COF-C02 Latest Exam Testking & COF-C02 Test Dumps Free

As a reliable company providing professional IT certificate exam materials, we not only provide quality guaranteed products for COF-C02 exam software, but also offer high quality pre-sale and after-sale service. Our online service will give you 24/7 online support. If you have any question about COF-C02 exam software or other exam materials, or any problem about how to purchase

our products, you can contact our online customer service directly. Besides, during one year after you purchased our COF-C02 Exam software, any update of COF-C02 exam software will be sent to your mailbox the first time.

Snowflake SnowPro Core Certification Exam Sample Questions (Q253-Q258):

NEW QUESTION # 253

Which command is used to remove files from either external cloud storage or an internal staged

- A. DELETE
- B. DROP
- C. REMOVE
- D. TRUNCATE

Answer: C

Explanation:

The REMOVE command in Snowflake is used to delete files from either external cloud storage locations or internal stages. This command helps manage staged files by removing them when they are no longer needed, which is useful for maintaining organization and managing storage costs.

Reference:

Snowflake Documentation: REMOVE Command

NEW QUESTION # 254

Given the statement template below, which database objects can be added to a share?(Select TWO).

GRANT <privilege> ON <object> <object_name> To SHARE <share_name>;

- A. Stored procedures
- B. Tasks
- C. Streams
- D. Tables
- E. Secure functions

Answer: C,D

Explanation:

In Snowflake, shares are used to share data across different Snowflake accounts securely. When you create a share, you can include various database objects that you want to share with consumers. According to Snowflake's documentation, the types of objects that can be shared include tables, secure views, secure materialized views, and streams. Secure functions and stored procedures are not shareable objects. Tasks also cannot be shared directly. Therefore, the correct answers are streams (C) and tables (D).

To share a stream or a table, you use the GRANT statement to grant privileges on these objects to a share. The syntax for sharing a table or stream involves specifying the type of object, the object name, and the share to which you are granting access. For example: GRANT SELECT ON TABLE my_table TO SHARE my_share; GRANT SELECT ON STREAM my_stream TO SHARE my_share; These commands grant the SELECT privilege on a table named my_table and a stream named my_stream to a share named my_share. This enables the consumer of the share to access these objects according to the granted privileges.

NEW QUESTION # 255

Which type of URL gives permanent access to files in cloud storage?

- A. File URL
- B. Scoped URL
- C. Account URL
- D. Pre-signed URL

Answer: D

Explanation:

* A Pre-signed URL provides temporary or permanent access to specific files in cloud storage (e.g., S3, Azure Blob, or Google

Cloud Storage) by embedding credentials or access permissions into the URL.

* In Snowflake, pre-signed URLs are commonly used to securely access files in external stages or other cloud storage without sharing permanent credentials.

* Why Pre-signed URL?

* Allows you to specify access conditions, such as expiration time or specific permissions.

* Useful for secure, direct access to files stored externally.

Why Other Options Are Incorrect:

* B. Account URL: Refers to the URL for accessing Snowflake accounts, not files in cloud storage.

* C. Scoped URL: Not a valid term in Snowflake or cloud storage.

* D. File URL: Not a specific type of secure URL.

References:

* Using Pre-signed URLs with Snowflake

NEW QUESTION # 256

Which of the following best describes where Snowflake's metadata is stored?

- A. In the Cloud Services Layer
- B. Inside the Virtual Warehouses
- C. Within the data files
- D. within the drivers

Answer: A

NEW QUESTION # 257

What privileges are required to allow role RL_CUST_WH to start warehouse CUST_WH?

- A. GRANT OPERATE ON CUST_WH TO ROLE RL_CUST_WH;
- B. GRANT CREATE WAREHOUSES ON ACCOUNT TO ROLE RL_CUST_WH;
- C. GRANT USAGE ON CUST_WH TO ROLE RL_CUST_WH;
- D. GRANT MANAGE WAREHOUSES ON ACCOUNT TO ROLE RL_CUST_WH;

Answer: A

Explanation:

To start, resume, or suspend a warehouse, the role needs the OPERATE privilege. USAGE only allows reference to the object but not its activation.

Required Privileges for Starting a Warehouse:

* USAGE (to reference)

* OPERATE (to start/stop)

Reference:

Snowflake Docs: Warehouse Privileges

NEW QUESTION # 258

.....

The exam requires an enormous amount of effort and determination and dedication to get to the end goal. ExamCost is one of the most reliable platforms that offer an accurate, reliable, and straightforward Snowflake COF-C02 dumps to ensure the success of students on the initial try.
