descriptions using the EEM Python Module.

Drag and drop the steps the engineer must take from the left into the correct order on the right.

Answer:

Explanation:

□ Explanation

□ conf t

Event manager applet link monitor

Event syslog pattern "IF_UP"

Action 1 cli command "source cdp_description.py"

Exit

NEW QUESTION # 71

When a switch boots it does not find its startup-config file. Drag and drop the steps that Power-On Auto Provisioning goes through to configure the switch for remote management from the left into the correct order on the right. Not all options are used.

Answer:

Explanation:

□ Explanation:

Step 1 : The switch searches for a Domain Host Configuration Protocol service on the network Step 2 : DHCP assigns the switch an IP Address, default gateway, and IP address that are tracked by the Domain Name System server.

Step 3 : POAP gets the IP address of a script server, downloads the correct script for the switch, and runs the script on the switch.
