Don't worry, you will find it easy to adjust to this new thing and get complete support from the Pass4training who offer BCI CBCI Exam Questions and practice exams for the BCI CBCI certification exam.

## BCI Certificate of the Business Continuity Institute (CBCI) Sample Questions (Q39-Q44):

### NEW QUESTION # 39

A shared understanding across the organization of the importance and relevance of the Business Continuity Management System (BCMS) and an understanding of how the BCMS will be used are outcomes of:

- A. Providing access to a risk assessment
- B. Appointing a Business Continuity steering group
- C. Defining the scope of the BCMS
- D. An effectively communicated Business Continuity policy**

### Answer: D

Explanation:

An effectively communicated Business Continuity policy sets the tone for organizational commitment and clarifies the purpose, scope, and relevance of the BCMS. The CBCI 7.0 course stresses that clear communication of the policy ensures all personnel understand the BCMS's importance and how it will be applied, fostering engagement and shared responsibility. While defining scope and appointing steering groups are critical, they do not on their own generate organization-wide understanding. The policy acts as the foundational document promoting awareness and alignment.

Reference: CBCI 7.0 Study Guide, Module 1: Establishing the BCMS, pages 15-18.

### NEW QUESTION # 40

During a discussion-based exercise, the exercise facilitator is notified of a threat that could compromise participant safety. The facilitator's next step will be:

- A. Call a short break to allow time to determine how to proceed
- B. Continue with the exercise unless otherwise notified
- C. Begin gathering more details about the situation
- D. Use a pre-determined code word to notify all participants of suspension of the exercise**

### Answer: D

Explanation:

Participant safety is paramount during all exercises. The CBCI 7.0 course mandates that facilitators use pre-determined code words

or signals to immediately and discreetly communicate the suspension of an exercise if a real threat to safety emerges. This protocol ensures that all participants receive a clear, consistent message to halt activities without causing panic or confusion. Gathering more details or calling a break delays decisive action and risks exposure. Continuing the exercise despite threats is unacceptable and breaches duty of care.

Pre-established emergency communication protocols allow swift, safe responses that prioritize participant well-being above all else. Reference: CBCI 7.0 Study Guide, Module 6: Exercising and Validation, pages 122-124.

#### NEW QUESTION # 41

After all Business Impact Analyses (BIAs) have been completed, a consolidated analysis is carried out and a report is written to document the results. What is the purpose of this?

- A. For submission to top management for final approval
- B. For review by all BIA participants
- C. For planning an exercise
- D. For internal audit

#### Answer: A

Explanation:

The CBCI 7.0 course highlights that the consolidated BIA report, combining all individual BIAs, serves as a key governance document submitted to top management for review and approval. This final approval confirms that management understands the criticality of prioritized activities, recovery objectives, and resource requirements. It enables informed decision-making regarding resource allocation, strategy development, and risk treatment. While BIA participants, auditors, and exercise planners use the report, top management's endorsement is critical for organizational commitment and effective BCMS progression.

Reference: CBCI 7.0 Study Guide, Module 3: Business Impact Analysis and Reporting, pages 50-54.

#### NEW QUESTION # 42

The process that ensures that an organization's Business Continuity arrangements are up to date and ready to respond to incidents and their impacts despite changes to its structure or changes in its operational context is:

- A. Internal audit
- B. Maintenance
- C. Review
- D. Gap analysis

#### Answer: B

Explanation:

Maintenance refers to the ongoing process of keeping Business Continuity arrangements current and effective in light of organizational or contextual changes. The CBCI 7.0 course clarifies that maintenance involves regular reviews, updates, testing, and adjustments to plans and processes, ensuring readiness and relevance.

While review and audit are important, maintenance is the active continuous process that adapts the BCMS to evolving needs.

Reference: CBCI 7.0 Study Guide, Module 6: Maintenance and Continual Improvement, pages 140-143.

#### NEW QUESTION # 43

The Recovery Time Objective (RTO), competency of team members, and complexity of the processes to be recovered are factors that will play a role in determining the level of detail contained in:

- A. Operational plans
- B. Crisis communication plans
- C. Strategic plans
- D. Emergency response plans

#### Answer: A

Explanation:

Operational plans require detailed instructions tailored to the recovery needs of specific activities. The CBCI 7.0 course explains that factors such as the RTO, the skills of recovery teams, and process complexity influence the granularity of

these plans. Shorter RTOs or complex processes demand more detailed operational plans to guide recovery actions precisely and minimize delays. Strategic plans set high-level direction and are less detailed; crisis communication and emergency response plans focus on information and immediate safety rather than detailed recovery steps.

Reference: CBCI 7.0 Study Guide, Module 5: Plans and Procedures, pages 85-88.

## NEW QUESTION # 44

The prominent benefits of BCI CBCI certification exam are more career opportunities, updated skills and knowledge, recognition of expertise, and instant rise in salary and promotion in new job roles. To do this you just need to pass the BCI CBCI Exam. However, to get success in the CBCI exam is not an easy task, it is a challenging CBCI exam.
