you succeed. As long as you want to Pass 1Y0-205 Test, you must choose Prep4sures. We guarantee your success in the first attempt. If you fail, we will give you a FULL REFUND of your purchasing fee.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q40-Q45):

NEW QUESTION # 40

Scenario: A Citrix Administrator needs to configure StoreFront to allow external users access to internal resources. The external users will authenticate on StoreFront. Which StoreFront authentication method can the administrator configure?

- A. Pass-through from NetScaler Gateway
- B. Smart card
- C. Username and password
- D. HTTP Basic

Answer: A

Explanation:

For external access, authentication is typically performed at Citrix NetScaler (now Citrix ADC).

StoreFront must then be configured with the "Pass-through from NetScaler Gateway" authentication method, allowing StoreFront to accept and trust the authentication performed externally.

NEW QUESTION # 41

A Virtual Delivery Agent (VDA) is unable to register with the Delivery Controller. Which three factors could be causing this issue? (Choose three.)

- A. Time differences between VDA-enabled machines and the Domain Controller
- B. Improperly configured firewalls
- C. Citrix ICA service NOT running
- D. Incorrectly configured Citrix policy in Active Directory
- E. Incorrectly configured reverse DNS lookups in a forest

Answer: A,B,C

Explanation:

Improperly configured firewalls can block communication between the VDA and Delivery Controller.

Time differences greater than 5 minutes between the VDA and Domain Controller can prevent Kerberos authentication, leading to registration failure.

The Citrix ICA service (BrokerAgent) must be running for the VDA to register; if stopped, registration will fail.

NEW QUESTION # 42

Which two resource locations are supported for machines running the Virtual Delivery Agent (VDA) when using the Citrix Virtual Apps and Desktops service? (Choose two.)

- A. Amazon Web Services (AWS)
- B. Citrix Cloud
- C. On-premises datacenter
- D. VMware Workspace One

Answer: B,C

NEW QUESTION # 43

Which three database high availability features are supported for on-premises deployments of Citrix Virtual Apps and Desktops? (Choose three.)

- A. Mirroring
- B. Automatic Storage Management

- C. Always On Availability Groups
- D. Clustered Instances
- E. Flashback

Answer: A,C,D

Explanation:

Citrix Virtual Apps and Desktops supports Microsoft SQL Server high availability features such as Clustered Instances, Mirroring, and Always On Availability Groups for on-premises deployments.

These ensure database availability and resilience for the Site database.

NEW QUESTION # 44

Which two steps are correct when creating a master image prior to machine catalog creation?

(Choose two.)

- A. Create a master virtual machine and then install the operating system.
- B. Install and configure the Virtual Delivery Agent (VDA) software.
- C. Generalize the image using the Microsoft sysprep tool.
- D. Verify that the hard disk is attached at device location 1.

Answer: B,C

Explanation:

Before creating a machine catalog, the master image must be generalized with Sysprep to prepare it for cloning, and the Virtual Delivery Agent (VDA) software must be installed and configured so the machines can register with the Delivery Controllers.

NEW QUESTION # 45

.....

The price of Our 1Y0-205 practice guide is affordable, and you can always find that from time to time, we will give some promotion for our worthy customers.
