The Exam4Labs is quite confident that you will crack the CIS-HAM exam shortly.

## ServiceNow Certified Implementation Specialist - Hardware Asset Management Sample Questions (Q140-Q145):

### NEW QUESTION # 140

What are the main purposes of transfer order line tasks? (Choose two.)

- A. To help track the total number of assets moved from one stockroom to another
- B. To automate reordering of consumables as they are consumed by users
- C. To move transfer order lines from one stage to another
- D. To move transfer orders from one stage to another
- E. To help track service levels and the time frame needed to complete a transfer order

**Answer: C,E**

Explanation:

According to the ServiceNow Product Documentation on Transfer Orders<sup>1</sup>, transfer orders are records that define the movement of assets from one stockroom to another<sup>1</sup>. They can be used to replenish the stock of assets, fulfill asset requests, or relocate assets<sup>1</sup>. According to the ServiceNow Product Documentation on Transfer Order Line Tasks<sup>2</sup>, transfer order line tasks are records that define the actions that need to be performed for each transfer order line<sup>2</sup>. A transfer order line is a record that defines the quantity and model of the assets that are being transferred<sup>1</sup>.

The main purposes of transfer order line tasks are<sup>2</sup>:

To help track service levels and the time frame needed to complete a transfer order: Transfer order line tasks have a due date and a state that indicate the progress and completion of the transfer order line. They also have a priority and an assignment group that determine the urgency and the responsibility of the transfer order line. These fields help users to monitor and manage the service levels and the time frame needed to complete a transfer order.

To move transfer order lines from one stage to another: Transfer order line tasks have a type that defines the action that needs to be performed for the transfer order line, such as pick, pack, ship, or receive. As transfer order line tasks are completed, the transfer order line moves from one stage to another, such as requested, in transit, or received. These stages reflect the status and location of the assets that are being transferred.

2: ServiceNow Product Documentation: Transfer Order Line Tasks

### NEW QUESTION # 141

Which mobile app can users leverage to view the assets assigned to them and create incidents to report issues with their devices?

- A. Now My Assets app
- B. Now Mobile app
- C. Now Agent Mobile app
- D. Now Onboarding app

**Answer: C**

### NEW QUESTION # 142

When disposing of an IT asset through a vendor, what documentation should be attached to the retired asset's record as proof of adherence to environmental, regulatory, and legal requirements?

- A. Certificate of discharge
- B. Certificate of retirement
- C. Certificate of destruction
- D. Certificate of disposal

- E. Certificate of decommission

**Answer: A**

#### NEW QUESTION # 143

What hardware asset attribute should you track that is NOT part of a configuration item(CI)?

- A. Memory
- B. IP address
- **C. Cost**
- D. Operating system
- E. CPU

**Answer: C**

Explanation:

A configuration item (CI) is a record that represents an IT asset or service in the Configuration Management Database (CMDB)1. A CI tracks the operational and relationship information of the asset or service, such as its current status, location, owner, and dependencies1.

A hardware asset is a physical component of an IT system, such as a laptop, server, or router2.

A hardware asset attribute is a property or characteristic of the hardware asset, such as its model, serial number, or warranty2.

Some hardware asset attributes are also part of the CI, such as IP address, CPU, operating system, and memory1. These attributes reflect the operational state of the hardware asset and are relevant for configuration management purposes1.

However, some hardware asset attributes are not part of the CI, such as cost2. Cost is a financial information of the hardware asset that is tracked by the Asset Management application2. Cost is not relevant for configuration management purposes and is not stored in the CMDB2.

Therefore, the hardware asset attribute that should be tracked that is not part of the CI is C.

Cost. References:

1: Configuration Item

2: Hardware Asset Management

#### NEW QUESTION # 144

What are some examples of operational expenses of managing an asset throughout its lifecycle? (Choose two.)

- **A. Replacement parts**
- B. Warranty costs
- **C. Maintenance agreements**
- D. Storage costs

**Answer: A,C**

Explanation:

Operational expenses are the costs incurred by an organization to maintain and use an asset throughout its lifecycle. These costs include the expenses related to the repair, maintenance, upgrade, and disposal of the asset. Some examples of operational expenses are:

\* Replacement parts: These are the costs of purchasing and installing new parts or components for an asset that is damaged, worn out, or obsolete. For example, replacing a hard drive, a battery, or a keyboard for a laptop.

\* Maintenance agreements: These are the costs of contracting with a vendor or a service provider to perform regular or preventive maintenance on an asset. For example, paying a monthly fee for a technician to check and service a printer or a scanner.

Other examples of operational expenses are:

\* Storage costs: These are the costs of renting or owning a space to store an asset that is not in use or awaiting disposal. For example, paying for a warehouse, a locker, or a shelf to keep unused or surplus computers or monitors.

\* Warranty costs: These are the costs of extending or renewing the warranty coverage for an asset that is still under the manufacturer's warranty or has expired. For example, paying an extra fee for a one-year or a three-year warranty extension for a tablet or a smartphone.

References:

\* Hardware Asset Management overview, which describes the functionalities of the Hardware Asset Management application, including the dashboard, model normalization, hardware refresh, lease contract expiration, disposal orders, and RMA requests.

\* Hardware Asset Management, which gives an overview of the benefits and features of the Hardware Asset Management solution,

such as reducing costs, improving compliance, optimizing asset utilization, and enhancing service delivery.

\* Hardware Asset Management - ServiceNow, which provides a data sheet with the key capabilities and benefits of the Hardware Asset Management application.
