Exam 2V0-17.25 Outline - Latest Real 2V0-17.25 Exam

P.S. Free 2026 VMware 2V0-17.25 dumps are available on Google Drive shared by Free4Dump: https://drive.google.com/open?id=1ZIM5BE3i7p8CmV2Gypu9WTZTOArELdAK

In addition to our 2V0-17.25 exam questions, we also offer a VMware Practice Test engine. This engine contains real 2V0-17.25 practice questions designed to help you get familiar with the actual VMware Cloud Foundation 9.0 Administrator (2V0-17.25) pattern. Our VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam practice test engine will help you gauge your progress, identify areas of weakness, and master the material.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 2	• IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.

Topic 3	• VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 4	• Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.

100% Pass Quiz 2V0-17.25 - VMware Cloud Foundation 9.0 Administrator Pass-Sure Exam Outline

As a professional multinational company, we fully take into account the needs of each user when developing products. For example, in order to make every customer can purchase at ease, our 2V0-17.25 study materials will provide users with three different versions for free trial, corresponding to the three official versions. You can feel the characteristics of our 2V0-17.25 Study Materials and whether they are suitable for you from the trial. After your payment, we'll send you a connection of our 2V0-17.25 study materials in 5 to 10 minutes and you can download immediately without wasting your valuable time.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q65-Q70):

NEW QUESTION # 65
Which cluster-level feature, when enabled, automatically redistributes VMs to balance CPU and memory across hosts?

- A. vMotion
- B. vSphere DRS
- C. vSAN Health Service
- D. vSphere HA

Answer: B

Explanation:
Distributed Resource Scheduler (DRS) balances CPU and memory resources by migrating VMs among hosts. HA addresses failover, vMotion handles live migration manually or by DRS, and vSAN Health Service monitors the status of the vSAN cluster.

NEW QUESTION # 66
An administrator is using VMware Aria Automation to automate the provisioning of virtual machines in their VMware Cloud Foundation environment. They notice that the automation workflows are failing frequently and want to troubleshoot the issue. What step should the administrator take in VMware Aria Operations for Logs to diagnose the cause of the automation workflow failures?

- A. Use the Interactive Analytics feature to search for error messages related to the workflows.
- B. Check the Audit Logs to see if there are any unauthorized access attempts.

- C. Access the Dashboard to get an overview of system health and performance metrics.
- D. Review the Alert Definitions to ensure alerts for workflow failures are configured.

Answer: A

Explanation:
To diagnose the cause of automation workflow failures in VMware Aria Automation, the Interactive Analytics feature in VMware Aria Operations for Logs allows administrators to search for error messages and filter logs related to the specific workflows. This feature enables detailed analysis of log data to identify any underlying issues causing the failures.

NEW QUESTION # 67
An administrator is tasked with deploying a new application that requires both virtual machines and containers.
Which two components of VMware Cloud Foundation would be utilized to provide a unified platform for managing these workloads? (Choose two.)

- A. IaaS Control Plane
- B. HCX
- C. Aria Suite Lifecycle
- D. NSX
- E. Aria Operations

Answer: D,E

Explanation:
Aria Operations: Aria Operations (formerly vRealize Operations) provides a unified platform for managing both virtual machines (VMs) and containers, offering monitoring, analytics, and performance management for the entire environment.
NSX: NSX provides network virtualization and security, which can be used to manage network traffic for both VMs and containers, offering a consistent networking model for both workloads.

NEW QUESTION # 68
An administrator is tasked with upgrading a vSphere 8-only environment to VCF 9.0. Which three components must be deployed as part of the upgrade? (Choose three.)

- A. VCF Operations for Logs
- B. VCF Identity Broker
- C. VCF Operations
- D. VCF Operations fleet management
- E. VCF Operations Collector
- F. VCF Operations for Networks

Answer: C,D,E

Explanation:
The VCF 9.0 Upgrade Guide specifies required components when converting from a vSphere-only deployment to full VCF. The must-deploy services include:
VCF Operations fleet management - central monitoring of multiple instances.
VCF Operations - core operational monitoring platform.
VCF Operations Collector - required for data ingestion from vSphere, NSX, and vSAN.
The Identity Broker is already embedded with VCF 9.0 SSO, while VCF Operations for Logs and Networks are optional add-ons for extended visibility. Thus, the required three are: A, D, F.

NEW QUESTION # 69
DRAG DROP
Match each troubleshooting task with its relevant procedure or tool.

Tasks		Procedures/Tools
Setting a host in maintenance mode		Use the Certificate Manager tool
Resolve host connectivity issues		Right-click the host and select "Enter Maintenance Mode"
Resolve certificate issues		Check physical connections and network configuration
Troubleshoot snapshot issues		Check for orphaned snapshots and consolidate if necessary

Answer:

Explanation:

asks	Procedures/Tools	
Setting a host in maintenance mode	Resolve certificate issues	Use the Certificate Manager tool
Resolve host connectivity issues	Setting a host in maintenance mode	Right-click the host and select "Enter Maintenance Mode"
Resolve certificate issues	Resolve host connectivity issues	Check physical connections and network configuration
Troubleshoot snapshot issues	Troubleshoot snapshot issues	Check for orphaned snapshots and consolidate if necessar

NEW QUESTION # 70
