Test VMware 2V0-11.25 Topics Pdf, 2V0-11.25 New Study Materials

There are lots of benefits of obtaining a certificate, it can help you enter a better company, have a high position in the company, improve you wages etc. Our 2V0-11.25 test materials will help you get the certificate successfully. We have channel to obtain the latest information about the exam, and we ensure you that you can get the latest information about the 2V0-11.25 Exam Dumps timely. Furthermore, you can get the downloading link and password for 2V0-11.25 test materials within ten minutes after purchasing.

We offer money back guarantee if anyone fails but that doesn't happen if one uses our 2V0-11.25 dumps. These 2V0-11.25 exam dumps are authentic and help you in achieving success. Do not lose hope and only focus on your goal if you are using CertkingdomPDF 2V0-11.25 PDF. It is a package of 2V0-11.25 braindumps that is prepared by the proficient experts. These 2V0-11.25 Exam Questions dumps are of high quality and are designed for the convenience of the candidates. These are based on the 2V0-11.25 Exam content that covers the entire syllabus. The 2V0-11.25 practice test content is very easy and simple to understand.

2V0-11.25 New Study Materials, 2V0-11.25 Reliable Exam Braindumps

Business Applications 2V0-11.25 braindumps as your 2V0-11.25 exam prep material, we guarantee your success in the first attempt. If you do not pass the VMware Cloud Foundation 5.2 Administrator 2V0-11.25 certification exam on your first attempt we will give you a full refound of your purchasing fee. If you purchase VCP-VCF Administrator: Business Applications 2V0-11.25 Braindumps, you can enjoy the upgrade the exam question material service for free in one year.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q136-Q141):

NEW QUESTION # 136
An organization is planning to manage a diverse set of databases across multiple VMware Cloud Foundation (VCF) environments using Data Services Manager.
Which three capabilities of Data Services Manager would help the organization managing these databases efficiently? (Choose three.)

- A. Automated database migration between on-premises and cloud environments
- B. Policy-based backup and recovery for databases
- C. Automated database provisioning and deployment
- D. Centralized monitoring and alerting for all managed databases
- E. Integration with vSAN for optimized storage management

Answer: B,C,D

Explanation:
Centralized monitoring and alerting gives visibility into performance and health across all databases.
Policy-based backup and recovery ensures consistent protection and recovery SLAs for each database.
Automated provisioning and deployment accelerates rollout of new database instances with standardized configurations.

NEW QUESTION # 137
An administrator is enabling VMware's Virtual Machine Encryption for an existing VMware Cloud Foundation (VCF) Workload Domain in order to meet their organization's compliance regulations.
Which three steps should the administrator take to complete this task? (Choose three.)

- A. Configure a Key Management Server (KMS) and add it to the vCenter.
- B. Enable the encryption feature on the ESXi hosts.
- C. Enable SSH on the ESXi hosts to manage encryption keys.
- D. Apply the encryption policy to the ESXi hosts.
- E. Apply the encryption policy to the existing VMs.
- F. Create an encryption policy in vCenter.

Answer: A,E,F

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
To enable Virtual Machine Encryption in a VMware Cloud Foundation environment, the official process consists of these steps:
Configure a Key Management Server (KMS) and add it to the vCenter (A): A supported Key Management Server must be configured and registered with vCenter to provide encryption keys.
Create an encryption policy in vCenter (C): An encryption storage policy is created, specifying encryption as a rule. This policy will be used to control which VMs are encrypted.
Apply the encryption policy to the existing VMs (E): Once the encryption policy is created, it must be assigned to the virtual machines intended for encryption. This will trigger the encryption process for those VMs.
Other actions such as enabling SSH on ESXi hosts, applying the encryption policy to ESXi hosts, or enabling encryption on hosts directly are not required steps as per VMware's documented workflow for enabling VM encryption.

NEW QUESTION # 138
How do virtual machine (VM) storage policies in a VMware vSphere environment contribute to optimizing resource utilization, ensuring data availability, and meeting application-specific requirements?

- A. By defining and enforcing storage requirements, such as performance, availability, and redundancy
- B. By regulating and optimizing storage traffic between virtual machines
- C. By streamlining the process of automating virtual machine backups
- D. By guaranteeing storage IOPs for a particular virtual machine

Answer: A

Explanation:
VM storage policies let you specify requirements like performance tiers, redundancy levels, and availability SLA, and vSphere enforces these rules against underlying storage capability profiles to optimize resource usage and meet application needs.

NEW QUESTION # 139
An administrator needs to secure an ESXi host in their environment by enabling lockdown mode.
What two steps should be taken to secure the ESXi host using lockdown mode? (Choose two.)

- A. Enable "Strict Lockdown Mode" to restrict all direct access to the host.
- B. Navigate to the host's settings in the vSphere Client.
- C. Add the host to a dedicated security group in Active Directory.
- D. Reboot the host to apply the lockdown settings.
- E. Disable SSH and the ESXi Shell.

Answer: A,B

Explanation:
To enable lockdown mode, you first need to navigate to the ESXi host's settings in the vSphere Client, where you can configure security settings such as lockdown mode.
Enabling "Strict Lockdown Mode" restricts all direct access to the ESXi host, ensuring that only authorized users can manage the host through vCenter and preventing direct login via the ESXi console or SSH.

NEW QUESTION # 140
What is the recommended method for managing IP address allocation for VMware ESXi hosts in a VMware Cloud Foundation environment?

- A. Static IP addresses assigned manually
- B. Dynamic IP addresses assigned via DHCP and without any reservations
- C. Static IP address assigned using VMware NSX IP Pools
- D. Dynamic IP addresses assigned via DHCP with reservations

Answer: C

Explanation:
In a VMware Cloud Foundation environment, it is recommended to use static IP addresses that are managed via VMware NSX IP Pools. This method ensures consistency, scalability, and centralized management of IP addresses, which is essential for large environments. NSX IP Pools allow for efficient IP address allocation and management.

NEW QUESTION # 141
......

A second format is a 2V0-11.25 web-based practice exam that can take for self-assessment. However, it differs from desktop-based 2V0-11.25 practice exam software as it can be taken via any browser, including Chrome, Firefox, Safari, and Opera. This VMware 2V0-11.25 web-based practice exam does not require any other plugins. You can take this 2V0-11.25 self-assessment test on Windows, iOS, Linux, Mac, and Android. It also includes all of the functionalities of desktop 2V0-11.25 software and will assist you in passing the 2V0-11.25 certification test.
