

# ADA-C02 Flexible Testing Engine | Latest ADA-C02 Exam Book

Some sites provide Snowflake ADA-C02 Exam study materials on the Internet, but they do not have any reliable guarantee. Let me be clear here a core value problem of FreeDumps. All Snowflake exams are very important. In this era of rapid development of information technology, FreeDumps just questions provided by one of them. Why do most people choose FreeDumps? This is because the exam information provided by FreeDumps will certainly be able to help you pass the exam. Why? Because it provides the most up-to-date information, which is the majority of candidates proved by practice.

In order to survive in the society and realize our own values, learning our ADA-C02 practice engine is the best way. Never stop improving yourself. The society warmly welcomes struggling people. You will really benefit from your correct choice. Our ADA-C02 Study Materials are ready to help you pass the exam and get the certification. You can certainly get a better life with the certification. Please make a decision quickly. We are waiting for you to purchase our ADA-C02 exam questions.

## Free PDF Snowflake - ADA-C02 - Newest SnowPro Advanced Administrator ADA-C02 Flexible Testing Engine

Our ADA-C02 training materials are of high quality, and we also have free demo to help you know the content of the ADA-C02 exam dumps. Free update for 365 days after purchasing is available, and the update version will be sent to you timely. If you fail to pass the exam, we will return your money into the payment account. All we do is for your interest, and we also accept your suggestion and advice for ADA-C02 Training Materials.

## Snowflake SnowPro Advanced Administrator ADA-C02 Sample Questions (Q36-Q41):

### NEW QUESTION # 36

Which statement allows a Snowflake Administrator to retrieve the network policy applied to their Snowflake account?

- A. DESC NETWORK POLICY <policy\_name>;
- B. SHOW NETWORK POLICIES;
- C. SHOW PARAMETERS LIKE 'NETWORK POLICY' IN ACCOUNT;
- D. SHOW NETWORK POLICIES IN ACCOUNT;

**Answer: C**

Explanation:

The network policy applied at the account level is stored as an account parameter. Using a SHOW PARAMETERS command with the filter for NETWORK POLICY at the account scope returns the currently configured value, which identifies the network policy

associated with the account.

### NEW QUESTION # 37

If the query matches the definition, will Snowflake always dynamically rewrite the query to use a materialized view?

- A. Yes, because materialized views are always faster.
- B. No, because joins are not supported by materialized views.
- C. No, because the materialized view may not be up-to-date.
- **D. No, because the optimizer might decide against it.**

**Answer: D**

Explanation:

Even if a query matches the definition of a materialized view, the Snowflake optimizer may decide not to rewrite the query to use it. The optimizer evaluates factors such as freshness, cost, and efficiency before choosing whether or not to substitute the materialized view.

### NEW QUESTION # 38

A Snowflake customer is experiencing higher costs than anticipated while migrating their data warehouse workloads from on-premises to Snowflake. The migration workloads have been deployed on a single warehouse and are characterized by a large number of small INSERTS rather than bulk loading of large extracts. That single warehouse has been configured as a single cluster, 2XL because there are many parallel INSERTS that are scheduled during nightly loads.

How can the Administrator reduce the costs, while minimizing the overall load times, for migrating data warehouse history?

- A. The 2XL warehouse should be changed to 4XL to increase the number of threads available for parallel load queries.
- B. The INSERTS should be converted to several tables to avoid contention on large tables that slows down query processing.
- **C. The warehouse should be kept as a SMALL or XSMALL and configured as a multi-cluster warehouse to handle the parallel load queries.**
- D. There should be another 2XL warehouse deployed to handle a portion of the load queries.

**Answer: C**

Explanation:

For many small, parallel INSERTS, using a multi-cluster warehouse with smaller size (SMALL or XSMALL) allows more concurrent queries to run efficiently and reduces costs compared to a single large warehouse. This configuration improves concurrency without unnecessary compute expense.

### NEW QUESTION # 39

What is a characteristic of Snowflake's transaction locking and concurrency modeling?

- A. If two queries are concurrently executed against the same table, one of the two queries will be blocked until the other query completes.
- **B. A deadlock cannot occur in Snowflake, since concurrently executed queries and DML statements do not block one another.**
- C. Queries executed within a given transaction see that transaction's uncommitted changes.
- D. Transaction locking in Snowflake is enforced exclusively at the row and table levels.

**Answer: B**

Explanation:

Snowflake uses multi-version concurrency control (MVCC), which allows queries and DML statements to operate without blocking each other. This architecture eliminates the possibility of deadlocks because transactions work on snapshots of data rather than locking rows or tables in ways that could cause contention.

### NEW QUESTION # 40

A team of developers created a new schema for a new project. The developers are assigned the role DEV\_TEAM which was set up using the following statements:

```
USE ROLE SECURITYADMIN;
```

```
CREATE ROLE DEV_TEAM;
```

```
GRANT USAGE, CREATE SCHEMA ON DATABASE DEV_DB01 TO ROLE DEV_TEAM;
```

```
GRANT USAGE ON WAREHOUSE DEV_WH TO ROLE DEV_TEAM;
```

Each team member's access is set up using the following statements:

```
USE ROLE SECURITYADMIN;
```

```
CREATE ROLE JDOE_PROFILE;
```

```
CREATE USER JDOE LOGIN_NAME = 'JDOE' DEFAULT ROLE='JDOE_PROFILE';
```

```
GRANT ROLE JDOE_PROFILE TO USER JDOE;
```

```
GRANT ROLE DEV_TEAM TO ROLE JDOE_PROFILE;
```

New tables created by any of the developers are not accessible by the team as a whole.

How can an Administrator address this problem?

- A. Assign ownership privilege to DEV\_TEAM on the newly-created schema.
- **B. Set up future grants on the newly-created schemas.**
- C. Assign usage privilege on the virtual warehouse DEV\_WH to the role JDOE\_PROFILE.
- D. Set up the new schema as a managed-access schema.

**Answer: B**

Explanation:

Future grants allow privileges to be automatically granted on objects created in the future within a schema. By configuring future grants on the schema, privileges such as SELECT can automatically be granted to the DEV\_TEAM role whenever new tables are created. This ensures that all developers using the DEV\_TEAM role can access newly created tables without requiring manual privilege grants after each table creation.

## NEW QUESTION # 41

.....

We are stable and Reliable ADA-C02 Exam Questions providers for persons who need them for their exam. We have been staying and growing in the market for a long time, and we will be here all the time, because our excellent quality and high pass rate. As for the safe environment and effective product, there are thousands of candidates are willing to choose our SnowPro Advanced Administrator ADA-C02 study question, why don't you have a try for our study materials, never let you down!

**Latest ADA-C02 Exam Book:** <https://www.freedumps.top/ADA-C02-real-exam.html>

Our ADA-C02 test braindumps can help you pass the exam and get the certificate efficiently, Snowflake ADA-C02 Flexible Testing Engine So I realize that you must be worried about whether you can pass the exam, Snowflake ADA-C02 Flexible Testing Engine 100% Satisfaction guarantee, The ADA-C02 test material is not exceptional also, in order to let the users to achieve the best product experience, if there is some learning platform system vulnerabilities or bugs, we will check the operation of the ADA-C02 quiz guide in the first time, let the professional service personnel to help user to solve any problems, The sooner you start preparing, the higher your chance to excel on your SnowPro Advanced Administrator ADA-C02 ADA-C02 exam.

Security Tokens in WS-Security, Understand the special challenges of retrofitting overburdened server environments, Our ADA-C02 Test Braindumps can help you pass the exam and get the certificate efficiently.

## ADA-C02 Flexible Testing Engine: SnowPro Advanced Administrator ADA-C02 - Snowflake Latest ADA-C02 Exam Book Pass for sure

So I realize that you must be worried about whether you can pass the exam, 100% Satisfaction guarantee, The ADA-C02 test material is not exceptional also, in order to let the users to achieve the best product experience, if there is some learning platform system vulnerabilities or bugs, we will check the operation of the ADA-C02 quiz guide in the first time, let the professional service personnel to help user to solve any problems.
