

PSP Schulungsmaterialien & PSP Dumps Prüfung & PSP Studienguide

P.S. Kostenlose und neue PSP Prüfungsfragen sind auf Google Drive freigegeben von Zertpruefung verfügbar:
https://drive.google.com/open?id=1qfQAfM87AUysKDGsZatkf_v8ZHFR80gV

Solange Sie die Prüfung benötigen, können wir jederzeit die Schulungsunterlagen zur ASIS PSP Zertifizierungsprüfung aktualisieren, um Ihre Prüfungsbedürfnisse abzudecken. Die Schulungsunterlagen von Zertpruefung enthalten viele Übungsfragen und Antworten zur ASIS PSP Zertifizierungsprüfung und geben Ihnen eine 100%-Pass-Garantie. Mit unseren Schulungsunterlagen können Sie sich besser auf Ihre PSP Prüfung vorbereiten. Außerdem bieten wir Ihnen einen einjährigen kostenlosen Update-Service.

Die ASIS PSP -Prüfung (ASIS Physical Security Professional) ist ein Zertifizierungsprogramm, das das Wissen und die Fähigkeiten von Sicherheitsprofis validiert, die sich auf die körperliche Sicherheit spezialisiert haben. Die Prüfung wird von der American Society for Industrial Security (ASIS), der größten Organisation von Sicherheitsprofis der Welt, verwaltet. Die PSP -Zertifizierung gilt als führend in der Sicherheitsbranche und wird von Arbeitgebern und Kunden gleichermaßen geschätzt.

Die ASIS PSP -Zertifizierungsprüfung wird von ASIS International, der führenden Organisation für Sicherheitsprofis weltweit, durchgeführt. Um die Prüfung abzulegen zu können, müssen die Kandidaten mindestens fünf Jahre Erfahrung im Bereich der körperlichen Sicherheit haben und bestimmte Bildung und berufliche Anforderungen erfüllen. Sobald die Zertifizierung zertifiziert ist, müssen Fachleute ihre Zertifizierung aufrechterhalten, indem sie Fortbildungsprüfungen verdienen und ihre Zertifizierung alle drei Jahre verlängern.

PSP Deutsch Prüfung - PSP Zertifizierungsfragen

Die meisten Leute wählen Zertpruefung, denn es über große Bequemlichkeit und Anwendbarkeit verfügt. Die IT-Eliten von Zertpruefung verfolgen ständig die Schulungsunterlagen von ASIS PSP Zertifizierung aus ihren professionellen Prospektiven, was die Genauigkeit unserer Schulungsunterlagen zur ASIS PSP Prüfung garantiert. Wenn Sie noch besorgt sind, können Sie einen Teil der Prüfungsfragen und Antworten downloaden, bevor Sie die ASIS PSP Schulungsunterlagen von Zertpruefung kaufen.

Die ASIS PSP Prüfung ist eine anspruchsvolle und umfassende Zertifizierung, die darauf ausgelegt ist, das Wissen, die Fähigkeiten und die Fertigkeiten von Fachleuten im Bereich der physischen Sicherheit zu bewerten. Die Zertifizierung wird von vielen Organisationen auf der ganzen Welt anerkannt und ist ein wertvolles Asset für Fachleute, die ihre Karriere in der Branche vorantreiben möchten. Wenn Sie daran interessiert sind, eine Karriere in der physischen Sicherheit zu verfolgen, kann Ihnen die PSP-Zertifizierung dabei helfen, Ihre Ziele zu erreichen und Ihre Expertise gegenüber Arbeitgebern zu demonstrieren.

ASIS Physical Security Professional Exam PSP Prüfungsfragen mit Lösungen (Q128-Q133):

128. Frage

Considering the information provided for the project, what is the factor that most influences the successful crashing of the schedule?

- A. Avoiding the 2023-2024 winter/wet weather season
- **B. Avoiding a late delivery penalty from the owner**
- C. Maximizing the \$500,000 bonus
- D. Minimizing the indirect expenditure chargeable to the contractor

Antwort: B

129. Frage

In a graphical earned value analysis, what time-scaled value determines the reporting intervals for both schedule and cost performance?

- A. Budgeted cost of work performed
- B. Schedule performance index
- C. Actual cost of work scheduled
- **D. Budgeted cost of work scheduled**

Antwort: D

130. Frage

Which of the following is NOT true?

- A. Remaining durations can exceed original durations.
- **B. A network must contain only one Critical Path.**
- C. Constraints can interfere with the longest path calculation.
- D. Multiple calendars can affect the total float calculation.

Antwort: B

Begründung:

Explanation of Critical Path:

* A network can have multiple critical paths if multiple sequences of activities have zero float.

* While it is common to have one critical path, having more than one is possible in complex projects.

Evaluation of Other Options:

* A: Remaining durations exceeding original durations can occur in updated schedules due to delays.

* B: Constraints (e.g., finish-to-start, time constraints) can alter longest path calculations.

* C: Multiple calendars influence total float when activities use different working days.

Verification with PSP Guidelines:

The PSP Study Guide mentions the possibility of multiple critical paths in large or complex schedules (Ref: PSP Study Guide, Chapter 2A: Critical Path Analysis).

131. Frage

Background

Your name is Evan Marshal. You are the corporate scheduler for Happy Insurance Corporation (HIC), a general health insurance company located in Ridgemon, Illinois. HIC is very busy with 49 unique software development projects. The organization structure at HIC gives the project scheduling responsibility to the Project Manager assigned to each project. You are charged with coordination of the project schedules into a Master Schedule and quality control for scheduling on the individual development projects. You report directly to the Director of Information Services (DIS), Desmond Rayburn.

It has come to your attention Project JP-114 has fallen behind schedule and Rita Belateau, the Project Manager, wants to accelerate the project in order to reclaim lost time. Rita is a strong supporter of Total Quality Management and strives for zero failures; therefore she is assessing the need for overtime for resources assigned to an activity that is not projecting a completion prior to the early finish depicted in the current schedule.

You and Rita review the current schedule to identify which activities are on the critical path and which activities have plenty of float.

The review reveals several activities have suffered less than planned productivity and have contributed to falling behind. In the process of this review, you and Rita also review the budget for Project JP-114 and notice not only the schedule has fallen behind but the cost to date is more than she had expected. To total budget is \$150,000, planned to date is \$30,000; expended to date is \$37,000.

With nine months remaining until baseline contract completion, Rita needs to bring Project JP-114 back on track; knowing overtime

for an extended period of time is not always the right answer, especially with the cost to date already over planned.

In order to truly understand the options available to help remedy the current situation, you and Rita brainstorm on several potential courses of action. All the potential courses of action will require an evaluation of budget impact versus schedule correction.

1. Pull the project team together and ensure everyone understands which activities are on the critical path.

Rita would like to use the existing project team and focus them on these critical path activities, laying out a plan for periodic overtime when needed to crunch through a deliverable. This approach could add approximately 20% to the budget.

2. Outsource various modules of activities to qualified and known consultants. This could drive up the costs and must be evaluated before implemented. Having an outside source working in parallel with the project team could also accelerate the schedule to mitigate some of the delays, as well as keep overtime down to a minimum for the project team. Potentially this could add as much as 40% to the budget, but could also be very productive schedule wise.

3. Mandatory overtime for the project team - entire project goes on a 50-hour work week. If the entire project team works overtime for an extended period of time, the budget could see an additional 60% increase.

4. The project continues as is completes the project late and accepts the penalties imposed. Penalties imposed for late delivery could add as much as 50% to the budget.

Assignment

Draft a proper memorandum to Desmond Rayburn, IS Director, explaining in your own words:

a. the current problem and potential impact(s);

b. each course of action, stating advantages and disadvantages as appropriate; c. your recommendations, properly supported.

Please be sure to include the rationale for your recommendations. Be sure to summarize your thoughts and address (To, From, Date, and Subject/Project Name) and close the memo appropriately. If you are uncomfortable with the courses of action noted, provide your own with appropriate substantiation for your position. Limit your answer to one, full typewritten page (roughly three handwritten pages).

While your email can be as detailed as you like, be sure to write sufficiently to address each element of the assignment, yet not so long that you go beyond the scope of the exercise. Take time to read the problem and consider what you want Evan to say. Good luck!

Antwort:

Begründung:

See the Explanation for complete Solution for this.

Explanation:

To: Desmond Rayburn, Director of Information Services
From: Evan Marshal, Corporate Scheduler
Date:

[Insert Current Date]
Subject: Mitigation Plan for Project JP-114 Delays
Current Problem and Potential Impacts
Project JP-114 has experienced schedule delays and cost overruns.

The project has expended \$37,000 against a planned budget of \$30,000 to date, exceeding the planned budget by 23%.

Additionally, productivity issues have impacted critical path activities, further delaying progress.

With nine months remaining, failing to address these issues could result in penalties, further cost increases, and client dissatisfaction.

* Focus Existing Team on Critical Path with Periodic Overtime

* Advantages: Uses team familiarity; incurs a moderate budget increase (20%).

* Disadvantages: Risks resource strain and potential burnout if overtime is prolonged.

* Outsource Work to Consultants

* Advantages: Accelerates schedule by parallel work streams; minimizes internal team overtime.

* Disadvantages: Higher budget impact (up to 40%); requires effective integration of external deliverables.

* Mandatory Overtime (50-Hour Work Week)

* Advantages: Ensures rapid progress across the project.

* Disadvantages: Extremely high cost (60% increase); risks significant employee fatigue and declining morale.

* Continue as Is and Accept Late Delivery Penalties

* Advantages: No immediate resource strain.

* Disadvantages: Significant penalties (50% budget increase); damages stakeholder confidence and corporate reputation.

Courses of Action

Recommendation I recommend Option 1, combined with selective outsourcing (Option 2), to achieve the best balance of cost control and schedule recovery.

* Focus the internal team on critical path activities with targeted use of periodic overtime. This ensures efficient allocation of resources and minimizes strain while addressing the most urgent delays.

* Outsource select non-critical tasks to experienced consultants. This parallel effort reduces the workload on the internal team, limits overtime, and accelerates overall progress.

Rationale: This hybrid approach keeps the budget increase to approximately 30-35% while effectively addressing schedule delays. It balances cost efficiency, resource management, and stakeholder satisfaction.

Proper coordination will ensure smooth integration between internal and external teams.

Conclusion This plan provides the most feasible path to bringing Project JP-114 back on track. It mitigates risks of extended delays while maintaining budget discipline. I am available for further discussions to outline a detailed implementation plan.

Best Regards, Evan Marshal
Corporate Scheduler

Theoretically construct a summary activity for activities 2001 through 2004. Using the "normal" schedule, what is the cost of the hammock?
