## New C\_ACDET\_2506 Test Testking | C\_ACDET\_2506 Test Centres

We have handled professional C\_ACDET\_2506 practice materials for over ten years. Our experts have many years' experience in this particular line of business, together with meticulous and professional attitude towards jobs. Their abilities are unquestionable, besides, C\_ACDET\_2506 practice materials are priced reasonably with three kinds. We also have free demo offering the latest catalogue and brief contents for your information, if you do not have thorough understanding of our materials. Many exam candidates build long-term relation with our company on the basis of our high quality C\_ACDET\_2506 practice materials.

## SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q31-Q36):

### NEW QUESTION # 31

During verification in Production, a stakeholder reports that the imported form template appears outdated. What could be a likely reason for this?

- A. The Test site template was not the latest version when exported.
- B. The Production site is missing certain parameter settings.
- C. The system automatically reverted the template to a previous version during import.
- D. The Production site does not support custom form templates.

**Answer: A**

Explanation:

If an imported form template appears outdated in Production, the most common cause is that the version exported from Test was not the latest published version. SAP Ariba's export/import process is version- specific; only the selected version at export time is moved. If the latest updates weren't published or exported, Production will receive an older version.

SAP does not auto-revert templates to previous versions during import, and missing parameter settings typically do not affect template versions. Production supports custom templates as long as metadata and versions align.

Proper version control, including publishing the latest template version in Test before export, is essential to avoid this issue.

### NEW QUESTION # 32

Which of the following classes are NOT frequently customized in SAP Ariba Strategic Sourcing solutions?

- A. AbstractDocument
- B. ContractWorkspace
- C. ExtendedAddressRep
- D. SourcingProject

**Answer: C**

### NEW QUESTION # 33

You have a custom string field with a list of values. The values are represented as an Enumeration.

Which of the following applies to this scenario?

- A. The user can filter the values using the search box in the chooser
- B. In the enumeration file, the Value column must only contain whole numbers
- C. The display order of the values is alphabetical
- D. The display order in the drop down matches the order defined in the enumeration file

**Answer: A,D**

### NEW QUESTION # 34

How do you format the Help Tip for a field?

- A. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can add standard HTML tags for formatting
- B. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can format the text by selecting the string and using regular keyboard controls such as Ctrl-I, Ctrl-B.
- C. Select Field Configuration and edit the field. In the Help Tip, you can format the text by using the mouse to highlight the text and then right-clicking to access formatting options.
- D. Select Field Configuration and edit the field. In the Help Tip, you can only use plain text without any formatting options.

**Answer: A**

Explanation:

SAP Ariba supports basic HTML formatting tags in the Help Tip textfield, such as <b>, <i>, and <u>, which allow formatting like bold, italics, and underline within the help tips. This provides flexibility in presenting clear, well-structured guidance to end users.

Options B and C suggesting mouse-based formatting or keyboard shortcuts are not supported because the Help Tip editor is a plain text input that parses HTML but does not offer a rich-text UI. Option D is incorrect because HTML tags are explicitly allowed for

formatting.

This method enhances user experience by allowing visually distinct emphasis and line breaks in Help Tips, improving clarity without complicating the UI.

#### NEW QUESTION # 35

A standard field is not available in reporting A Greenfield customer needs to be able to report on the data that will be captured in that standard field. How can this be achieved?

- A. The system makes all fields reportable after a system refresh.
- **B. Create a custom field that can be marked Reportable, default the custom field to the standard field value, publish, and then pull the field into reporting**
- C. Under Field Configurations,, search for the field in the appropriate class, mark the field Reportable, Save and Publish.
- D. All standard fields are reportable by default.

**Answer: B**

#### NEW QUESTION # 36

.....
