New Terraform-Associate-003 Latest Test Bootcamp | Pass-Sure HashiCorp Terraform-Associate-003: HashiCorp Certified: Terraform Associate (003) (HCTA0-003) 100% Pass

ExamCost is a wonderful study platform that can transform your effective diligence in to your best rewards. By years of diligent work, our experts have collected the frequent-tested knowledge into our Terraform-Associate-003 exam materials for your reference. So our practice materials are triumph of their endeavor. By resorting to our Terraform-Associate-003 Exam Materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our Terraform-Associate-003 practice materials, and the passing rate is 98-100 percent.

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q39-Q44):

NEW QUESTION # 39

How is terraform import run?

- A. As a part of terraform refresh
- B. By an explicit call
- C. As a part of terraform plan
- D. As a part of terraform init
- E. All of the above

Answer: B

Explanation:

The terraform import command is not part of any other Terraform workflow. It must be explicitly invoked by the user with the appropriate arguments, such as the resource address and the ID of the existing infrastructure to import. Reference = [Importing Infrastructure]

NEW QUESTION # 40

All standard backend types support state locking, and remote operations like plan, apply, and destroy.

- A. False
- B. True

Answer: A

Explanation:

Not all standard backend types support state locking and remote operations like plan, apply, and destroy. For example, the local backend does not support remote operations and state locking. State locking is a feature that ensures that no two users can make changes to the state file at the same time, which is crucial for preventing race conditions. Remote operations allow running Terraform commands on a remote server, which is supported by some backends like remote or consul, but not all.

Reference:

Terraform documentation on backends: Terraform Backends

Detailed backend support: Terraform Backend Types

NEW QUESTION # 41

If a module declares a variable with a default, that variable must also be defined within the module.

- A. False
- B. True

Answer: A

Explanation:

A module can declare a variable with a default value without requiring the caller to define it. This allows the module to provide a sensible default behavior that can be customized by the caller if needed. Reference = [Module Variables]

NEW QUESTION # 42

Which of the following methods, used to provision resources into a public cloud, demonstrates the concept of infrastructure as code?

- A. A series of commands you enter into a public cloud console
- B. A sequence of REST requests you pass to a public cloud API endpoint Most Voted
- C. A script that contains a series of public cloud CLI commands
- D. curl commands manually run from a terminal

Answer: C

Explanation:

Explanation

The concept of infrastructure as code (IaC) is to define and manage infrastructure using code, rather than manual processes or GUI tools. A script that contains a series of public cloud CLI commands is an example of IaC, because it uses code to provision resources into a public cloud. The other options are not examples of IaC, because they involve manual or interactive actions, such as running curl commands, sending REST requests, or entering commands into a console. References = [Introduction to Infrastructure as Code with Terraform] and [Infrastructure as Code]

NEW QUESTION # 43

Which of the following should you add in the required_providers block to define a provider version constraint?

- A. version ~> 3.1
- B. version = ">= 3.1"
- C. version >= 3.1

Answer: B

Explanation:

Detailed Explanation:

* Rationale for Correct Answer (C):Version constraints must be specified with = and quotes, e.g.:

version = ">= 3.1"

This ensures compatibility with Terraform's syntax.

* Analysis of Incorrect Options:

* A, B: Incorrect syntax, missing quotes or wrong operator format.

* C: Correct Terraform syntax.

* Key Concept:Correct syntax in provider version constraints ensures reproducibility.

Reference:Terraform Exam Objective - Manage Terraform Resources and Providers.

NEW QUESTION # 44

.....

We can guarantee that you are able not only to enjoy the pleasure of study but also obtain your HashiCorp Terraform-Associate-003 certification successfully, which can be seen as killing two birds with one stone. And you will be surprised to find our superiorities of our HashiCorp Terraform-Associate-003 Exam questions than the other vendors.
