Pass Guaranteed Quiz 2026 Microsoft SC-400: High Hit-Rate Valid Microsoft Information Protection Administrator Exam Pass4sure

This updated Microsoft SC-400 exam study material of TestSimulate consists of these 3 formats: Microsoft SC-400 PDF, desktop practice test software, and web-based practice exam. Each format of TestSimulate aids a specific preparation style and offers unique advantages, each of which is beneficial for strong Microsoft Information Protection Administrator (SC-400) exam preparation. The features of our three formats are listed below. You can choose any format as per your practice needs.

The SC-400 Exam is suitable for candidates who have a strong understanding of Microsoft 365 services and have experience working with information protection and governance solutions. SC-400 exam assesses the candidate's knowledge in areas such as information protection policies, data classification, labeling, and protection, as well as the ability to manage and monitor Microsoft 365 compliance solutions.

Microsoft Information Protection Administrator Sample Questions (Q32-

Q37):

NEW QUESTION # 32
Hotspot Question
You have a Microsoft 365 E5 subscription that uses Microsoft Purview.
You need to deploy a compliance solution that will detect the accidental oversharing of information outside of an organization. The solution must minimize administrative effort.
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Policy template:
- Data leaks
- Risky browser usage
- Security policy violations

Policy template prerequisite:
- A data loss prevention (DLP) policy
- A retention policy
- An alert policy
- An eDiscovery case

Answer:

Explanation:

Answer Area

Policy template:
- **Data leaks**
- Risky browser usage
- Security policy violations

Policy template prerequisite:
- **A data loss prevention (DLP) policy**
- A retention policy
- An alert policy
- An eDiscovery case

NEW QUESTION # 34
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant and 500 computers that run Windows 10. The computers are onboarded to the Microsoft 365 compliance center.

You discover that a third-party application named Tailspin_scanner.exe accessed protected sensitive information on multiple computers. Tailspin_scanner.exe is installed locally on the computers.

You need to block Tailspin_scanner.exe from accessing sensitive documents without preventing the application from accessing other documents.

Solution: From the Microsoft 365 Endpoint data loss prevention (Endpoint DLP) settings, you add the application to the unallowed apps list.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:
Explanation
Unallowed apps is a list of applications that you create which will not be allowed to access a DLP protected file.

NEW QUESTION # 35
While creating a retention label, you discover that the following options are missing:
Mark items as a record
Mark items as a regulatory record
You need to ensure that the options are available when you create retention labels in the Microsoft 365 compliance center.
How should you complete the PowerShell script? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

```
$UserCredential = Get-Credential
Import-Module [                              ▼]
                AzureRM
                ExchangeOnlineManagement
                Microsoft.Online.SharePoint.PowerShell
                MicrosoftTeams

[                      ▼] -Credential $UserCredential
  Connect-AadrmService
  Connect-AzureAD
  Connect-AzureRMAccount
  Connect-IPPSSession

[                      ▼] -Enabled $true
  Enable-ComplianceTagStorage
  New-ComplianceTag
  Set-RegulatoryComplianceUI
  Set-RetentionCompliancePolicy
```
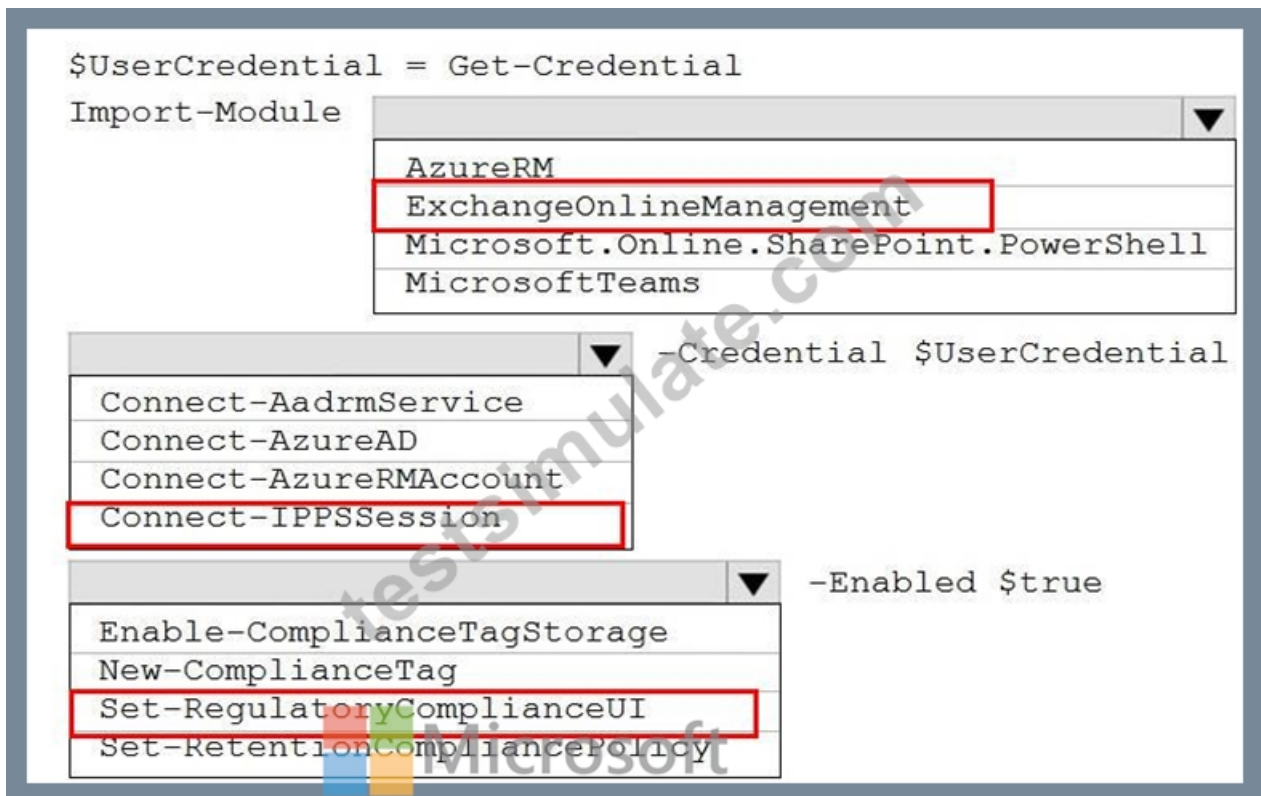

Answer:

Explanation:

```
$UserCredential = Get-Credential
Import-Module  [▼]
              AzureRM
              ExchangeOnlineManagement
              Microsoft.Online.SharePoint.PowerShell

NEW QUESTION # 36

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a file policy in Microsoft Cloud App Security.

You need to configure the policy to apply to all files. Alerts must be sent to every file owner who is affected by the policy. The policy must scan for credit card numbers, and alerts must be sent to the Microsoft Teams site of the affected department.

Solution: You use the Data Classification service inspection method and send alerts to Microsoft Power Automate.

Does this meet the goal?

- A. Yes
- B. No

Answer: B
