P.S. Free 2026 Salesforce JS-Dev-101 dumps are available on Google Drive shared by ExamCost: <https://drive.google.com/open?id=15Dnwu-CD6aX5uLWtBlf0IFewjEKfu2Su>

We provide you with high-quality JS-Dev-101 learning materials for you, since the experienced experts compile and verify JS-Dev-101 learning materials, therefore the quality and the correctness can be guaranteed. By using JS-Dev-101 exam dumps of us, you will get a certificate successfully, hence you can enter a good enterprise and your salary will also be improved. At the same time, if you choose JS-Dev-101 Learning Materials of us, we have complete online and offline service stuff and after-service, and you can consult us anytime.

Perhaps you agree that strength is very important, but there are doubts about whether our JS-Dev-101 study questions can really improve your strength. It does not matter, we can provide you with a free trial version of our JS-Dev-101 exam braindumps. You

can free download the demos of our JS-Dev-101 learning prep easily on our website, and there are three versions according to the three versions of our JS-Dev-101 practice engine. It is really as good as we say, you can experience it yourself.

New JS-Dev-101 Braindumps Sheet - JS-Dev-101 Reliable Test Testking

You can download and try out our Salesforce Certified JavaScript Developer - Multiple Choice exam torrent freely before you purchase our product. Our product provides the demo thus you can have a full understanding of our JS-Dev-101 prep torrent. Our study materials can boost your confidence for real exam, and will help you remember the exam questions and answers that you will take part in. You can decide which version is what you need actually and then buy the version of Salesforce Certified JavaScript Developer - Multiple Choice exam torrent you want.

Salesforce Certified JavaScript Developer - Multiple Choice Sample Questions (Q48-Q53):

NEW QUESTION # 48

A developer creates a new web server that uses Node.js. It imports a server library that uses events and callbacks for handling server functionality. The server library is imported with require and is made available to the code by a variable named server. The developer wants to log any issues that the server has while booting up.

Which code logs an error at boot time with an event?

- A. `server.catch((error) => { console.log('ERROR', error); });`
- B. `server.error((error) => { console.log('ERROR', error); });`
- C. `try { server.start(); } catch(error) { console.log('ERROR', error); }`
- **D. `server.on('error', (error) => { console.log('ERROR', error); });`**

Answer: D

Explanation:

Event-driven Node-style APIs expose events via `.on(eventName, handler)`.

To listen for error events:

```
server.on('error', (error) => {
  console.log('ERROR', error);
});
```

A and B assume methods `.error` or `.catch` that don't exist on typical event emitters.

C only catches synchronous errors from `server.start()`, not async event-based errors.

NEW QUESTION # 49

Refer to the code below:

```
01 function myFunction(reassign) {
02 let x = 1;
03 var y = 1;
04
05 if(reassign) {
06 let x = 2;
07 var y = 2;
```

```
08 console.log(x);
09 console.log(y);
10 }
11
12 console.log(x);
13 console.log(y);
14 }
```

What is displayed when myFunction(true) is called?

- A. 2 2 undefined undefined
- B. 2 2 1 1
- C. 2 2 2 2
- **D. 2 2 1 2**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract JavaScript knowledge:

This question tests understanding of let (block scope) and var (function scope) in JavaScript.

Initial declarations in the function:

```
let x = 1; // line 2
```

```
var y = 1; // line 3
```

Here:

x is declared with let, so it is block-scoped to the function body.

y is declared with var, so it is function-scoped to the entire function.

Inside the if (reassign) block (and since reassign is true, we enter it):

```
if (reassign) {
```

```
let x = 2; // line 6
```

```
var y = 2; // line 7
```

```
console.log(x); // line 8
```

```
console.log(y); // line 9
```

```
}
```

Detailed behavior:

let x = 2; on line 6 creates a new block-scoped variable x that exists only inside the if block. It does not change the outer x declared on line 2.

var y = 2; on line 7 declares y with var again, but var is function-scoped. This effectively reassigns the same y defined on line 3 for the entire function. After this line, y is 2 everywhere in the function.

Now, inside the if block:

console.log(x); (line 8) logs the inner block-scoped x, which is 2.

console.log(y); (line 9) logs y, which is the function-scoped y that was set to 2.

So the first two outputs are:

2

2

After the if block, execution continues:

```
console.log(x); // line 12
```

```
console.log(y); // line 13
```

Outside the if block:

The block-scoped let x = 2; no longer exists; it was only visible inside the if block.

The outer let x = 1; (line 2) is still in scope and has not been changed.

Thus:

console.log(x); (line 12) logs the outer x, which is still 1.

console.log(y); (line 13) logs y which, due to var y = 2; inside the if, is now 2 for the whole function.

Therefore, when myFunction(true) is called, the output in order is:

2 (inner x in if)

2 (function-scoped y after reassignment)

1 (outer x after if)

2 (function-scoped y remains 2)

This corresponds to:

JavaScript knowledge / study guide reference concepts:

let declarations and block scope

var declarations and function scope

Shadowing of variables with let inside a block
Re-declaration and reassignment of var within a function
Execution order of statements and console output

NEW QUESTION # 50

developer wants to use a module named universalContainersLib and then call functions from it.
How should a developer import every function from the module and then call the functions foo and bar ?

- A. `import * from '/path/universalContainerLib.js';universalContainersLib.foo();universalContainersLib.bar();`
- B. `import (foo, bar) from '/path/universalContainersLib.js';foo();bar();`
- C. `import all from '/path/universalContainerLib.js';universalContainersLib.foo();universalContainersLib.bar();`
- D. `import * as lib from '/path/universalContainersLib.js';lib.foo();lib.bar();`

Answer: D

NEW QUESTION # 51

Refer to the code below:

```
Let textValue = '1984';
```

Which code assignment shows a correct way to convert this string to an integer?

- A. `Let numberValue = Integer(textValue);`
- B. `Let numberValue = (Number)textValue;`
- C. `let numberValue = Number(textValue);`
- D. `Let numberValue = textValue.toInteger();`

Answer: C

NEW QUESTION # 52

Given the following code:

```
let x = null;
```

```
console.log(typeof x);
```

What is the output?

- A. "object"
- B. "x"
- C. "null"
- D. "undefined"

Answer: A

NEW QUESTION # 53

.....

Try our best to get the related JS-Dev-101 certification is the best way to show our professional ability, however, the exam is hard nut to crack and there are so many JS-Dev-101 preparation questions related to the exam, it seems impossible for us to systematize all of the key points needed for the exam by ourselves. We would like to help you out with the JS-Dev-101 Training Materials compiled by our company. There are so many strong points of our JS-Dev-101 training materials, you will be bound to pass the JS-Dev-101 exam with high scores.
