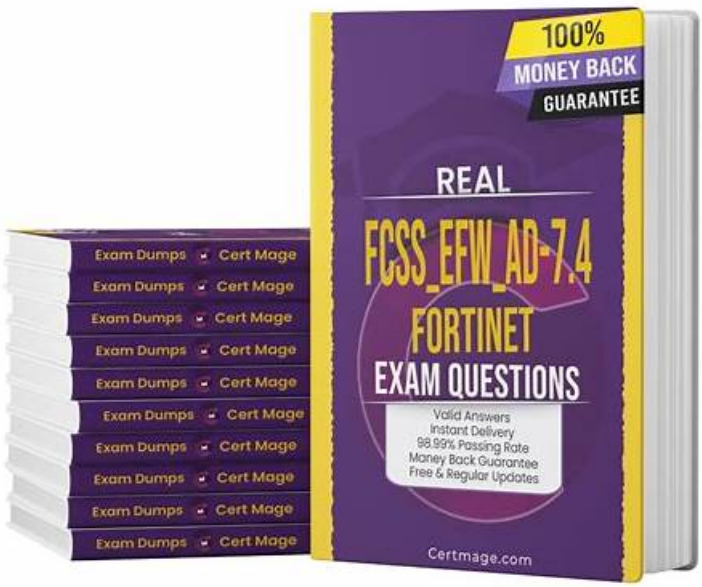
FCSS_EFW_AD-7.4 Vce Files & FCSS_EFW_AD-7.4 Top Exam Dumps



P.S. Free & New FCSS_EFW_AD-7.4 dumps are available on Google Drive shared by Fast2test: https://drive.google.com/open?id=1OyuV_ZxQUFQy1iyQe29Eqkt2pwSfMbtC

In this cut-throat competitive world of Fortinet, the Fortinet FCSS_EFW_AD-7.4 certification is the most desired one. But what creates an obstacle in the way of the aspirants of the FCSS - Enterprise Firewall 7.4 Administrator (FCSS_EFW_AD-7.4) certificate is their failure to find up-to-date, unique, and reliable FCSS - Enterprise Firewall 7.4 Administrator (FCSS_EFW_AD-7.4) practice material to succeed in passing the Fortinet FCSS_EFW_AD-7.4 certification exam.

Fortinet FCSS_EFW_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• VPN: This section of the exam measures the skills of Network Security Engineers and covers the implementation of secure communication tunnels for enterprise environments. Candidates will learn to configure IPsec VPN with IKE version 2 to establish encrypted connections. The section also includes the implementation of ADVPN to enable on-demand VPN tunnels between different sites, ensuring secure and dynamic connectivity.
Topic 2	• Security Profiles: This section of the exam measures the skills of Network Security Engineers and focuses on managing security inspection profiles, including SSL and SSH inspections. Candidates will learn to apply a combination of web filtering, application control, and Internet Service Database (ISDB) to enhance network security. The section also covers integrating Intrusion Prevention Systems (IPS) to monitor and mitigate threats within enterprise networks.
Topic 3	• Routing: This section of the exam measures the skills of Security Administrators and covers the implementation of advanced routing protocols to manage enterprise traffic effectively. Candidates will gain expertise in configuring Open Shortest Path First (OSPF) for dynamic routing and Border Gateway Protocol (BGP) to facilitate communication between different networks, ensuring efficient traffic flow across enterprise environments.

Topic 4	• System Configuration: This section of the exam measures the skills of Network Security Engineers and covers the implementation of the Fortinet Security Fabric, ensuring seamless integration across security solutions. It also includes configuring hardware acceleration on FortiGate devices to optimize performance. Candidates will learn to set up different operation modes for high-availability clusters and implement enterprise networks using VLANs and VDOMs. Additionally, it covers various use case scenarios that demonstrate how Fortinet solutions contribute to secure network environments.
Topic 5	• Central Management: This section of the exam measures the skills of Security Administrators and focuses on implementing central management for Fortinet security solutions. It includes configuring and managing devices centrally to streamline network security operations. Candidates will understand how to maintain consistency in security policies and automate deployments for efficient management of large-scale enterprise environments.

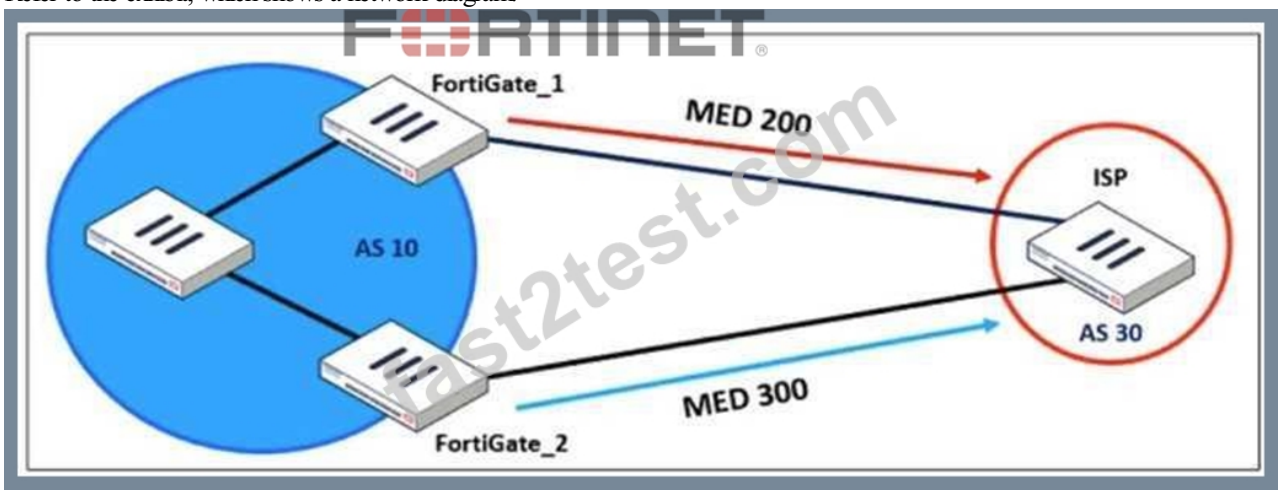
Best Fortinet FCSS_EFW_AD-7.4 Dumps [2026] With Real Exam Questions

In order to gain more competitive advantages when you are going for a job interview, more and more people have been longing to get a FCSS_EFW_AD-7.4 certification. They think the certification is the embodiment of their ability; they are already convinced that getting a FCSS_EFW_AD-7.4 certification can help them look for a better job. There is no doubt that it is very difficult for most people to pass the exam and have the certification easily. If you are also weighted with the trouble about a FCSS_EFW_AD-7.4 Certification, we are willing to soothe your trouble and comfort you.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q60-Q65):

NEW QUESTION # 60
Refer to the exhibit, which shows a network diagram.



An administrator would like to modify the MED value advertised from FortiGate_1 to a BGP neighbor in the autonomous system 30.
What must the administrator configure on FortiGate_1 to implement this?

- A. distribute-list-out
- B. prefix-list-out
- C. route-map-out
- D. network-import-check

Answer: C

Explanation:
The Multi-Exit Discriminator (MED) is a BGP attribute used to influence the preferred path for incoming traffic from an external autonomous system (AS). The diagram shows that FortiGate_1 advertises MED 200, while FortiGate_2 advertises MED 300,

meaning the ISP will prefer the route through FortiGate_1 because a lower MED is preferred in BGP.
To modify the MED value on FortiGate_1 for routes advertised to AS 30, the administrator must configure a route-map-out. A route map can match specific routes and set the MED value before sending them to the BGP neighbor.

NEW QUESTION # 61
Refer to the exhibit, which shows a FortiGate configuration.

```
config system fortiguard
    set protocol udp
    set port 8888
    set load-balance-servers 1
    set auto-join-forticloud enable
    set update-server-location any
    set sandbox-region ''
    set fortiguard-anycast disable
    set antispam-force-off disable
    set antispam-cache enable
    set antispam-cache-ttl 1800
    set antispam-cache-mpercent 2
    set antispam-timeout 7
    set webfilter-force-off enable
    set webfilter-cache enable
    set webfilter-cache-ttl 3600
    set webfilter-timeout 15
    set sdns-server-ip "208.91.112.220"
    set sdns-server-port 53
    unset sdns-options
    set source-ip 0.0.0.0
    set source-ip6 ::
    set proxy-server-ip 0.0.0.0
    set proxy-server-port 0
    set proxy-username ''
    set ddns-server-ip 0.0.0.0
    set ddns-server-port 443
end
```

fastrtest.com

An administrator is troubleshooting a web filter issue on FortiGate. The administrator has configured a web filter profile and applied it to a policy; however, the web filter is not inspecting any traffic that is passing through the policy.
What must the administrator change to fix the issue?

- A. The administrator must enable fortiguard-anycast.
- B. The administrator must change protocol to TCP.
- C. The administrator must disable webfilter-force-off.
- D. The administrator must increase webfilter-timeout.

Answer: C

NEW QUESTION # 62
A vulnerability scan report has revealed that a user has generated traffic to the website example.com (10.10.10.10) using a weak SSL/TLS version supported by the HTTPS web server.
What can the firewall administrator do to block all outdated SSL/TLS versions on any HTTPS web server to prevent possible attacks on user traffic?

- A. Configure the unsupported SSL version and set the minimum allowed SSL version in the HTTPS settings of the SSL/SSH inspection profile.
- B. Install the required certificate in the client's browser or use Active Directory policies to block specific websites as defined in the SSL/SSH inspection profile.
- C. Use the latest certificate, Fortinet_SSL_ECDSA256, and replace the CA certificate in the SSL/SSH inspection profile.
- D. Enable auto-detection of outdated SSL/TLS versions in the SSL/SSH inspection profile to block vulnerable websites.

Answer: A

Explanation:
The best way to block outdated SSL/TLS versions is to configure the SSL/SSH inspection profile to enforce a minimum SSL/TLS

version and disable weak SSL versions. By setting the minimum allowed SSL version in the HTTPS settings of the SSL/SSH inspection profile, FortiGate will:
Block any connection using outdated SSL/TLS versions (such as SSLv3, TLS 1.0, or TLS 1.1).
Enforce secure communication using only strong SSL/TLS versions (such as TLS 1.2 or TLS
1.3). Protect users from man-in-the-middle (MITM) and downgrade attacks that exploit weak encryption.

NEW QUESTION # 63
The logs in a FSSO collector agent (CA) are showing the following error:
failed to connect to registry: PIKA1026 (192.168.12.232)
What can be the reason for this error?

- A. The FortiGate cannot resolve the name of the workstation.
- B. The remote registry service is not running in the workstation 192.168.12.232.
- C. The CA cannot resolve the name of the workstation.
- D. The CA cannot reach the FortiGate with the IP address 192.168.12.232.

Answer: B

NEW QUESTION # 64
What events are recorded in the crashlogs of a ForitGate device? (Choose two.)

- A. System entering to and leaving from the proxy conserve mode.
- B. Changes in the status of any of the FortiGuard licenses.
- C. Configuration changes.
- D. A process crash.

Answer: A,D

NEW QUESTION # 65
.....

Printing these FCSS_EFW_AD-7.4 valid questions and reading them in a handy paper format is another feature offered by Fast2test Fortinet FCSS_EFW_AD-7.4 PDF for test applicants who prefer more conventional reading experience. These incredible features of Fortinet FCSS_EFW_AD-7.4 PDF Questions help applicants practice for the FCSS_EFW_AD-7.4 exam wherever and whenever they want, according to their timetables.
