

# Fire-Inspector-II Practice Engine & Fire-Inspector-II Vce Study Material & Fire-Inspector-II Online Test Engine

BONUS!!! Download part of TestValid Fire-Inspector-II dumps for free: [https://drive.google.com/open?id=10Gd2lkIJPxqQQiML-O54DUXdO5JKLA\\_](https://drive.google.com/open?id=10Gd2lkIJPxqQQiML-O54DUXdO5JKLA_)

As a prestigious platform offering practice material for all the IT candidates, TestValid experts try their best to research the best valid and useful International Code Council Fire-Inspector-II exam dumps to ensure you 100% pass. The contents of Fire-Inspector-II exam training material cover all the important points in the Fire-Inspector-II Actual Test, which can ensure the high hit rate. You can instantly download the International Code Council Fire-Inspector-II practice dumps and concentrate on your study immediately.

You can choose one of version of our Fire-Inspector-II study guide as you like. There are three versions of our Fire-Inspector-II exam dumps. All of the content are the absolute same, just in different ways to use. Therefore, you do not worry about that you get false information of Fire-Inspector-II Guide materials. According to personal preference and budget choice, choosing the right goods to join the shopping cart. Then you can pay for it and download it right away.

## Perfect International Code Council Test Fire-Inspector-II Question | Try Free Demo before Purchase

Our Fire-Inspector-II exam questions just focus on what is important and help you achieve your goal. When the reviewing process gets some tense, our Fire-Inspector-II practice materials will solve your problems with efficiency. With high-quality Fire-Inspector-II guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember. In your every stage of review, our Fire-Inspector-II practice prep will make you satisfied.

## International Code Council 67 - Fire Inspector II Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

Newly upholstered furniture may be required to resist ignition by cigarettes in common areas in which of the following nonsprinklered occupancies?

- A. Office spaces
- **B. Group I-2**
- C. Group A-1
- D. Libraries in Group E

**Answer: B**

Explanation:

In nonsprinklered occupancies, newly upholstered furniture in common areas must resist ignition by cigarettes primarily in Group I-2 occupancies (such as hospitals, nursing homes, and care facilities). This requirement reduces the risk of fire ignition in environments where occupants may have limited mobility and are unable to evacuate quickly.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 805.2 (Ignition Resistance of Upholstered Furniture and Mattresses) IFC 805.2 specifies that nonsprinklered Group I-2 occupancies must have upholstered furniture that resists ignition by cigarettes because these settings involve vulnerable populations who may need assistance in an emergency.
2. NFPA 101 - Life Safety Code (2021 Edition) - Section 10.3.2 (Fire-Retardant Upholstered Furniture) NFPA 101, Section 10.3.2 aligns with the IFC in requiring that furniture in health care facilities (Group I-2) must meet fire resistance standards to prevent ignition from cigarettes and other sources.

Detailed Explanation of Answer Choices:

Option A (Correct): Group I-2 (hospitals, nursing homes, and assisted living facilities) is required to have cigarette-ignition-resistant upholstered furniture in nonsprinklered common areas.

Option B (Incorrect): Group A-1 (theaters and performing arts venues) does not have this requirement, as seating arrangements are different and typically involve fire-resistant materials.

Option C (Incorrect): Office spaces (Business Occupancies, Group B) do not require ignition-resistant furniture under fire code regulations.

Option D (Incorrect): Libraries in Group E (Educational Occupancies) are not required to have this furniture unless otherwise specified by local codes.

Thus, the correct and verified answer is: A. Group I-2

#### **NEW QUESTION # 48**

What fire-resistance rating is required for interior nonbearing walls and partitions in Type IV construction?

- A. 2 hours
- **B. 0 hours**
- C. 1 hour
- D. 1-1/2 hours

**Answer: B**

Explanation:

Fire-Resistance Rating for Nonbearing Walls in Type IV Construction

Type IV (Heavy Timber) construction, as defined by the International Building Code (IBC) 2021, Section 602.4, consists of large, solid or laminated wood members.

Interior nonbearing walls and partitions in Type IV construction are not required to have a fire-resistance rating (0 hours) unless they separate different occupancies or are specifically mandated by another code provision.

2. Why Type IV Does Not Require a Rating for Nonbearing Walls

The heavy timber components inherently provide fire resistance due to their large cross-section, which chars on the surface and slows fire penetration.

IBC Table 601 confirms that interior nonbearing walls in Type IV construction do not have a required fire-resistance rating.

3. Verification of Other Options

Option B (1 hour) - Incorrect, as Type IV does not require a 1-hour rating for interior nonbearing walls unless specific conditions apply.

Option C (1-1/2 hours) - Incorrect, as there is no code requirement for this level of rating in Type IV nonbearing walls.

Option D (2 hours) - Incorrect, as Type IV walls are not rated unless separating occupancies.

Reference Sources:

International Building Code (IBC) 2021 - Section 602.4 (Type IV Construction Requirements) IBC Table 601 (Fire-Resistance Ratings for Building Elements) ICC Fire Inspector II Study Guide (2021)

**NEW QUESTION # 49**

The minimum fire-flow for a 3,700-sq. ft. two-family dwelling of Type VB construction with a sprinkler system is \_\_\_ GPM.

- A. 1,313
- B. 0
- C. 1,750
- **D. 1,000**

**Answer: D**

Explanation:

Fire flow for residential buildings is determined based on IFC Appendix B, Table B105.1(1) - Required Fire Flow for One- and Two-Family Dwellings, Group R-3, and R-4 Buildings.

For a 3,700 sq. ft. two-family dwelling of Type VB construction:

Per Table B105.1(1), the baseline fire flow is 1,750 gpm.

If an NFPA 13D-compliant automatic sprinkler system is installed, the fire flow is reduced by 50%.

$1,750 \text{ gpm} \times 0.50 = 875 \text{ gpm}$ , but the minimum allowed for a sprinklered dwelling is 1,000 gpm.

**NEW QUESTION # 50**

A code official may allow the occupant load of a building or room to exceed that specified in the building code if additional exit facilities are provided, all other egress requirements are met, and the maximum occupancy does not exceed one occupant per sq. ft. of occupiable floor area.

- A. 0
- B. 1
- C. 2
- **D. 3**

**Answer: D**

Explanation:

A code official may allow the occupant load to exceed the building code requirements if additional exit facilities are provided, all egress requirements are met, and the maximum occupancy does not exceed one occupant per 10 sq. ft. of occupiable floor area.

Reference to Fire Inspector Documentation:

1. 2021 International Building Code (IBC) - Table 1004.5 (Occupant Load Factor) The minimum safe occupancy load factor is 10 sq. ft. per occupant, meaning no space can have more than 1 person per 10 sq. ft.

Fire code officials can approve increased occupancy only if extra exits are provided, ensuring compliance with egress and fire safety rules.

2. 2021 International Fire Code (IFC) - Section 1004.2 (Increased Occupant Load Allowance) Allows for an increased occupant load only if additional exits and egress requirements are met but never beyond 1 person per 10 sq. ft.

Detailed Explanation of Answer Choices:

Option A (Incorrect): 1 occupant per 3 sq. ft. is too high and would violate egress safety regulations.

Option B (Incorrect): 1 occupant per 5 sq. ft. still exceeds safety limits.

Option C (Incorrect): 1 occupant per 7 sq. ft. is not the minimum required standard.

Option D (Correct): 1 occupant per 10 sq. ft. is the minimum limit for allowing an increased occupant load under IFC 1004.2 and IBC Table 1004.5.

Thus, the correct and verified answer is: D. 10.

**NEW QUESTION # 51**

The maximum quantity of liquefied petroleum gas (LP-gas) in containers stored by a dealer awaiting resale, and are at one location in a building that is not accessible to the public, is \_\_\_ lb. water capacity.

- A. 0
- B. 1,000
- **C. 2,000**
- D. 2,500

**Answer: C**

Explanation:

The storage of liquefied petroleum gas (LP-gas) in containers by dealers awaiting resale is regulated by the 2021 International Fire Code (IFC), Section 6109 - Storage of Portable LP-Gas Containers.

IFC 6109.11 - Storage Within Buildings Not Accessible to the Public:

"Storage of LP-gas containers in buildings that are not accessible to the public shall be limited to a maximum aggregate quantity of 2,000 pounds water capacity at one location." Why Other Options Are Incorrect?

A: 735 lb. - Too low; the maximum allowed is 2,000 lb.

B: 1,000 lb. - Incorrect; IFC allows up to 2,000 lb.

D: 2,500 lb. - Exceeds the 2,000 lb. maximum permitted storage quantity.

## NEW QUESTION # 52

.....

Our company is a professional certificate exam materials provider, and we have occupied in this field for years. Fire-Inspector-II exam dumps are high-quality, and we have received many good feedbacks from our customers. In addition, we offer you free demo for you to have a try before buying Fire-Inspector-II Exam Braindumps, and you will have a better understanding of what you are going to buy. We have online and offline chat service stuffs, who are quite familiar with the Fire-Inspector-II exam dumps, if you have any questions, just contact us.

**Simulations Fire-Inspector-II Pdf:** <https://www.testvalid.com/Fire-Inspector-II-exam-collection.html>

No only that you will pass your Fire-Inspector-II exam for sure, according you will get the certificate, but also you will get more chances to have better jobs and higher salaries, International Code Council Test Fire-Inspector-II Question I would be delighted if the could be so simple and easy to understand, International Code Council Test Fire-Inspector-II Question Online Test Engine can supports Windows / Mac / Android / iOS, etc.because it is the software based on WEB browser, Our expert staff is in charge of editing and answering all real questions so that Fire-Inspector-II test dumps are easy to understand and memorize.

This little triangular motif could be applied to other Simulations Fire-Inspector-II Pdf related material, such as envelopes, response cards, balloons, etc, Instructor resources include, No only that you will pass your Fire-Inspector-II Exam for sure, according you will get the certificate, but also you will get more chances to have better jobs and higher salaries.

## 67 - Fire Inspector II Exam valid training collection & Fire-Inspector-II study prep torrent & 67 - Fire Inspector II Exam exam practice pdf

I would be delighted if the could be so simple and easy to understand, Fire-Inspector-II Online Test Engine can supports Windows / Mac / Android / iOS, etc.because it is the software based on WEB browser.

Our expert staff is in charge of editing and answering all real questions so that Fire-Inspector-II test dumps are easy to understand and memorize, Yes, we have professional service staff working as a 24-7 on-line service.
