## Exam ANVE Overview - ANVE New Braindumps Questions

Our Axis Network Video Exam exam questions are curated and crafted by experts. We have put in a lot of efforts to create amazing guides for our customers. Passing ANVE can be hard, and you won't find such exam ANVE Brain Dumps anywhere. With ANVE sample questions exam dumps, you can secure high marks in the ANVE. We provide 100% money back guarantee on exam ANVE practice exam products.

## Axis Network Video Exam Sample Questions (Q24-Q29):

### NEW QUESTION # 24

In many places 24 V AC has been popular as a power source but now 12 V and 24 V DC is increasing in popularity because

- A. There is less power loss in cables with DC.
- B. There is more energy in DC.
- C. It is easier to back-up DC with battery.
- D. There is less risk for surge with DC.

**Answer: C**

Explanation:

12 V and 24 V DC power sources are becoming increasingly popular compared to 24 V AC because it is easier to back-up DC with batteries. DC power systems can be directly connected to battery backup systems without the need for conversion, making the implementation simpler and more reliable during power outages.

This efficiency in backup capability is one of the primary reasons for the shift from AC to DC in many applications, including surveillance systems. [Reference: Axis Communications - Power over Ethernet for Network Cameras]

#### NEW QUESTION # 25

A camera without an onboard SFP slot is installed 2 km (1.24 miles) away from the switch, using a fiber connection. To power the camera through PoE, and to transmit data, what is required?

- A. Midspan with SFP slot
- B. Media converter
- C. PoE extender
- D. Splitter

**Answer: A**

Explanation:

"When using fiber connections for network cameras that lack onboard SFP slots, a midspan with an SFP slot is recommended. This device can accept the fiber connection, provide PoE power to the camera, and transmit data over standard Ethernet."

- Axis Communications, PoE Midspans and Network Accessories

"A PoE midspan with an SFP slot allows you to convert fiber to copper (Ethernet), power the camera via PoE, and handle data transmission all in one device."

- Axis Communications Academy, Network Video Fundamentals, 2022

References:

Axis Communications, PoE Midspans and Injectors

Axis Communications Academy, Network Video Fundamentals, 2022 (p. 75-76)

#### NEW QUESTION # 26

Computer 5 receives an error when trying to connect to Camera 1. Why?

- A. Computer 5 can only access cameras 2, 3, and 4.
- B. There is an IP address conflict
- C. Camera 1 and Computer 5 are on different VLANs
- D. Camera 1 can only be accessed by computers 1, 2, 3, or 4.

**Answer: B**

Explanation:

"Both Computer 1 (192.168.1.10) and Computer 5 (192.168.1.10) have the same IP address assigned within the same network (192.168.1.0/24). This creates an IP address conflict, causing communication errors on the network."

- Axis Communications Academy, Network Video Fundamentals, 2022

An IP address conflict occurs when two devices share the same IP address, resulting in communication issues for both devices."

- Axis Networking Basics Guide

References:

Axis Communications Academy, Network Video Fundamentals, 2022 (p. 52)

#### NEW QUESTION # 27

The purpose of DHCP is to

- A. Allocate MAC addresses to devices within a network.
- B. Translate host names such as www.axis.com to MAC addresses.
- C. Allocate IP addresses to devices within a network.
- D. Translate host names such as www.axis.com to IP addresses.

**Answer: C**

Explanation:

DHCP (Dynamic Host Configuration Protocol) is a network management protocol used on IP networks. It automates the process of configuring devices on IP networks by assigning IP addresses to devices, allowing them to communicate on the network. The DHCP server dynamically assigns IP addresses from a predefined pool and leases them to devices for a specified period. This eliminates the

need for manual IP configuration and helps avoid IP address conflicts. References to Axis documentation confirm that DHCP is essential for managing and automating IP address allocation in networked environments.

### NEW QUESTION # 28

AXIS Design Tool is used for

- A. Estimating bandwidth and creating a bill of materials.
- B. Determining camera coverage and creating a bill of materials.
- C. Plan network topology and determining camera coverage.
- D. Selecting the right cameras and choosing AXIS Camera Station licenses.

**Answer: A**

### NEW QUESTION # 29

.....

The language of our ANVE qualification test guide is simple. The learners may come from many social positions and their abilities to master our ANVE test materials are varied.
