The 24/7 support system has been made for you so you don't feel difficulty while using the product. In addition, we offer free demos and up to 1 year of free Microsoft Dumps updates. Buy It Now!

Target Audience and Prerequisites

One of the first things that you need to know about the Microsoft MB-500 exam is that it is designed for those developers who work with Operations & Finance apps within Microsoft Dynamics 365. There are quite a few skills that the candidates need to develop before attempting this test and some of them are as follows: implementing permission policies & security requirements; creating technical designs as well as implementation details; analyzing and manipulating data; monitoring performance; performing testing; customizing user interfaces; developing business login with the help of X++.

To be eligible for this certification exam, the students also need to have knowledge and experience with data structures & frameworks. In addition, they should be conversant with technologies, such as SQL Server Management Studio, LCS tools, Azure DevOps, and Visual Studio.

Certification Prospects

Apart from the Microsoft MB-500 test, the candidates should also take MB-300 for the Microsoft Certified: Dynamics 365: Finance and Operations Apps Developer Associate. If they want to get even further with learning more about Dynamics 365 features for Finance and Operations, applicants can also take MB-700 test for the Microsoft Certified: Dynamics 365: Finance and Operations Apps Solution Architect Expert.

To Pass MB-500 Exam, candidates must have experience developing solutions for Microsoft Dynamics 365 Finance and Operations. They should also have a good understanding of programming concepts and be familiar with Microsoft Visual Studio and Azure DevOps. Additionally, candidates should be able to write code, debug, and troubleshoot issues, as well as have a solid understanding of security and performance optimization. Upon passing the MB-500 exam, candidates will have the skills and knowledge required to design and develop modern, cloud-based applications that integrate with Microsoft Dynamics 365 Finance and Operations.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q247-Q252):

NEW QUESTION # 247

You need to add new fields to the standard form and organize the grid to meet the requirements.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

NEW QUESTION # 248

You are a Dynamics 365 Finance developer.

You have a table named FMVehicle that contains a field named VehicleId. The table has a clustered index named VehicleIdIdx on the VehicleId field. You declare a table buffer named vehicle to refer to the table.

You need to select all records from the FMVehicle table in ascending order based on VehicleId field in the vehicle variable.

Which embedded-SQL statement should you use?

- A. Option B
- B. Option D
- C. Option A
- D. Option C

Answer: C

NEW QUESTION # 249

A company is migrating from a legacy system to Dynamics 365 Unified Operations.

You need to import the customer data by using the Data Management workspace.

In which order should you perform the actions? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Step 1: Create a new import project.

Step 2: Specify the project category for the import.

Step 3: Specify the Source Data Format.

Step 4: Specify the target entity.

Step 5: Import the source file to the project.

The import process is done through the Import tile in the Data Management workspace.

Import a data package

* Log into the environment using a login with sufficient privileges (typically this is the Administrator role).

* On the dashboard, click the Data Management workspace.

* Click the Import tile.

* On the next page, do the following:

Provide a name.

In the Source Data Format field, select Package.

Click the Upload button and choose the appropriate package file from the location for the data being imported. This will import all the files from the package.

Click Save, and then click Import.

NEW QUESTION # 250

A company uses Dynamics 365 Finance.

You create the following tables.

You need to configure the system to meet the requirements.

Which delete actions should you use? To answer, drag the appropriate delete action types to the correct scenarios. Each delete

action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 251

A company has an extension that makes changes to a base form.

You need to identify all extension changes made to the base form.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Right-click the base form and select view references**
- B. In the search bar on the base form, enter the text e:.
- C. In the search bar on the form extension element, enter the text c:
- D. In search bar on the form extension element, enter the text e:**
- E. In the search bar on the base form, enter the text c:.

Answer: A,D

Explanation:

A: Customization and Extension

B: Example: Navigate to FMRental.Extension in the Tree Designer

1. In the Visual Studio, in Solution Explorer, in the FleetManagement Discounts project, expand User Interface > Form Extensions.

The FMRental.Extension element is an extension element that extends the functionality of the FMRental form by adding two new data sources and a new tab control.

2. In Solution Explorer, double-click FMRental.Extension to open the designer.

3. In the designer's search box, type 'e:' as shown in the image below. This filters the current designer to only show nodes that belong to the current extension.
