After your understanding of our reliability, I believe you will quickly add GetValidTest's products to your cart. GetValidTest will achieve your dream.

Salesforce Certified Platform Data Architect Sample Questions (Q94-Q99):

NEW QUESTION # 94

Northern Trail Outfitters is planning to build a consent form to record customer authorization for marketing purposes. What should a data architect recommend to fulfill this requirement?

- A. Create a custom object to maintain the authorization.
- **B. Utilize the Authorization Form Consent object to capture the consent.**
- C. Use custom fields to capture the authorization details.
- D. Use AppExchange solution to address the requirement.

Answer: B

Explanation:

The Authorization Form Consent object is a standard object that allows you to capture customer consent for marketing purposes. It has fields such as Consent Captured Date, Consent Captured Source, Consent Description, and Consent Status. You can use this object to create consent forms and track customer responses. This is the best option to fulfill the requirement, as it does not require any custom development or external solution.

NEW QUESTION # 95

Universal Containers has successfully migrated 50 million records into five different objects multiple times in a full copy sandbox. The Integration Engineer wants to re-run the test again a month before it goes live into Production. What is the recommended approach to re-run the test?

- **A. Refresh the full copy sandbox and re-run the data migration test.**
- B. Truncate all 5 objects quickly and re-run the data migration test.
- C. Truncate all 5 objects and hard delete before running the migration test.
- D. Hard delete all 5 objects' data and re-run the data migration test.

Answer: A

Explanation:

The recommended approach to re-run the test is to refresh the full copy sandbox and re-run the data migration test. A full copy sandbox is a replica of the production Org, including all data, metadata, and attachments. Refreshing a full copy sandbox means creating a new copy of the production Org and replacing the existing sandbox. This would ensure that the test is run on a clean and up-to-date environment, without any leftover data or configuration from previous tests.

Truncating or hard deleting objects would not be sufficient, because they would not remove all the data or metadata from the sandbox, and they could also affect other dependent objects or processes.

NEW QUESTION # 96

Universal Containers has provided a web order form for its customer and has noticed invalid data coming in on orders. What should be used to mitigate this problem?

- A. Formatted Fields
- B. Apex Trigger
- **C. Validation Rules**
- D. Work Flow Rules

Answer: C

Explanation:

Using validation rules to mitigate this problem is the best option. Validation rules can help you prevent invalid data from being entered in your web order form. You can use validation rules to check for data quality, format, range, or consistency. For example, you can use validation rules to ensure that the order quantity is positive, the product code is valid, or the shipping address is complete.

NEW QUESTION # 97

Which strategy reduces data skew risk?

- A. Increase validation rules
- B. Assign all records to one user
- **C. Use multiple record owners**
- D. Use fewer objects

Answer: C

Explanation:

Distributing ownership prevents skew.

NEW QUESTION # 98

Universal Containers (UC) has implemented Sales Cloud and it has been noticed that Sales reps are not entering enough data to run insightful reports and dashboards. UC executives would like to monitor and measure data quality metrics. What solution addresses this requirement?

- A. Use custom objects and fields to calculate data quality.
- B. Export the data to an enterprise data warehouse and use BI tools for data quality.
- C. Generate reports to view the quality of sample data.
- **D. Use third-party AppExchange tools to monitor and measure data quality.**

Answer: D

Explanation:

Using third-party AppExchange tools to monitor and measure data quality can address the requirement of UC executives by providing features such as data cleansing, deduplication, validation, enrichment, and scoring. These tools can help improve the accuracy, completeness, and consistency of the data entered by sales reps .

NEW QUESTION # 99

.....

We often ask, what is the purpose of learning? Why should we study? Why did you study for Plat-Arch-201 exam so long? As many people think that, even if one day we forget the formula for the area of a triangle, we can still live very well, but if it were not for the knowledge of learning Plat-Arch-201 Exam and try to obtain certification, how can we have the opportunity to good to future life?
