ISO/IEC 27001 (2022) Foundation Exam High Hit-Rate Exam Sims**

Certification ISO-IEC-27001-Foundation exam on the first attempt. The demand of the ISO/IEC 27001 (2022) Foundation Exam exam is growing at a rapid pace day by day and almost everyone is planning to pass it so that they can improve themselves for better futures in the SureTorrent sector. ISO-IEC-27001-Foundation has tried its best to make this learning material the most user-friendly so the applicants don't face excessive issues.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 2	<ul style="list-style-type: none"> Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 3	<ul style="list-style-type: none"> Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 4	<ul style="list-style-type: none"> Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 5	<ul style="list-style-type: none"> Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The regular activities necessary to maintain and improve the ISMS
- B. The level of quality to which the ISMS must adhere
- C. The lessons learned from the information security experiences of other organizations
- **D. The dependencies between activities performed by the organization**

Answer: D

Explanation:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of:

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

NEW QUESTION # 44

Which action is an organization required to take to ensure that personnel are competent to perform their assigned tasks within the ISMS?

- A. Ensure that the controls for compliance with legal and contractual requirements are implemented
- **B. Hold up-to-date records on training, skills, experience and qualifications**
- C. Ensure all personnel are trained to ISO/IEC 27001 Foundation level
- D. Identify products which could be used in the organization to improve ISMS performance and effectiveness

Answer: B

Explanation:

Clause 7.2 (Competence) requires the organization to:

- * "determine the necessary competence of person(s) doing work under its control that affects its information security performance;"
- * "ensure that these persons are competent on the basis of appropriate education, training, or experience;"
- * "retain appropriate documented information as evidence of competence." This makes holding up-to-date records on training, skills, experience, and qualifications (D) the correct answer. Option A is irrelevant to competence. Option B is incorrect since ISO does not require Foundation-level training - competence is context-based. Option C is related to compliance but does not ensure individual competence.

Thus, the verified correct answer is D.

NEW QUESTION # 45

Which factor is required to be determined when understanding the organization and its context?

- **A. Internal issues affecting the purpose of the ISMS**
- B. The information security objectives relevant to the ISMS
- C. The processes that will be required to operate the ISMS
- D. The ISO/IEC 27001 clauses which apply to the management system

Answer: A

Explanation:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step - ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

NEW QUESTION # 46

In which clause would the requirements for internal audit be found?

- A. Planning
- **B. Performance Evaluation**
- C. Operation
- D. Improvement

Answer: B

Explanation:

The requirements for internal audit are explicitly placed in Clause 9.2 (Performance Evaluation) of ISO/IEC 27001:2022. The standard requires:

- * "The organization shall conduct internal audits at planned intervals to provide information on whether the information security management system... conforms to the organization's own requirements... and to the requirements of this document." (9.2.1)
- * "The organization shall plan, establish, implement and maintain an audit programme(s)..." (9.2.2) This clause clearly falls under Performance Evaluation (Clause 9), not Planning (Clause 6), Operation (Clause 8), or Improvement (Clause 10). Therefore, the correct answer is C.

NEW QUESTION # 47

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Producing a risk assessment report
- B. Implementing the actions from internal audits
- C. Communicating feedback from interested parties to the organization
- **D. Ensuring information security objectives are established**

Answer: D

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

NEW QUESTION # 48

.....

ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation answers real questions can help candidates have correct directions and prevent useless effort. If you still lack of confidence in preparing your exam, choosing a good APMG-International ISO-IEC-27001-Foundation Answers Real Questions will be a wise decision for you, it is also an economical method which is saving time, money and energy.
