Salesforce Health Cloud Accredited Professional Sample Questions (Q95-Q100):

NEW QUESTION # 95

A customer wants to view and navigate to critical insurance, clinical, and primary care physician information on a patient's profile. Which Health Cloud capability should a consultant implement?

- A. Enhanced Highlights Panel
- B. Patient Path
- C. Enhanced Timeline
- **D. Advanced Patient Card**

Answer: D

Explanation:

The Advanced Patient Card in Salesforce Health Cloud provides an organized and navigable view of critical patient information, such as insurance, clinical data, and details of the primary care physician. This feature allows healthcare providers to access key data quickly within a patient's profile.

Key Features of Advanced Patient Card:

- * Data Aggregation: Consolidates insurance, clinical, and provider information in a single, easy-to- navigate view.
- * Customizable Fields: Allows organizations to configure the card to display the most relevant information.
- * Improved User Experience: Designed to streamline the workflow of care providers by providing quick access to key data.

Why Other Options Are Incorrect:

- * Patient Path: Focuses on tracking patient milestones rather than critical information at a glance.
- * Enhanced Timeline: Provides a chronological view of patient interactions, not immediate profile data.
- * Enhanced Highlights Panel: Displays high-level patient data but lacks the depth and configurability of the Advanced Patient Card.

NEW QUESTION # 96

Prior to go-live for Bloomington Caregivers, a consultant loads the future system users into Salesforce.

Which two permission set licenses should the consultant assign to the users to give them access to Health Cloud?

Choose 2 answers

- A. Health Cloud Standard permission set license
- **B. Health Cloud Platform permission set license**
- **C. Health Cloud permission set license**
- D. Health Cloud Foundation permission set license

Answer: B,C

NEW QUESTION # 97

A developer needs to modify the out-of-the-box Advanced Patient Card to display the Category, SubjectID, and Date for active Clinical Alerts.

Which three steps should the developer take to accomplish this?

- **A. Create and activate a new child card.**
- **B. Change the child card state to show active.**
- C. Clone the parent card.
- **D. Create a DataRaptor to extract necessary data.**

- E. Define session variables to control visibility of clinical data.

Answer: A,B,D

Explanation:

To modify the out-of-the-box Advanced Patient Card to display the Category, SubjectID, and Date for active Clinical Alerts, a developer should take the following steps:

Create and activate a new child card: This step allows the developer to create a custom card that inherits the properties of the parent card and displays additional information from Clinical Alerts object⁴.

Create a DataRaptor to extract necessary data: This step allows the developer to create a DataRaptor Extract that queries the Clinical Alerts object and returns the Category, SubjectID, and Date fields for active records⁵.

Change the child card state to show active: This step allows the developer to change the state of the child card from inactive to active, so that it is visible on the Advanced Patient Card component⁶. Cloning the parent card, defining session variables, or creating an Integration Procedure are not required steps for this task.

NEW QUESTION # 98

Which three statements about the patient timeline view are true? (Choose three.)

- A. The patient timeline can be used in any Salesforce application.
- B. Events can be specified to appear when the Health Cloud home page first loads.
- C. Filters can be used to limit the number of records shown in the patient timeline.
- D. The patient timeline is a Health Cloud Empower component.
- E. The patient timeline supports standard and custom objects.

Answer: C,D,E

NEW QUESTION # 99

Bloomington Caregivers is implementing Home Health scheduling with Health Cloud. It must ensure that those who need to schedule the visits have the right permission set license.

Which permission set license should a consultant assign in this scenario?

- A. Field Dispatch Scheduler
- B. Execute Health Scheduling
- C. Manage Home Health
- D. Healthcare visit Manager

Answer: A

Explanation:

Implementing Home Health scheduling in Salesforce Health Cloud requires assigning appropriate permission set licenses to users responsible for scheduling patient visits.

Field Dispatch Scheduler Permission Set License:

The Field Dispatch Scheduler permission set license is designed for users who manage and schedule field service operations, including home health visits. Assigning this license grants schedulers access to functionalities necessary for coordinating and dispatching healthcare providers to patient locations. This includes capabilities such as:

* Scheduling Visits: Schedulers can create and manage appointments for initial assessments and recurring visits, ensuring that patients receive timely care.

Salesforce

* Resource Management: Effectively allocate healthcare providers based on availability, location, and required skills to meet patient needs.

* Access to Field Service Tools: Utilize tools within Salesforce to optimize routing, manage workloads, and monitor service delivery.

By assigning the Field Dispatch Scheduler permission set license, Bloomington Caregivers ensures that their scheduling personnel have the necessary access to efficiently coordinate home health services, thereby enhancing operational efficiency and patient satisfaction.
