CompTIA PK0-005 (CompTIA Project+ Certification) exam is ideal for project managers who are looking to advance their careers or gain industry recognition. It is also suitable for individuals who are new to project management and are looking to gain a

foundational understanding of the subject. A CompTIA Project+ certification can open up new career opportunities and help individuals build credibility as project managers.

CompTIA Project+ Certification Exam Sample Questions (Q255-Q260):

NEW QUESTION # 255

A contractor attended a project meeting that was exclusively for company employees. Which of the following actions should the PM take?

- A. Escalate to vendor management.
- **B. Reinforce the rules of engagement.**
- C. Review the meeting cadence.
- D. Consult the request for proposal.

Answer: B

Explanation:

The rules of engagement are the guidelines and expectations that define the relationship between the contractor and the company. They may include topics such as communication, confidentiality, access, security, performance, and compliance. The project manager should reinforce the rules of engagement with the contractor to ensure that they understand and respect the boundaries and protocols of the company. This will help to avoid any potential conflicts, misunderstandings, or breaches of contract. References = CompTIA Project+ Study Guide: Exam PK0-005, 3rd Edition, Chapter 7: Project Stakeholder Management, p. 239; Contractor Rules of Engagement - Cox Enterprises, p. 1; Legal Considerations for Engaging Contractors | LegalVision

NEW QUESTION # 256

A project manager decided to host the development environment on a cloud service. Which of the following would the project manager most likely use for this purpose?

- A. XaaS
- B. SaaS
- C. DaaS
- **D. IaaS**

Answer: D

Explanation:

IaaS (Infrastructure as a Service) provides virtualized computing resources, such as storage and servers, necessary for hosting a development environment. According to CompTIA Project+, IaaS is ideal for environments requiring infrastructure control without hardware management.

NEW QUESTION # 257

Which of the following communication tools would a project manager use to broadcast information without being assured the information will be received?

- A. Videoconference
- **B. Email**
- C. Telephone
- D. Face-to-face

Answer: B

Explanation:

Email is a communication tool that allows the project manager to send information to one or more recipients without requiring immediate feedback or confirmation of receipt. Email can be used to broadcast information that is not urgent or critical, such as status updates, meeting minutes, or general announcements¹, p. 75

NEW QUESTION # 258

A project manager has been assigned to a new project. During the planning phase, the project manager needs to get an understanding of the purpose of the project. Which of the following should the project manager do?

- A. Review existing artifacts.
- B. Perform a gap analysis.
- C. Conduct a retrospective.
- D. Collate the lessons learned.

Answer: A

Explanation:

Explanation

The project manager should review existing artifacts to get an understanding of the purpose of the project.

Existing artifacts are documents or records that provide information about the project background, context, scope, objectives, requirements, stakeholders, and deliverables. They may include documents such as project proposal, project charter, business case, feasibility study, statement of work (SOW), or contract. Reviewing existing artifacts can help to clarify the project vision and expectations and provide a basis for planning and executing the project.

NEW QUESTION # 259

A client provides a project plan to the assigned project manager and suggests that the project manager and team just need to execute the plan. Upon further investigation, the document contains:

- * Purpose
- * Scope of work
- * Location of work
- * Period of performance
- * Deliverables schedule
- * Applicable standards
- * Acceptance criteria
- * Special requirements
- * Payment schedule

Which of the following documents did the client provide to the project manager?

- A. SLA
- B. RFP
- C. WBS
- D. SOW

Answer: D

Explanation:

Explanation

The client provided a statement of work (SOW) to the project manager and suggested that the project manager and team just need to execute the plan. A SOW is a document that defines the scope, deliverables, schedule, and terms and conditions of a project or contract. A SOW typically includes information such as purpose, scope of work, location of work, period of performance, deliverables schedule, applicable standards, acceptance criteria, special requirements, and payment schedule. A SOW can help to establish a common understanding and agreement between the client and the service provider on what needs to be done and how it will be done.
