# Quiz 2026 High-quality SAP C-ACDET-2506: Real SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Braindumps

You must be attracted by the APP online version of our C-ACDET-2506 exam questions, which is unlike other exam materials that are available on the market, study torrent specially proposed different version to allow you to learn not on paper, but to use on all kinds of eletronic devices such as IPAD, mobile phones or laptop to learn. This greatly improves the students' availability of fragmented time. You can also have a quite enjoyable experience with APP online version of our C-ACDET-2506 Study Materials. Just have a try on this version of our C-ACDET-2506 learning guide!

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 3	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Vce C-ACDET-2506 Test Simulator & C-ACDET-2506 Certified Questions

If you want to know PDF version of SAP C-ACDET-2506 new test questions, you can download our free demo before purchasing. Yes, we provide free PDF version for your reference. If you want to know the quality of our PDF version of C-ACDET-2506 new test questions, free PDF demo will show you. PDF version is easy for read and print out. If you are used to studying on paper, this version will be suitable for you. Besides, you place order for your companies, PDF version of C-ACDET-2506 new test questions can be printed out many times and suitable for demonstration.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q47-Q52):

NEW QUESTION # 47
How can you define default values on fields?

- A. Set as Constants or Expressions based on other field values
- B. Default values are not permitted
- C. Set only for Constant values
- D. Default values must be manually entered by the user

Answer: A

NEW QUESTION # 48
Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- A. SupplierContact - contacts for the suppliers
- B. AMLExtension - AML customizations such as custom fields
- C. Template - project templates such as Contract templates
- D. DynamicForm - custom form templates (dForms)

Answer: A

Explanation:
The Intelligent Configuration Manager (ICM) migrates configuration types such as DynamicForms (dForms), AML Extensions (custom fields and enumerations), and Templates (contract or project templates). However, SupplierContact data, which is master or transactional data, is not migrated through ICM because ICM focuses on configuration migration, not operational or transactional data. Supplier contact information is managed separately and must be migrated using appropriate master data processes.

NEW QUESTION # 49
During a Bluefield migration, you discover missing flex master data templates.
What do you do?

- A. Rebuild them manually in production
- B. Defer to post-go-live
- C. Ignore them
- D. Use reporting workaround

Answer: A

NEW QUESTION # 50

During a Bluefield migration, you discover missing flex master data templates. What do you do?

- A. Rebuild them manually in production
- B. Defer to post-go-live
- C. Ignore them
- D. Use reporting workaround

Answer: A

Explanation:

In a Bluefield deployment scenario, SAP Ariba requires that all Flex Master Data (FMD) templates and their associated data be present in the Production environment before migrating related configuration elements. If you find missing FMD templates during migration, the recommended approach is to manually recreate the missing templates in Production and load the relevant data. This is essential to maintain integrity because many custom fields depend on these templates, and missing templates can cause migration failures or broken references. Deferring or ignoring the issue risks operational disruptions and data inconsistencies. Reporting workarounds do not address template dependencies and therefore are ineffective. This aligns with SAP's guidance on master data migration within Bluefield scenarios to ensure successful, error-free deployments.

NEW QUESTION # 51

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.
- B. Subsequent migration activities will require a complete reconfiguration of existing solutions.
- C. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- D. Subsequent migration activities follow Bluefield deployment scenario.

Answer: D

Explanation:

In SAP Ariba deployments, when a full Greenfield baseline has been applied initially-meaning a fresh, full suite setup on the Test site-and the customer deploys a single solution (like Sourcing) to Production first, all subsequent deployments follow a Bluefield scenario. This means that later stages of deployment (e.g., Contracts, Supplier Risk) involve selective migration and incremental configuration changes to Production without rebuilding everything from scratch. Bluefield scenarios specifically accommodate environments where Production may already be live with transactions, requiring careful selective migration to avoid disruption. This contrasts with Brownfield, which typically involves upgrading or reusing existing deployments without full baseline resets. Also, Greenfield deployments do not require all suite components to migrate simultaneously; phased deployments are supported.
This approach ensures minimal risk during deployment and provides flexibility to roll out additional modules progressively.
Extract summary: SAP Ariba documentation highlights Bluefield for phased, incremental deployments post Greenfield baseline application to accommodate live production environments.

NEW QUESTION # 52
