## C\_OCM\_2503復習問題集、C\_OCM\_2503出題範囲

学歴は実力と等しくなく、能力とも等しくありません。本当の能力は実践で鍛えたもので、学歴と直接な関係がないです。「私はだめです。」と思わないでください。SAPのC\_OCM\_2503試験に申し込んだあなたは自分が合格できないなんてを心配したら、CertShikenのSAPのC\_OCM\_2503試験トレーニング資料を利用してください。学歴がどんなに高くても、能力がどんなに低くても、首尾よく試験に合格することができます。

## SAP Certified Associate - Organizational Change Management 認定 C\_OCM\_2503 試験問題 (Q65-Q70):

### 質問 # 65

Which organizational change management activity is usually performed in which SAP Activate phase? Note: There are 2 correct answers to this question.

- **A. The user adoption analysis is usually conducted in the Run phase**
- **B. The change assessment is usually conducted in the Prepare phase**
- C. The change plan is usually developed in the Explore phase
- D. The business readiness assessment is usually conducted in the Discover phase

正解: A、B

解説:

SAP Activate phases align OCM activities with project stages. Option A is correct because user adoption analysis-measuring actual usage (e.g., system logins, feedback)-occurs in the Run phase post-go-live, assessing real outcomes vs. predictions. Option C is correct as the change assessment (evaluating readiness, culture, capabilities) happens in the Prepare phase to baseline the organization before detailed planning-e.g., interviewing leaders to gauge change appetite.

Option B is incorrect-the business readiness assessment (checking go-live preparedness) is in Deploy, not Discover, which focuses on solution exploration. Option D is incorrect; the change plan starts in Prepare (initial version), not Explore, where it's refined. SAP OCM ties activities to phase-specific goals.

"Change assessment occurs in Prepare to evaluate readiness, and user adoption analysis in Run to measure post-go-live success" (SAP Activate, OCM Phase Alignment).

### 質問 # 66

What are the key elements of a user adoption strategy for an SAP cloud implementation? Note: There are 2 correct answers to this question.

- A. Defined process for monitoring the selected user adoption indicators
- B. Agreed catalog of strategies to mitigate user adoption risks or issues
- C. Identified business stakeholders to be informed about the analysis results
- D. Agreed list of appropriate user adoption indicators before and after go-live

正解: A、D

解説:

A user adoption strategy in SAP OCM ensures sustained system use. Option B is correct because a defined monitoring process (e.g., monthly usage reports) tracks indicators like login frequency, ensuring adoption is measured systematically. Option C is correct as an agreed list of indicators (e.g., transaction completion rates pre-go-live, satisfaction scores post-go-live) provides clear metrics to assess success, set during planning (Prepare/Explore).

Option A is incorrect- "catalog of strategies" is vague; mitigation is part of broader OCM, not the adoption strategy's core. Option D is incorrect; identifying stakeholders for results is operational, not a key element of the strategy itself. SAP OCM focuses on measurable adoption drivers.

"A user adoption strategy includes a monitoring process and agreed indicators to track and ensure successful system uptake" (SAP Activate, User Adoption Strategy).

#### 質問 # 67

Why is it important to map the new SAP roles and responsibilities to the business users impacted by a cloud implementation?

- A. It contributes to reducing costs for both training activities and the IT infrastructure to be provided.
- B. It is the foundation for developing personas and defining stakeholder-specific communication activities.
- C. It ensures that users are granted access only to the data, transactions, and system functionalities essential for their job roles.
- D. It allows the change manager to collect important information for developing the new operating model.

正解: C

解説:

Mapping SAP roles and responsibilities to business users, typically done in the Realize phase, is a critical technical and security step in SAP cloud implementations. Option C is correct because it ensures users receive role-based access (e.g., via SAP's authorization profiles) limited to what their job requires-such as a sales rep accessing only sales transactions, not financial reporting. This prevents unauthorized access, enhances security, and aligns with SAP's best practices for system governance, reducing risks like data breaches or operational errors. For example, in S/4HANA Cloud, roles like "SAP\_BR\_SALES\_REP" are mapped to specific users to control functionality access, a process tied to security and compliance.

Option A is incorrect because role mapping is a technical task for system access, not a foundation for personas (fictional stakeholder profiles) or communication, which rely on broader stakeholder analysis.

Option B is incorrect-developing the operating model (organizational structure/processes) is a higher-level task informed by process design, not user role mapping, which is more granular. Option D is incorrect; while role mapping might indirectly optimize training scope or infrastructure use, cost reduction isn't its primary purpose-security and efficiency are. SAP OCM integrates this mapping with enablement but prioritizes its role in access control.

"Mapping SAP roles to business users ensures access is restricted to essential data and transactions, aligning with security standards and supporting efficient system use" (SAP Activate, Enablement and Security Integration).

#### 質問 # 68

In the SAP Activate Explore phase, the project team conducts fit-to-standard workshops to identify gaps between business requirements and the SAP best practice standard. Which change management challenge is typical for this phase?

- A. Some business users do not adopt the new cloud solution.
- B. Some managers show resistance towards the cloud standard.
- C. Some project team members have never heard of organizational change management.
- D. Some business departments do not feel well prepared for the go-live.

正解: B

解説:

During the Explore phase, fit-to-standard workshops focus on aligning business processes with SAP's best practices, often revealing changes to current ways of working. Option C is correct because managers may resist the cloud standard if it reduces customization or control, a common challenge in this phase. Option A is incorrect-lack of OCM awareness is more typical in the Discover or

Prepare phase. Option B is incorrect; user adoption issues emerge post-go-live (Run phase), not in Explore. Option D is also incorrect; go-live readiness concerns arise in the Deploy phase, not Explore.

Extract from SAP OCM Concepts: Resistance to standardization is a key challenge in the Explore phase, requiring targeted stakeholder engagement (SAP Activate, OCM Workstream).

#### 質問 # 69

Which follow-up activities derived from a detailed change impact analysis are usually taken over by change management?

- A. Design the future operating model for impacted business units and plan the implementation
- B. Define new roles and responsibilities and adapt organizational policies and procedures
- C. Identify resource constraints within impacted business units and develop mitigation activities
- **D. Develop personas for the communication of the change impact and create communication assets**

正解: D

解説:

A detailed change impact analysis (CIA), conducted in the SAP Activate Explore or Realize phase, identifies specific changes across processes, technology, organization, and people, leading to follow-up activities.

Option C is correct because change management typically takes over developing personas (e.g., "Finance Clerk Sarah") to tailor communication about impacts (e.g., how new processes affect her day) and creating assets (e.g., newsletters, videos) to convey these messages effectively. This aligns with SAP OCM's focus on translating CIA findings into stakeholder engagement strategies. For instance, if the CIA shows a process change in accounts payable, change management might craft a persona-based FAQ to address user concerns, ensuring adoption through relatable messaging.

Option A is incorrect-defining roles/responsibilities and adapting policies (e.g., job descriptions, compliance rules) is typically an HR or organizational design task, often led by business leaders or project management, not change management, which focuses on people readiness, not structural redesign. Option B is incorrect; identifying resource constraints (e.g., staff shortages) and mitigation (e.g., hiring plans) falls under project management or business unit leadership, as it's operational rather than OCM-specific. Option D is incorrect- designing the future operating model (e.g., org charts, workflows) and planning its rollout is a strategic task for business architects or consultants, not change management, which supports rather than owns this process.

SAP OCM positions change management as the driver of communication and enablement post-CIA, not structural or resource adjustments.

"Change management takes on follow-up activities from a detailed CIA, such as developing personas and communication assets, to ensure stakeholders understand and adopt identified changes" (SAP Activate Methodology, OCM Workstream, Post-CIA Responsibilities).

#### 質問 # 70

.....

あなたがより少ない時間と労力を置いてSAPのC\_OCM\_2503試験を準備するために我々CertShikenは多くの時間と労力を投資してあなたにソフトウェアを作成します。我々の全額で返金する承諾は話して行動しないわけではない、我々はいくつ自社製品に自信を持って、あなたに満足させる効果がないなら、我々は速やかに全額で返金します。しかし、我々はSAPのC\_OCM\_2503試験のソフトウェアは、あなたの期待に応えると信じて、私はあなたの成功を祈っています！
