Premium Deep-Security-Professional Exam - Deep-Security-Professional Latest Exam Book

Pass4SureQuiz provides the three most convenient formats to prepare for Deep-Security-Professional exam dumps. It offers a desktop practice test, web based practice test and pdf file. Therefore, feel free to go through Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) exam dumps. Each of the three formats is downloaded to all android devices. Therefore, there's no reason to download an additional application to access web-based or desktop-based practice tests.

Trend Micro Certified Professional for Deep Security Sample Questions (Q54-Q59):

NEW QUESTION # 54

A Deep Security administrator wishes to monitor a Windows SQL Server database and be alerted of any critical events which may occur on that server. How can this be achieved using Deep Security?

- A. The administrator could install a Deep Security Agent on the server hosting the Windows Server 2016 database and enable the Log Inspection Protection Module. A rule can be assigned to monitor the Windows SQL Server for any critical events, with Alerts enabled.
- B. The administrator could install a Deep Security Agent on the server hosting the Windows Server 2016 database and enable the Integrity Monitoring Protection Module. A rule can be assigned to monitor the Windows SQL Server for any modifications to the server, with Alerts enabled.
- C. This can not be achieved using Deep Security. Instead, the administrator could set up log forwarding within Windows SQL Server 2016 and the administrator could monitor the logs within the syslog device.
- D. The administrator could install a Deep Security Agent on the server hosting the Windows Server 2016 database and enable the Intrusion Prevention Protection Module. A Recommendation Scan can be run and any suggested rule can be assigned to monitor the Windows SQL Server for any vulnerabilities, with Alerts enabled.

Answer: A

NEW QUESTION # 55

How is caching used by the Web Reputation Protection Module?

- A. Caching is used by the Web Reputation Protection Module to temporarily store the pages that make up the Web site. The Web site is cached in case the site is visited again for the life of the cache.
- B. Caching is used by the Web Reputation Protection Module to keep track of Web sites that are added to the Allowed list. Any sites added to the Allowed list will be accessible by protected servers regardless of their credibility score.
- C. Caching is used by the Web Reputation Protection Module to keep track of Allowed and Blocked Web sites. Any sites that are Allowed or Blocked do not require the retrieval of a credibility score from the Trend Micro Web Reputation Service.
- D. Caching is used by the Web Reputation Protection Module to temporarily store the credibility score for a Web site. The retrieved credibility score is cached in case the score for the Web site is required again for the life of the cache.

Answer: D

NEW QUESTION # 56

Multiple Application Control Events are being displayed in Deep Security after a series of application updates and the administrator would like to reset Application Control. How can this be done?

- A. Application Control can not be reset.
- B. Click "Clear All" on the Actions tab in the Deep Security Manager Web console to reset the list of Application Control events.
- C. Application Control can be reset by disabling the Protection Module, then enabling it once again. This will cause local rulesets to be rebuilt.
- D. On the Deep Security Agent computer, type the following command to reset Application Control:
dsa_control -r

Answer: C

Explanation:

* To reset Application Control in Trend Micro Deep Security, the recommended and official method is to disable the Application Control module and then enable it again for the agent or computer.

* This process removes the existing application inventory and local rulesets, effectively resetting Application Control. When re-enabled, the module will rebuild its inventory and local rules from scratch.

* The documentation clearly states:

"If you want to reset Application Control on a computer, disable Application Control for that computer.

When you re-enable Application Control, it removes the inventory and local rules, then rebuilds them from scratch. This is useful after major application upgrades or if the rules become too complex."

* dsa_control -r is not an official reset method for Application Control, nor is there a "Clear All" option specifically for this purpose. Option D is incorrect as reset is possible.

References:

Trend Micro Deep Security 20 LTS - Application Control Administration Guide Trend Micro Online Help: Reset Application Control

"To reset Application Control on an agent, disable and re-enable the Application Control module. This rebuilds the application inventory and resets local rulesets."

NEW QUESTION # 57

Which of the following are valid methods for forwarding Event information from Deep Security? Select all that apply.

- A. Amazon Simple Notification Service (SNS)
- B. Simple Network Management Protocol (SNMP)
- C. Deep Security Application Programming Interface (API)
- D. Security Information and Event Management (SIEM)

Answer: A,B,D

Explanation:

You can configure Deep Security Manager to instruct all managed computers to send logs to a SI-EM, Amazon Simple Notification Service or SNMP computers.

Explication: Study Guide - page (322)

NEW QUESTION # 58

Policies in Deep Security can include a Context value. Which of the following statements regarding Context is correct?

- A. The Context provides Deep Security Agents with location awareness and are associated with Log Inspection and Integrity Monitoring Rules.
- B. The Context provides Deep Security Agents with location awareness and are associated with Anti-Malware and Web Reputation Rules.
- C. The Context provides Deep Security Agents with location awareness and are associated with Web Reputation Rules only.
- D. The Context provides Deep Security Agents with location awareness and are associated with Firewall and Intrusion Prevention Rules.

Answer: D

Explanation:

Contexts are designed to be associated with Firewall and Intrusion Prevention Rules. If the conditions defined in the Context associated with a rule are met, the rule is applied. To link a security rule to a Context, go to the Options tab in the Properties window for the rule and select the Context from the menu.

Explication: Study Guide - page (165)

NEW QUESTION # 59

.....

You are desired to know where to get free and valid resource for the study of Deep-Security-Professional actual test. Deep-Security-Professional free demo can give you some help. You can free download the Deep-Security-Professional free pdf demo to have a try. The questions of the free demo are part of the Trend Deep-Security-Professional Complete Exam Dumps. You can have a preview of the Deep-Security-Professional practice pdf. If you think it is valid and useful, you can choose the complete one for further study. I think with the assist of Deep-Security-Professional updated dumps, you will succeed with ease.
