NEW QUESTION # 75

Which of the following became a foundation for privacy principles and practices of countries and organizations across the globe?

- A. The Personal Data Ordinance.
- B. The Code of Fair Information Practices.
- C. The EU Data Protection Directive.
- **D. The Organization for Economic Co-operation and Development (OECD) Privacy Principles.**

Answer: D

Explanation:

Reference:

The Organization for Economic Co-operation and Development (OECD) Privacy Principles became a foundation for privacy principles and practices of countries and organizations across the globe⁴. The OECD Privacy Principles were adopted by OECD member countries in 1980 as a set of eight basic principles for ensuring adequate protection of personal data across national borders⁴. The OECD Privacy Principles have been widely recognized as an international standard for data protection and have influenced many regional and national laws and frameworks⁴.

NEW QUESTION # 76

Which Privacy by Design principle requires architects and operators to emphasize the interests of the individual by offering measures such as strong privacy defaults, appropriate notice, and user-friendly options?

- A. Proactive not reactive.
- B. Data lifecycle protection.
- **C. Respect for user privacy.**
- D. Embedded into design.

Answer: C

Explanation:

The Privacy by Design principle that requires architects and operators to emphasize the interests of the individual by offering measures such as strong privacy defaults, appropriate notice, and user-friendly options is "Respect for user privacy." This principle ensures that user-centric privacy measures are embedded into the design and operation of systems.

NEW QUESTION # 77

A valid argument against data minimization is that it?

- A. Increases the chance that someone can be identified from data.
- B. Can have an adverse effect on data quality.
- C. Decreases the speed of data transfers.
- **D. Can limit business opportunities.**

Answer: D

Explanation:

A valid argument against data minimization is that it Can limit business opportunities. Data minimization is the principle that data collected should be limited to what is necessary for the purposes for which it is processed. While this principle supports privacy and data protection, it can also restrict the amount of data available to businesses for analysis and innovation, potentially limiting their ability to develop new products, improve services, or identify new market opportunities.

NEW QUESTION # 78

What is the main privacy threat posed by Radio Frequency Identification (RFID)?

- A. RFID can be utilized to read information from a device without the user's knowledge
- **B. RFID can be utilized to track people or consumer products**
- C. RFID can be utilized to gain unauthorized access to an individual's device
- D. RFID can be utilized to spoof identification details

Answer: B

Explanation:

The main privacy threat posed by Radio Frequency Identification (RFID) technology is its ability to track people or consumer products without their knowledge. RFID tags can be read from a distance without the individual's consent, potentially leading to unauthorized surveillance and tracking. This capability raises significant privacy concerns, especially in contexts where individuals are unaware that they are being monitored or that their movements and interactions with products are being recorded. NEW QUESTION # 79

SCENARIO

Please use the following to answer next question:

EnsureClaim is developing a mobile app platform for managing data used for assessing car accident insurance claims. Individuals use the app to take pictures at the crash site, eliminating the need for a built-in vehicle camera. EnsureClaim uses a third-party hosting provider to store data collected by the app. EnsureClaim customer service employees also receive and review app data before sharing with insurance claim adjusters.

The app collects the following information:

First and last name
Date of birth (DOB)
Mailing address
Email address
Car VIN number
Car model
License plate
Insurance card number
Photo
Vehicle diagnostics
Geolocation

The app is designed to collect and transmit geolocation data. How can data collection best be limited to the necessary minimum?

- A. Obtain consent and capture geolocation data at all times after consent is received.
- B. Allow user to opt-out geolocation data collection at any time.
- **C. Present a clear and explicit explanation about need for the geolocation data.**
- D. Allow access and sharing of geolocation data only after an accident occurs.

Answer: C

Explanation:

By providing users with a clear and explicit explanation about why geolocation data is needed and how it will be used, the app can help ensure that only the minimum amount of data necessary is collected. This can also help build trust with users and increase transparency.
