UiPath-ADPv1 Latest Braindumps Ppt - UiPath-ADPv1 Test Questions Fee

Our passing rate is high so that you have little probability to fail in the exam because the UiPath-ADPv1 guide torrent is of high quality. But if you fail in exam unfortunately we will refund you in full immediately at one time and the procedures are simple and fast. If you have any questions about UiPath (ADPv1) Automation Developer Professional test torrent or there are any problems existing in the process of the refund you can contact us by mails or contact our online customer service personnel and we will reply and solve your doubts or questions promptly. We guarantee to you that we provide the best UiPath-ADPv1 study torrent to you and you can pass the exam with high possibility and also guarantee to you that if you fail in the exam unfortunately we will provide the fast and simple refund procedures.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q91-Q96):

NEW QUESTION # 91

What is the default polling interval set for an event trigger?

- A. 1 minute
- B. 10 minutes
- C. 5 minutes
- D. 15 minutes

Answer: C

NEW QUESTION # 92

The Extract PDF Page Range activity is used to extract a specific set of pages from a PDF file. Which of the following statements correctly describes this activity?

- A. PageCount argument outputs the number of extracted pages.
- B. OutputFileName argument is optional.
- C. Password-protected PDF files cannot be processed with this activity.
- **D. Range argument accepts complex range values or "All".**

Answer: D

Explanation:

The Extract PDF Page Range activity is used to extract a specific set of pages from a PDF file and save them as a new PDF file¹. The activity has the following properties:

*Common

oDisplayName: The display name of the activity¹.

*File

oFileName: The path of the PDF file you want to extract a range of pages from. This field supports only strings and String variables¹.

oOutputFileName: The name you want to use for the file that is generated from the extracted range of pages. This field supports only strings and String variables¹.

oPassword: The password of the PDF file, if necessary. This field supports only strings and String variables¹.

*Input

oRange: The range of pages that you want to retrieve. You can specify a single page (e.g. "7"), a range of pages (e.g. "7-12"), or a complex range, (e.g. "2-5, 7, 15-End" or "All"). Only string variables and strings are supported. By default, this field is cleared¹.

*Misc

oPrivate: If selected, the values of variables and arguments are no longer logged at Verbose level¹.

The statement that correctly describes this activity is B. Range argument accepts complex range values or "All". This statement is true because the Range property allows you to specify the pages that you want to extract from the PDF file using different formats, such as single pages, ranges, or complex ranges¹. You can also use the keyword "All" to extract all the pages from the PDF file¹.

The other statements are incorrect because:

*A. Password-protected PDF files cannot be processed with this activity. This statement is false because the activity has a Password property that allows you to enter the password of the PDF file, if necessary¹. This enables the activity to process password-protected PDF files¹.

*C. OutputFileName argument is optional. This statement is false because the OutputFileName property is required for the activity to work¹. This property specifies the name of the file that is generated from the extracted range of pages¹. If this property is not provided, the activity will throw an exception¹.

*D. PageCount argument outputs the number of extracted pages. This statement is false because the activity does not have a PageCount argument¹. The activity does not output the number of extracted pages, but only the new PDF file that contains the extracted pages¹.

NEW QUESTION # 93

Which of the following demonstrates the correct syntax for using the Vb.Net "If" Operator?

- A. If condition1 Then valueIfTrue ElseIf valueIfFalse
- B. If(condition1, valueIfTrue) ElseIf(valueIfFalse)
- C. valueIfTrue If condition1 Else valueIfFalse
- **D. If(condition1, valueIfTrue, valueIfFalse)**

Answer: D

Explanation:

The correct syntax for using the Vb.Net If operator is If(condition1, valueIfTrue, valueIfFalse). The If operator is a ternary operator that returns one of two values, depending on whether the condition is true or false. The condition must be a Boolean expression or a data type that can be implicitly converted to Boolean. The valueIfTrue and valueIfFalse arguments can be any data type, but they must be the same or implicitly convertible to a common type. The If operator uses short-circuit evaluation, which means that it only evaluates the argument that corresponds to the result of the condition. For example, the following expression returns "Positive" if the variable number is greater than or equal to zero, and "Negative" otherwise:

VB Dim result As String = If(number >= 0, "Positive", "Negative") References: [If Operator], [Ternary Operator]

NEW QUESTION # 94

A developer wants to add items to a list of strings using the Invoke Method activity. The list is declared as follows:

- ☐ The Invoke Method includes the following properties:
- ☐ The Invoke Method includes the following properties:
- ☐ Based on the exhibits, what is the outcome of this Invoke Method activity?

- A. Colors will contain items in the following order: "Yellow", "Red", "Green".
- B. Colors will contain items in the following order: "Red", "Green".
- C. Invoke Method activity will throw an error.
- **D. Colors will contain items in the following order: "Red", "Green", "Yellow".**

Answer: D

Explanation:

Based on the exhibits provided, the developer has set up an Invoke Method activity to add an item to the "Colors" list variable. The list is initially declared with two items "Red" and "Green". The Invoke Method activity is configured to add the string "Yellow" to this list.

The properties of the Invoke Method activity indicate that the method 'Add' will be called on the target object 'Colors' with the parameter "Yellow". This means the string "Yellow" will be added to the end of the list.

The outcome of executing this Invoke Method activity will be:

D: Colors will contain items in the following order: "Red", "Green", "Yellow".

This is because items in a List<T> in .NET are added in sequence, and the "Add" method appends the new item to the end of the list.

NEW QUESTION # 95

When developing a process, you were provided with two data tables, "DT1" and "DT2", as shown below:

- ☐ The process documentation specifies that the two data tables need to be manipulated in order to reflect the following "DT2":
- ☐ How should the properties of the Merge Data Table activity be configured?

- **A. ☐**
- B. ☐
- C. ☐
- D. ☐

Answer: A

Explanation:

Given the two data tables DT1 and DT2, to achieve the desired result where DT2 contains both the department and the names, the Merge Data Table activity should be configured to merge DT1 into DT2. This configuration requires specifying DT1 as the source table and DT2 as the destination table. The MissingSchemaAction should be set to AddWithKey which ensures that if the source table (DT1) contains columns that are not found in the destination table (DT2), they will be added to the destination table with the primary key information preserved.

Option A shows the correct configuration for the Merge Data Table activity to achieve this result:

* Destination: DT1

* Source: DT2

* MissingSchemaAction: AddWithKey

This setup correctly adds the "Name" column from DT1 to DT2 based on the shared "ID" column, which acts as the key. Since both tables have an "ID" column with matching values, the names will be added to the corresponding IDs in DT2, resulting in a merged table with ID, Department, and Name columns.

NEW QUESTION # 96

.....

The internet is transforming society, and distance is no longer an obstacle. You can download our UiPath-ADPv1 exam simulation from our official website, which is a professional platform providing the most professional UiPath-ADPv1 practice materials. You can get them within 15 minutes without waiting. What is more, you may think these high quality UiPath-ADPv1 Preparation materials

require a huge investment on them. Actually we eliminate the barriers blocking you from our UiPath-ADPv1 practice materials. The price of our UiPath-ADPv1 exam question is quite favourable for you to buy.
