Plat-Admn-301 Dumps Deutsch - Plat-Admn-301 Trainingsunterlagen

Wollen Sie den Plan machen, dass Sie Salesforce Plat-Admn-301 Zertifizierungsprüfung ablegen, um Ihre Fähigkeit zu entwickeln. Wenn Sie Salesforce Plat-Admn-301 Prüfung ablegen, ob Sie die geeigneten Lernhilfe finden? Und welche Unterlage sind wertvoll?

Haben Sie Salesforce Plat-Admn-301 Dumps gewählt? Wenn ja, sorgen Sie sich bitte nicht um den Misserfolg.

Salesforce Certified Platform Administrator II Plat-Admn-301 Prüfungsfragen mit Lösungen (Q210-Q215):

210. Frage

At Cloud Kicks, the Sales team uses a specific dashboard to see how they are doing daily. The team has asked the administrator for an easier way to see this dashboard.

What should the administrator recommend?

- A. Create a custom app with a dashboard.
- **B. Add the dashboard to the Sales team's home page.**
- C. Update the Sales team's app with a new dashboard.
- D. Email the dashboard to the Sales Team every morning.

Antwort: B

Begründung:

A dashboard is a visual display of key metrics and trends for records in your org. Dashboards allow users to quickly monitor performance and identify trends or issues at a glance. To make it easier for users to see a dashboard they use frequently, administrators can add it to their home page using Lightning App Builder. This way, users can see their dashboard every time they log in or go to their home tab without having to navigate elsewhere. References: https://help.salesforce.com/s/articleView?id=sf.dashboards_overview.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.dashboards_add_to_home_page.htm&type=5

211. Frage

A user accidentally created a duplicate opportunity and is unable to delete the duplicate record.

What should an administrator do to troubleshoot this issue?

- A. Advise the user to mark the duplicate opportunity Closed Lost and keep it in the system.
- B. Change the user's profile to System Administrator so they have full permissions to delete object records.
- **C. Check the user profile permissions on the Opportunity object to see if they have permission to delete.**
- D. Run a report of all opportunities to identify other possible duplicates.

Antwort: C

Begründung:

The user profile permissions on the Opportunity object is the item that the administrator should review to find out why the user is unable to delete the duplicate record. The user profile permissions determine what users can do with records and objects in Salesforce, such as creating, editing, deleting, viewing, or sharing. In this case, the administrator should check if the user has the Delete permission on the Opportunity object, which allows them to delete opportunity records that they own or have access to. If not, the administrator can either grant them this permission or delete the record for them. References: https://help.salesforce.com/s/articleView?id=sf.admin_general_permissions.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.admin_object_permissions.htm&type=5

212. Frage

Universal Containers wants to assign a task due date on one of two fields. Estimated Shipping Date or Client Need By Date, which is further in the future.

Which two combined automation tools should the administrator use to create the task record and assign based on date criteria?

Choose 2 answers

- **A. Create a formula capture the MAX date.**
- B. Configure a workflow to create the task.
- **C. Make a Process Builder to create the task.**
- D. Design an approval process to capture the furthest date.

Antwort: A,C

Begründung:

Two combined automation tools that the administrator can use to create the task record and assign based on date criteria are:

* Create a formula field to capture the MAX date. A formula field is a custom field that calculates a value based on other fields or expressions. In this case, a formula field can be used to capture the maximum value between Estimated Shipping Date and Client Need By Date fields and store it as a date value.

* Make a Process Builder to create the task. A Process Builder is an automation tool that allows you to create processes that perform actions based on certain criteria. In this case, a Process Builder can be used to create a task record when a certain condition is met and assign its due date based on the formula field value.

The other two options are incorrect because:

* An approval process is an automation tool that allows you to route records for approval based on certain criteria and approval steps. It does not create or assign tasks based on date criteria.

* A workflow rule is an automation tool that allows you to perform actions based on certain criteria and evaluation time. It does not create or assign tasks based on date criteria.

213. Frage

Cloud Kicks has updated several profiles and created a new app in the sandbox. After testing, everything is working as expected. Which two options should the administrator use to migrate these changes to production from the sandbox?

Choose 2 answers

- A. Inbound Change Set
- B. Outbound Change Set
- C. Package deployment
- D. Change Data Capture

Antwort: A,B

Begründung:

Change sets are tools that allow administrators to move customizations such as fields, page layouts, profiles, permission sets, etc. from one Salesforce org to another. To use change sets, administrators need to establish a deployment connection between a source org (such as a sandbox) and a target org (such as production). Then, administrators can create an outbound change set in the source org that contains the components they want to deploy, and upload it to the target org. In the target org, administrators can view and validate the inbound change set before deploying it to their org. References: <https://help.salesforce.com/s/articleView?id=sf.changesets.htm&type=5>

214. Frage

An administrator at AW Computing noticed that a custom field on the Contact object was changed from text to text area. What tool should the administrator use to investigate this change?

- A. Developer Console
- B. Field History Tracking
- C. View Setup Audit Trail
- D. Debug Log

Antwort: C

Begründung:

The View Setup Audit Trail page lets you view the 20 most recent setup changes made to your org. You can also download a file of the last six months of setup changes. References: https://help.salesforce.com/s/articleView?id=sf.monitoring_setup_audit_trail.htm&type=5

215. Frage

.....

Es gibt zwei Dumps-Versionen bei ZertFragen, nämlich PDF-Version und Software-Version. Damit können Sie selbst wählen. Sie können irgendwann und irgendwo lernen, indem sie die exam Fragen und Testantworten von PDF-Version drucken. Die Software-Version simuliert die aktuelle Prüfung, damit können Sie sich die Plat-Admn-301 Prüfungsatmosphäre fühlen. Wenn sie die
