

AP-219합격보장 가능 시험대비자료 - AP-219시험패스 가능 덤프자료

Salesforce인증 AP-219시험은 IT인증시험중 가장 인기있는 시험입니다. Salesforce인증 AP-219시험패스는 모든 IT인사들의 로망입니다. ITDumpsKR의 완벽한 Salesforce인증 AP-219덤프로 시험준비하여 고득점으로 자격증을 따보세요.

최신 Salesforce Accredited Professional AP-219 무료샘플문제 (Q68-Q73):

질문 # 68

The Ensure Funds process works on which set of Order Items?

- A. Only the items passed into the Ensure Funds method
- B. All Items within a delivery group
- C. All Sales Order Items
- D. Only the items on the Fulfillment Order passed into the Ensure Funds method
- E. Only the items with a status of Waiting Payment

정답: A

설명:

The Ensure Funds process works on only the items passed into the Ensure Funds method. This method is a flow core action that verifies that there are enough funds available for each Order Item passed into it, and updates their payment status accordingly. The administrator can pass any Order Items into this method, regardless of their status or delivery group. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_om_actions_ensure_funds_async.htm&type=5

질문 # 69

What three steps are required when deploying changes via change sets?

- A. Upload the change set to the target org
- B. Create the change set in the sandbox org
- C. Deploy the change set in the target org
- D. Add the change set to the release schedule in the target org
- E. Approve the change set in the sandbox org

정답: A,B,C

설명:

Three steps that are required when deploying changes via change sets are:

Create the change set in the sandbox org. This is the first step where the administrator selects the metadata components that they want to deploy and adds them to a change set in the source org, which is usually a sandbox org.

Upload the change set to the target org. This is the second step where the administrator sends the change set from the source org to the destination org, which is usually a production org or another sandbox org. The administrator needs to have a deployment connection with the target org and permission to upload change sets.

Deploy the change set in the target org. This is the final step where the administrator validates and deploys the change set in the destination org. The administrator needs to have permission to deploy change sets and resolve any deployment errors or warnings.

질문 # 70

What are two reasons for using Flows instead of Apex code?

- A. Flows can be triggered by undelete events
- B. Flows have better performance options for large batches of records
- C. Flows provide a visual debug process
- D. Flows can be modified and created without a developer

정답: C,D

설명:

Two reasons for using Flows instead of Apex code are:

Flows can be modified and created without a developer. Flows are declarative tools that allow administrators to build complex business logic using clicks instead of code. Flows do not require any programming skills or knowledge, and they can be easily modified and maintained by administrators.

Flows provide a visual debug process. Flows have a built-in debugger that allows administrators to test and troubleshoot their flows in a graphical interface. The debugger shows the flow execution path, the values of variables and sObject fields, and any errors or warnings that occur in the flow.
