Cisco Certified Design Expert (CCDE v3.0) Written Exam Sample Questions (Q52-Q57):

NEW QUESTION # 52

Customer XYZ network consists of an MPLS core. IS-IS running as IGP a pair of BGP route reflectors for route propagation, and a few dozens of MPLS-TE tunnels for specific tactical traffic engineering requirements. The customer's engineering department has some questions about the use of the Overload Bit in the IS-IS networks and how it could be used to improve their current network design. Which two concepts about the Overload Bit are true? (Choose two.)

- A. It is not recommended on BGP Route Reflectors
- B. It can be set on a router during the startup process for a fixed period of time
- C. Networks advertised within the LSPs of the respective node will become unreachable
- D. It can be set on a router until other interacting protocols have signaled convergence.
- E. It forces the midpoint MPLS-TE node to reoptimize the primary tunnels going through the OL node.

Answer: B,D

NEW QUESTION # 53

Drag and Drop Question

Data residency and sovereignty requirements are based on regional and industry-specific regulations, and different organizations have different data sovereignty requirements.

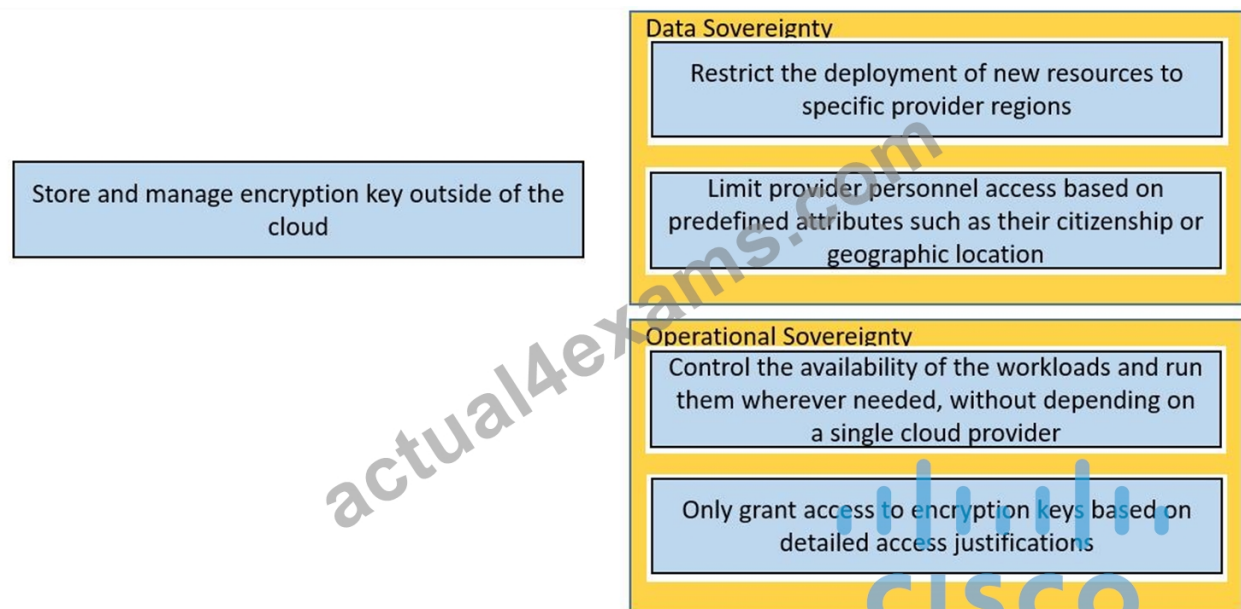

Implementation of a mechanism that provides control over all access to data by cloud providers and the ability to inspect changes to cloud infrastructure and services is required. Drag and drop the descriptions from the left onto the corresponding categories on the right in no particular order.

Not all options are used.

Control the availability of the workloads and run them wherever needed, without depending on a single cloud provider	Data Sovereignty
Store and manage encryption key outside of the cloud	
Restrict the deployment of new resources to specific provider regions	
Only grant access to encryption keys based on detailed access justifications	Operational Sovereignty
Limit provider personnel access based on predefined attributes such as their citizenship or geographic location	

Answer:

Explanation:

NEW QUESTION # 54

An organization that heavily realizes on SaaS applications for its day-to-day operations has advised their Chief Data Officer to collect and retain only the required technical data and information using available tools.

Which term covers this process?

- A. corporate compliance
- B. information governance
- C. data governance
- D. regulatory compliance

Answer: C

Explanation:

Data governance defines how data is collected, retained, and managed to ensure that only the required technical data and information are stored, aligning with business and compliance needs while avoiding unnecessary data collection.
