Slack-Admn-201 Test Fee & Slack-Admn-201 Practice Exam Questions

Are you still worried about not passing the Slack-Admn-201 exam? Do you want to give up because of difficulties and pressure when reviewing? You may have experienced a lot of difficulties in preparing for the exam, but fortunately, you saw this message today because our well-developed Slack-Admn-201 Exam Questions will help you tide over all the difficulties. As a multinational company, our Slack-Admn-201 training quiz serves candidates from all over the world.

Salesforce Certified Slack Administrator Sample Questions (Q11-Q16):

NEW QUESTION # 11

Paul leads an accounting team and is implementing a new expense reporting system.

He wants to update employees on the status of the system's rollout to different offices. He also wants to post links to help articles and online trainings that the team can use as resources. However, he wants to maintain control over the flow of information for these updates and would like to minimize off-topic discussion.

Which of the following would help him achieve his goal?

- A. Create a new public workspace called "Expenses" with access granted to all employees.
- B. Create a private channel called #expense-system-updates with all employees added.
- **C. Create a public announce-only channel for the expense system.**
- D. Create a new invite-only workspace called "Expenses."

Answer: C

Explanation:

Slack recommends:

"Use public announce-only channels for company-wide updates. Only designated members can post, while everyone else can view and react without disrupting the information flow." This keeps updates structured and prevents off-topic discussion, while maximizing visibility to the whole organization.

(Reference: Slack Administration Study Guide - Announce-Only Channel Best Practices)

-

NEW QUESTION # 12

You've just joined the Org Admin team at your organization.

You notice that the setting for "public file sharing" is toggled to "enabled" in your organization.

What ability does enabling "public file sharing" give members?

- **A. Members can share files externally by creating public URLs.**
- B. Members can share files with guests in Slack.
- C. Members can share files externally via Slack Connect channels.
- D. Members can share files in public channels within the Slack Enterprise Grid.

Answer: A

Explanation:

Slack's documentation on file sharing specifies:

"Enabling public file sharing allows members to create public links for files that can be shared externally outside of Slack." Public file sharing is about generating external public URLs (A), not internal sharing (B), sharing with guests (C), or Slack Connect-specific behavior (D).

(Reference: Slack Administration Study Guide - File Sharing and Public Link Management)

-

NEW QUESTION # 13

An IT administrator at Watch Corp is responsible for launching Slack to the company. The security team has outlined the importance of keeping all applications on all devices updated to the latest version.

How should the IT administrator roll out Slack?

- A. Propose that users only use Slack in a browser, so employees only have to worry about updating their browser.
- B. Install the Slack Desktop App to all of their employees' machines, disabling automatic updates.
- **C. Install the Slack Desktop App to all of their employees' machines, allowing automatic updates.**
- D. Send an announcement to the company, communicating the steps for how to download and update the Slack app, and outlining why it is important for the security team.

Answer: C

Explanation:

Slack's best practice for maintaining security is:

"Deploy the Slack desktop app to users and allow automatic updates to ensure that users are always running the latest, most secure version." Disabling updates (Option B) would increase security risks. Browser usage alone (Option A) is insufficient for a full Slack experience, and Option D relies too much on user compliance instead of ensuring deployment at scale.

(Reference: Slack Administration Study Guide - Deployment and Security Best Practices)

-

NEW QUESTION # 14

At which point in the process should you claim your relevant domains for your Enterprise Grid organization?

- A. Never. Slack will automatically claim the domains for you when you purchase Enterprise Grid.
- B. Before purchasing Enterprise Grid. It is important to claim domains while still on the free plan.
- C. Any time. Workspaces created prior to domain claiming will be shut down automatically.
- **D. As soon as possible. This feature is not retroactive, so workspaces created prior to claiming the domain will continue to exist as standalone workspaces.**

Answer: D

Explanation:

According to Slack's best practices:

"Claim your domains as soon as possible. This process is not retroactive - workspaces created before claiming domains will continue to exist independently unless manually migrated." Thus, prompt domain claiming ensures better control and prevents users from unintentionally creating ungoverned workspaces.

(Reference: Slack Administration Study Guide - Domain Management in Enterprise Grid)

-

NEW QUESTION # 15

You recently joined an organization that is on Slack's Enterprise Grid plan and because of your previous Slack Admin experience, you were added as a Grid Owner. You notice the organization is still managing provisioning manually, using a "just-in-time" process. At your last company, you saw the benefits of connecting identity provider (IdP) groups to Slack.

Which two aspects of IdP group mapping will benefit your current organization?

(Select the TWO best answers.)

- **A. It will enable automatic additions and removals of members in an IdP group to workspaces within your organization.**
- B. It will enable automatic approvals and authentications of integrations within your organization.
- **C. It will enable automatic additions of members in an IdP group to channels within your organization.**
- D. It will enable member provisioning as a required step for all Org Owners.
- E. It will enable automatic additions and removals of members in an IdP group to Slack Connect channels within your organization.

Answer: A,C

Explanation:

According to Slack's official documentation on IdP group management:

"Mapping IdP groups to Slack allows automatic provisioning and deprovisioning of users to workspaces and user groups. Members added to an IdP group are automatically added to associated Slack user groups and workspaces." This dramatically reduces manual effort and ensures correct workspace and channel access is kept current.

Slack Connect (C) is external collaboration and not managed directly via IdP groups. D and E are unrelated to IdP functionality.

(Reference: Slack Administration Study Guide - Identity Provider Group Mapping)
