

Pegasystems PEGACPRSA22V1考古題，新版 PEGACPRSA22V1題庫

既然通過Pegasystems PEGACPRSA22V1 認證考試是不容易的，那麼選擇好的培訓工具就是成功的保證。Fast2test會第一時間為你提供考試資料及考試練習題和答案，讓你為Pegasystems PEGACPRSA22V1 認證考試做好充分的準備，以確保能100%通過Pegasystems PEGACPRSA22V1 認證考試。Fast2test不僅能讓你首次參加Pegasystems PEGACPRSA22V1 認證考試就成功通過，還能幫你節約寶貴的時間。

PEGASYSTEMS PEGACPRSA22V1認證考試旨在驗證希望成為認證的PEGA機器人系統架構師的個人的技能和知識。Pega Robotics是一個智能自動化平台，使企業能夠自動化其流程並提高其運營效率。這項認證考試涵蓋了一系列主題，包括Pega Robotics Studio, Runtime和Debugging工具，它旨在針對具有PEGA機器人技術經驗並尋求提高其技能和職業前景的個人。

PEGACPRSA22V1考試涵蓋了廣泛的主題，包括了解Pega Robotics架構、創建和使用Pega Robotics組件、開發機器人自動化以及部署和管理機器人自動化。該考試還包括實踐練習，測試考生應用知識解決實際情況的能力。該考試通過Pearson VUE在線交付，Pearson VUE是一家領先的基於計算機的測試服務提供商。

新版PEGACPRSA22V1題庫，PEGACPRSA22V1證照信息

IT認定考試是現今社會、特別是IT行業中最受歡迎的考試。IT考試的認證資格得到了國際社會的廣泛認可。不管你是想升職、加薪，或者只是想提高自己的工作技能，IT認定考試都是你的最佳選擇。怎麼樣，你肯定也是這樣認為的吧。那麼，不要猶豫了，趕快報名參加考試吧。Pegasystems的PEGACPRSA22V1考試是最近最有人氣的考試，你也想參加嗎？如果你不知道怎樣準備考試，Fast2test來告訴你。在Fast2test，你可以找到你想要的一切優秀的考試參考書。

Pega Robotics System Architect 22 考試基於最新版本的 Pega Robotic Automation 平台。通過此考試的申請者將能夠展示他們在平台最新功能和功能方面的熟練程度。此認證考試適合開發人員、架構師和顧問，他們有興趣建立自動化解決方案，以自動化重複的任務並提高運營效率。

最新的 PCRSA PEGACPRSA22V1 免費考試真題 (Q30-Q35):

問題 #30

To modify an object's default properties before use in a project, which setting must be updated?

- A. Type Name
- **B. Naming Rules**
- C. Prefix Types
- D. Type Prefixes

答案: B

問題 #31

When you debug an automation, you have three function keys to use for navigating the breakpoints. Drag each navigation rule on the left to the box next to the correct function key on the right.

答案:

解題說明:

□ Explanation:

When debugging automations in Pega Robot Studio, developers use specific function keys to control the flow of execution at breakpoints. Each key provides a distinct method for navigating through the automation logic during a debugging session. According to the Pega Robotics System Design and Implementation Guide, section "Debugging Automations - Function Keys and Breakpoint Navigation":

"During debugging, Pega Robot Studio allows you to step through the automation's logic using three primary navigation commands:
* F10 (Step Over): Executes the current step and proceeds to the next event or data link, without stepping into nested automations or sub-events.

* F11 (Step Into): Executes the current step and enters any nested event link or sub-automation to debug internal logic.

* F5 (Continue): Continues running the automation until the next breakpoint is encountered." Detailed Reasoning:

* F10 - Step Over

* Moves to the next automation event or data link at the same level.

* Skips over nested or child automations while still executing them.

* F11 - Step Into

* Moves into the next automation event link or nested automation to debug its internal process.

* Useful when you need to analyze detailed event flow inside another automation.

* F5 - Continue

* Resumes automation execution at normal speed until it encounters the next breakpoint or finishes.

* Used to verify execution results after setting conditional breakpoints.

Final Correct Matching:

Navigation Rule

Function Key

Proceed to the next automation event or data link.

F10

Proceed to the next automation event link.

F11

Continue running the automation until the next breakpoint is reached.

F5

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Debugging Automations - Step Over, Step Into, and Continue Execution section (Pega Robotics 19.1 and later).

問題 #32

Which two statements are valid for the given automation? (Choose two.)

□

- A. Assign Main[b]NearestStore with the new value when the value of the NearestStore changes.
- **B. Assign Main[b]NearestStore with the new value only if the value changed belongs to an active key.**
- **C. The value of the NearestStore changes when the automation is initiated.**
- D. The automation is initiated when the value of the NearestStore changes.

答案: B,C

問題 #33

The Automation Playback window allows you to _____.

- A. replay your last Runtime session where the applications are provided with the same account numbers automatically
- B. open a log file and debug any exceptions
- C. rerun the last automation that ran with the same values as inputs automatically entered
- D. open a log file and step through it as if you were running your solution in debug mode

答案： A

問題 #34

During application discovery of a Clarify application, you determine that the user accesses more than one customer case concurrently within the application, which creates multiple windows of the same type. This requires you to enable the UseKeys property on an application's object.

Based on the image that shows the application and the matched controls in the Object Explorer, which control's UseKeys property must be set to True?

- A. _Case_1
- B. ClarifyCRM
- C. MdiClient
- D. Control

答案： B
