

Certification H13-624_V5.5 Sample Questions | Pdf H13-624_V5.5 Free

DOWNLOAD the newest GetValidTest H13-624_V5.5 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=10bOTZjNiezj-T93s_kIt5sGGoVNEN0wD

With our Huawei H13-624_V5.5 practice materials, and your persistence towards success, you can be optimistic about your H13-624_V5.5 real dumps. Even you have bought our Huawei H13-624_V5.5 learning braindumps, and we will send the new updates to you one year long. On one hand, all content can radically give you the best backup to make progress.

Huawei H13-624_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Storage System O&M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&M tools.

Topic 2	<ul style="list-style-type: none"> • Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.
Topic 3	<ul style="list-style-type: none"> • Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.
Topic 4	<ul style="list-style-type: none"> • Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.

Certification H13-624_V5.5 Sample Questions | Valid Huawei Pdf H13-624_V5.5 Free: HCIP-Storage V5.5

We provide 24-hour online service for all customers who have purchased H13-624_V5.5 test guide. If you buy H13-624_V5.5 test guide, things will become completely different. Unlike other learning materials on the market, HCIP-Storage V5.5 torrent prep has an APP version. You can download our app on your mobile phone. And then, you can learn anytime, anywhere. Whatever where you are, whatever what time it is, just an electronic device, you can do exercises. With HCIP-Storage V5.5 torrent prep, you no longer have to put down the important tasks at hand in order to get to class; with H13-624_V5.5 Exam Questions, you don't have to give up an appointment for study.

Huawei HCIP-Storage V5.5 Sample Questions (Q92-Q97):

NEW QUESTION # 92

During routine inspection, an engineer of a bank finds that an interface module of a Huawei flash storage device is faulty. In this case, the engineer can directly remove and insert the interface module without any pre- operations.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

The *HCIP-Storage V5.5 Training Material (Module 5: Storage System Maintenance and Troubleshooting)* addresses hardware maintenance: "Before removing a faulty interface module, engineers must perform pre- operations, such as disabling the module via DeviceManager or CLI, ensuring no active I/O, and verifying redundancy to avoid service disruption. Direct removal without these steps can cause data loss or system errors." The statement that the module can be removed without pre-operations is false, as these steps are mandatory.

Reference:

HCIP-Storage V5.5 Training Material, Module 5: Storage System Maintenance and Troubleshooting, Section 5.17: Hardware Maintenance Procedures*, Huawei Technologies Co., Ltd.

Below is the final batch of ten questions (51-60) from the provided document, formatted as requested, with 100% verified answers based on official Huawei HCIP-Storage V5.5 documentation. Each question includes the main topic, full question statement, answer options (where applicable), correct answer, and a comprehensive explanation referencing official Huawei HCIP-Storage V5.5 materials, such as the *HCIP- Storage V5.5 Training Material* and *Exam Outline*. Any typographical errors in the original document have been corrected in the explanations where necessary, but the question statements are preserved as provided. Answers are derived solely from official Huawei sources. This batch completes the set, covering questions 51 through 60, as requested.

NEW QUESTION # 93

During routine management of Huawei flash storage, an engineer can use the "show license_active" command to query information about activated licenses.

- A. FALSE
- **B. TRUE**

Answer: B

Explanation:

The *HCIP-Storage V5.5 Training Material (Module 5: Storage System Maintenance and Troubleshooting)* confirms: "The CLI command 'show license_active' is used to query details of activated licenses on Huawei flash storage systems, including license status and features enabled." This makes the statement true, as the command is a standard tool for license management.

HCIP-Storage V5.5 Training Material, Module 5: Storage System Maintenance and Troubleshooting, Section 5.22: License Management*, Huawei Technologies Co., Ltd.

NEW QUESTION # 94

When selecting the type of data backup, which option is wrong in the following description?

- A. If there are only cumulative incremental backups in the schedule, but no full backups, when performing cumulative incremental backups for the first time, all files will be backed up.
Pieces.
- **B. It is recommended to use a combination of three backup types: full backup, differential incremental backup, and cumulative incremental backup.**
- C. Differential incremental can save storage space to the greatest extent, and the backup window is small.
- D. If the backup strategy is full backup combined with differential incremental backup, after a system failure, if you want to restore to the most recent data, then It is necessary to restore the data of the last full backup and all differential incremental backups after the full backup.

Answer: B

NEW QUESTION # 95

A financial customer purchases several Huawei OceanStor Dorado series storage devices for service deployment. During a maintenance process, an engineer needs to use DeviceManager to collect disk health analysis (DHA) logs. Which of the following is not Included in DHA logs?

- A. Routine disk health statistics
- B. Disk life span information
- **C. Device latency statistics**
- D. I/O statistics

Answer: C

NEW QUESTION # 96

Fill in blank

If Huawei scale-out storage software is installed in low level design (LLD) mode, engineers need to use the _____ installation and deployment tool to plan nodes, networks, and clusters and export the configuration file for subsequent installation and deployment.

Answer:
