you define whether business shares are considered in the carrier selection process? Note: There are 2 correct answers to this question.

- A. Edit Carrier Selection Settings
- B. Define Transportation Lane
- C. Create Business Share
- D. Edit Freight Agreement

Answer: A,C

Explanation:
Freight Order Management

NEW QUESTION # 60

Which of the following driver management settings are maintained in freight order customization?

- A. Resource requirements
- **B. Home location**
- C. Default driver
- D. Default truck handling

Answer: B

Explanation:

In SAP S/4HANA Transportation Management, driver management settings for freight orders are configured in the freight order type customization. According to the SAP documentation, the home location (C) is a key setting maintained in freight order customization, specifying the base location for drivers assigned to freight orders. This setting helps in planning and scheduling by considering the driver's starting point.

The other options are incorrect:

- * Default truck handling (A) is not a standard setting in freight order customization; it may relate to vehicle resource configuration.
- * Default driver (B) is assigned in vehicle resources or planning profiles, not directly in freight order type customization.
- * Resource requirements (D) (corrected from "Number of required drivers" in the original document for clarity) are defined in vehicle resources or planning settings, not freight order customization.
