Microsoft Azure Administrator Sample Questions (Q424-Q429):

NEW QUESTION # 424

Hotspot Question

You have an Azure subscription that contains the virtual machines shown in the following table:

Name	Operating system	Connects to
VM1	Windows Server 2019	Subnet1
VM2	Windows Server 2019	Subnet2

VM1 and VM2 use public IP addresses. From Windows Server 2019 on VM1 and VM2, you allow inbound Remote Desktop connections.

Subnet1 and Subnet2 are in a virtual network named VNET1.

The subscription contains two network security groups (NSGs) named NSG1 and NSG2. NSG1 uses only the default rules.

NSG2 uses the default rules and the following custom incoming rule:

- Priority: 100
- Name: Rule1
- Port: 3389
- Protocol: TCP
- Source: Any
- Destination: Any
- Action: Allow

NSG1 is associated to Subnet1. NSG2 is associated to the network interface of VM2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: No

NSG1 has default rules, which denies any port open for inbound rules

Box 2: Yes

NSG2 has custom Rule1, allowing RDP port 3389 with TCP.

Box 3: Yes

VM1 and VM2 are in the same Vnet. By default, communication is allowed.

NEW QUESTION # 425

You have an Azure Active Directory (Azure AD) tenant named contosocloud.onmicrosoft.com

Your company has a public DNS zone for contoso.com

You add contoso.com as a custom domain name to Azure AD.

You need to ensure that Azure can verify the domain name.

Which type of DNS record should you create?

- A. TXT
- B. PTR
- C. NSEC
- D. DNSKEY

Answer: A

Explanation:

Explanation

TXT : Correct Choice

You need to go to your hosting domain registrar and add in a TXT record.

NSEC3 : Incorrect Choice

This is Part of DNSSEC. This is used for explicit denial-of-existence of a DNS record. It is used to prove a name does not exist.

RRSIG : Incorrect Choice

This contains a cryptographic signature.

DNSKEY : Incorrect Choice

This will verify that the records are originating from an authorized sender.

NEW QUESTION # 426

You have an Azure subscription.

You deploy a virtual machine scale set that is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 427

You need to configure the Device settings to meet the technical requirements and the user requirements.

Which two settings should you modify? To answer, select the appropriate settings in the answer area.

Answer:

Explanation:

NEW QUESTION # 428

VM1 is running and connects to NIC1 and Disk1. NIC1 connects to VNET1.

RG2 contains a public IP address named IP2 that is in the East US location. IP2 is not assigned to a virtual machine.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.
