## Process-Automation Reliable Exam Camp - Process-Automation Exam Reviews

Our Process-Automation study materials are the accumulation of professional knowledge worthy practicing and remembering. There are so many specialists who join together and contribute to the success of our Process-Automation guide quiz just for your needs. As well as responsible and patient staff who has being trained strictly before get down to business and interact with customers on our Process-Automation Exam Questions. You can contact with our service, and they will give you the most professional guide.

To prepare for the Salesforce Process-Automation Accredited Professional Certification Exam, candidates can take online courses, attend workshops, and study the official Salesforce Process-Automation documentation. There are also practice exams available to help candidates gauge their readiness for the actual exam. It is important for candidates to have a strong understanding of the platform and be able to apply that knowledge to real-world scenarios.

To pass the Salesforce Process-Automation Exam, candidates must demonstrate their understanding of the core concepts of process automation, including workflow rules, approval processes, process builder, flow, and triggers. They must be able to apply these concepts to design and implement solutions that automate business processes, such as lead assignment, opportunity management, case routing, and contract renewal. Additionally, candidates must be able to troubleshoot and optimize process automation solutions to ensure their effectiveness and efficiency. By earning this certification, professionals can differentiate themselves in the job market and demonstrate their commitment to continuous learning and professional development.

### Salesforce Process Automation Accredited Professional Sample Questions (Q159-Q164):

#### NEW QUESTION # 159

How can a consultant use process automation tools to set up Salesforce Flow for Service?

- A. Use Flow Builder to add processes to the Actions and Recommendations component.
- B. Add the Actions and Recommendations component to a process.
- C. Use Process Builder to create flows and quick actions.
- **D. Use Flow Builder to create flows, and specify them in an Actions and Recommendations deployment or in a process.**

**Answer: D**

#### NEW QUESTION # 160

For which use case is it appropriate to combine a process and a flow?

- A. Post to external (Community) Chatter group.
- **B. Clone a record and its children.**
- C. Delete a related record.
- D. Post to an internal Chatter group.

**Answer: B**

Explanation:

Combining a process and a flow is appropriate for use cases such as B) Cloning a record and its children. A process can initiate the flow when certain criteria are met, and the flow can then perform complex operations like cloning a record along with its related records. This combination leverages the simplicity of Process Builder for triggering and the power of Flow for complex data manipulations. Reference: Salesforce Help Documentation on Process Builder and Flow.

#### NEW QUESTION # 161

Which three conditions need to be met in order for an Administrator to delete a flow version installed from a package without uninstalling the package?

- A. The flow version has no scheduled actions that are currently live or running.
- **B. The flow version doesn't have any associated paused flow interviews.**
- **C. The flow version isn't the latest version of the flow installed in the org.**
- D. The flow version is deprecated in the org.
- **E. The flow version is inactive.**

**Answer: B,C,E**

**NEW QUESTION # 162**

An Administrator must create a step-by-step guide to walk users through the product catalog. Which automation tool should the Administrator use?

- A. Apex Trigger
- B. Process Builder
- **C. Flow Builder**
- D. Approvals

**Answer: C**

Explanation:

Flow Builder, specifically Screen Flows, is ideal for building guided, step-by-step user experiences. Admins can use screens, choice inputs, navigation buttons, and conditional logic to create an interactive product catalog walkthrough.

A). Correct - Flow Builder's Screen Flows are designed for guided UI processes.

Incorrect Options:

B). Process Builder does not support UI interaction.

C). Apex Triggers are code-based and not used for UI walkthroughs.

D). Approvals are used for record sign-off, not guided processes.

Reference Extracts from Salesforce Process Automation Study Guide:

"Use Screen Flows to guide users through complex business processes with input forms, navigation, and branching logic."

"Ideal for data collection, wizards, or step-by-step processes."

**NEW QUESTION # 163**

Universal Containers requested a custom field to be created on an Account and to display the number of open Cases related to this Account. How could the Administrator meet this requirement?

- **A. Use a Flow to populate the custom field value.**
- B. Use Process Builder to populate the custom field value.
- C. Create a roll-up summary field.
- D. Use scheduled Apex to populate the custom field value.

**Answer: A**

Explanation:

Roll-up summary fields only work for master-detail relationships. Since the standard relationship between Account and Case is lookup (not master-detail), a roll-up summary field cannot be used directly. Instead, the correct solution is to use Flow to count the number of open related cases and update the custom field on the Account.

C). Correct - A scheduled or record-triggered Flow can count related Cases and update the custom field accordingly.

Incorrect Options:

A). Not supported because Account # Case is not master-detail.

B). Process Builder does not support looping or counting related records.

D). Scheduled Apex would work but is not declarative and requires code.

Reference Extracts from Salesforce Process Automation Study Guide:

"Use Flow to roll up data in lookup relationships by counting or summarizing related child records."

"Roll-up summary fields are only available for master-detail relationships."

**NEW QUESTION # 164**

.....

Improve your professional ability with our Process-Automation certification. Getting qualified by the Salesforce certification will position you for better job opportunities and higher salary. Now, let's start your preparation with Process-Automation training material.
