company resulted from their constant practice. After a long period of research and development, our 220-1202 test questions have been the leader study materials in the field. We have taken our customers' suggestions of the 220-1202 Exam Prep seriously, we have tried our best to perfect the 220-1202 reference guide from our company just in order to meet the need of these customers well. So stop hesitation and buy our 220-1202 study materials.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q188-Q193):

NEW QUESTION # 188

A technician is using a credential manager to safeguard a large number of credentials. Which of the following is important for using this application?

- A. Windows lock screen
- **B. Secure master password**
- C. Restricted log-in times
- D. TPM module

Answer: B

Explanation:

Credential managers or password vaults (e.g., Windows Credential Manager, KeePass, or LastPass) store passwords securely. The integrity of such tools heavily depends on the strength of the master password protecting the vault. If compromised, all saved credentials could be exposed. Therefore, setting a secure master password is crucial.

A). Login time restrictions are general user account settings, not specific to credential managers.

C). TPM is used more commonly for full disk encryption, not specifically required for password managers.

D). The lock screen protects general access but does not protect stored credentials alone.

Reference:

CompTIA A+ 220-1102 Objective 2.2: Compare and contrast authentication technologies and secure credential storage.

Study Guide Section: Password management and protection best practices

NEW QUESTION # 189

A technician wants to prevent electrical damage while disassembling a device. The technician turns off the device. Which of the following should the technician do next?

- A. Work on a plastic surface
- B. Place components in antistatic bags
- C. Place the computer on an antistatic mat
- **D. Connect a wrist strap to a metal frame**

Answer: D

NEW QUESTION # 190

A technician is deploying mobile devices and needs to prevent access to sensitive data if the devices are lost. Which of the following is the best way to prevent unauthorized access if the user is unaware that the phone is lost?

- **A. Encryption**
- B. Remote wipe
- C. Facial recognition
- D. Geofencing

Answer: A

Explanation:

Full-disk (or device) encryption ensures that, even if a lost mobile device is physically accessed by an unauthorized party, its stored data remains inaccessible without the correct decryption credentials. This protection is automatic and continuous, safeguarding data at rest regardless of whether the user realizes the device is missing or not. Remote wipe can remove data if triggered, but it requires the device to be online and the user (or admin) to initiate the wipe--whereas encryption is always in effect.

NEW QUESTION # 191

A user called the help desk to report an issue with the internet connection speed on a laptop. The technician thinks that background services may be using extra bandwidth. Which of the following tools should the technician use to investigate connections on the laptop?

- A. net user
- B. net use
- C. nslookup
- **D. netstat**

Answer: D

Explanation:

The netstat tool displays active network connections and listening ports, allowing the technician to identify background services and processes that may be using extra bandwidth on the laptop.

NEW QUESTION # 192

An employee accidentally installs software on a company PC. The software sends data to a remote server. Which of the following best describes the software?

- A. Cryptominer
- B. Trojan
- C. Ransomware
- **D. Spyware**

Answer: D

Explanation:

Spyware secretly collects user or system information and sends it to a remote server, matching the described behavior.

NEW QUESTION # 193

.....

Our 220-1202 practice prep boosts varied functions to be convenient for you to master the 220-1202 training materials and get a good preparation for the exam and they include the self-learning function, the self-assessment function, the function to stimulate the exam and the timing function.
