Associate-Google-Workspace-Administrator 최신 기출문제 인증 시험은 덤프로 고고싱

IT국제공인자격증 Google Associate-Google-Workspace-Administrator 시험대비덤프를 제공하는 전문적인 사이트로서 회원님의 개인정보를 철저히 보호해드리고 페이팔을 통한 결제라 안전한 결제를 진행할 수 있습니다. Google Associate-Google-Workspace-Administrator 덤프 외에 다른 인증 시험덤프에 관심이 있으신 분은 온라인 서비스를 클릭하여 문의해주세요.

최신 Google Cloud Certified Associate-Google-Workspace-Administrator 무료 샘플문제 (Q39-Q44):

질문 # 39

Your company's security team should be able to investigate unauthorized external file sharing. You need to ensure that the security team can use the security investigation tool and you must follow the principle of least privilege. What should you do?

- A. Share the Drive audit log with the security team.
- B. Grant the super admin role to a delegate from the security team.
- C. Create a custom admin role with security center privileges. Assign the role to the individual security team members.
- D. Create a pre-built reporting role. Assign the role to the security team alias.

정답: C

설명:

By creating a custom admin role with security center privileges, you can ensure that the security team has the necessary access to investigate unauthorized external file sharing while adhering to the principle of least privilege. This approach provides the security team with the specific permissions they need without granting unnecessary broader privileges, such as those associated with the super admin role.

질문 # 40

Your organization needs an approval application for purchases where a user can enter information on the purchase required and then submit it for management approval. You need to suggest a solution to create the application that must be available on both the web and mobile devices. Your organization does not have software developers or the budget to hire a third party. What should you do?

- A. Suggest that the organization use AppScript to create forms linked to a Google Sheet to store the purchase data.
- B. Suggest that the organization develop an application internally with a database, a backend service for data retrieval, and a frontend service for the application's user interface.
- **C. Suggest the organization use AppSheet to create the application.**
- D. Suggest that the organization continue to approve requests manually until budget is available to use a third-party application provider.

정답: C

설명:

AppSheet is a no-code platform that allows users to create custom applications without the need for software development skills. It is capable of building applications that can be used both on the web and mobile devices. AppSheet would allow the organization to create the approval application efficiently, meeting the requirements of the purchase process, and would be a cost-effective solution that does not require hiring developers or using a third-party application provider.

질문 # 41

Your company is undergoing a regulatory compliance audit. As part of the audit, you are required to demonstrate that you can preserve all electronic communications related to a specific project for a potential legal discovery process. You need to configure Google Vault to accomplish this goal. What should you do?

- A. Use the security investigation report to show Vault log events.
- B. Create a custom retention policy for the project data. Ensure that the policy covers the required retention period.
- **C. Create a matter and a hold on all project-related data sources such as Email, Chat, and Drive within Google Workspace.**
- D. Use the search and export functionality to identify all relevant communications within the project timeframe.

정답: C

설명:

Creating a matter and placing a hold on the relevant data sources ensures that all communications related to the specific project are preserved, even if users try to delete them. This will help in maintaining compliance with legal or regulatory requirements for e-discovery, and it ensures that data cannot be modified or deleted during the audit process.

질문 # 42

A user is experiencing intermittent issues accessing their Gmail inbox. Sometimes their Gmail loads slowly, and other times the user encounters error messages that haven't been documented. You need to effectively troubleshoot this recurring problem. What should you do?

- A. Instruct the user to try to access Gmail from another device or network to see if the issue persists.
- B. Instruct the user to clear their browser cache and cookies.
- **C. Instruct the user to generate a HAR file the next time they experience slowness or an error.**
- D. Check the Google Workspace Status Dashboard for any reported service disruptions.

정답: C

설명:

A HAR file (HTTP Archive) records detailed information about the user's network activity, including HTTP requests and responses. This file can help diagnose issues with Gmail loading slowly or errors occurring, especially when they are intermittent. By generating a HAR file, you can provide valuable data for troubleshooting the issue and pinpoint any underlying network or browser-related issues.

질문 # 43

An executive at your organization asked you to give their executive administrator access to their Workspace account. You need to ensure that this executive administrator can manage emails in the executive's account. You need to maintain security and privacy of the executive's account. What should you do?

- A. Assist the executive in setting up email forwarding to their executive administrator.
- **B. Grant delegated access to the executive's Gmail account, and assign access to their executive administrator in Gmail settings.**
- C. Create a Google Group, and add all executive administrators. Enable delegated access to the Group.
- D. Instruct the executive to share their password with their executive administrator.

정답: B

설명:

Granting delegated access allows the executive administrator to manage the executive's emails without requiring access to the executive's password. This solution ensures security and privacy by limiting the permissions to email management only, while keeping the executive's account secure. The executive administrator will be able to send, read, and delete emails on behalf of the executive, but they won't have access to other aspects of the account.
