C-THR81-2505認定を取得する意欲のある人には、主にオフィスワーカーが含まれます。彼らはより高い地位に着き、ハンサムな給料、さらには豊かな未来を手に入れることを期待しています。これらの要件はすべて、当社のC-THR81-2505試験材料が満たすことができます。C-THR81-2505学習教材は、試験の合格に役立ちます。C-THR81-2505試験トレントを購入する前に、C-THR81-2505試験ガイドのいくつかの質問と回答を含むC-THR81-2505試験問題のTopexamデモを無料でダウンロードできます。

SAP C-THR81-2505 認定試験の出題範囲：

トピック	出題範囲
トピック 1	Scenario 1: HR Transaction Rules: This section of the exam tests the proficiency of HRIS Analysts in applying HR transaction rules within the system. It focuses on the creation and use of business rules for automating actions, enforcing data accuracy, and streamlining HR processes. Candidates demonstrate the ability to define rule contexts and apply logic relevant to specific HR transactions.
トピック 2	Position Management: This section of the exam evaluates the knowledge of SAP Consultants in configuring and managing Position Management functionality. It focuses on understanding position hierarchy, relationship assignments, and synchronization with job information. Candidates are assessed on how effectively they support organizational planning through accurate position data setup and integration with other SAP modules.
トピック 3	Scenario 2: Approvals for Self-Service: This section of the exam assesses the competency of SAP Consultants in configuring self-service approval workflows. It covers the setup of dynamic approval chains and ensures policy compliance for employee-initiated actions. The focus is on enabling seamless and scalable workflow automation tailored to organizational structures and user roles.
トピック 4	Employee Central Core: This section of the exam measures the skills of HRIS Analysts and covers the essential components of the SAP SuccessFactors Employee Central Core module. It assesses the ability to configure foundational system features, including data models, business rules, event reasons, and workflows. Emphasis is placed on navigating the core employee data lifecycle, managing personal and employment information, and maintaining organizational structure within Employee Central.

SAP Certified Associate - SAP SuccessFactors Employee Central Core 認定 C-THR81-2505 試験問題 (Q30-Q35):

質問 # 30

How does the system connect the country-relevant Legal Entity fields to a country? Note: There are 2 correct answers to this question.

- A. By association, using the 3-letter ISO code of the country in the Destination Filter Criteria
- B. By association, using the countryOfRegistration.code in the Source Filter Criteria
- C. By association, using the 3-letter ISO code of the country in the Condition Values
- D. By association, using the countryOfRegistration.code in the Condition

正解: A、D

解説:

The system connects country-relevant Legal Entity fields to a specific country through associations that utilize the countryOfRegistration.code. This is achieved by setting the countryOfRegistration.code in the Condition and using the 3-letter ISO code of the country in the Destination Filter Criteria. By configuring these associations, the system can dynamically display or hide fields based on the country's ISO code, ensuring that only relevant fields are presented for each Legal Entity.

質問 # 31

Which method of modifying employee data will trigger an event reason derivation?

- A. Using Add New Hire
- B. Inserting a new record in history UI
- C. Deleting a record in history UI
- D. Using Actions menu in People Profile

正解: D

解説:

Event Reason Derivation in SAP SuccessFactors Employee Central is triggered when changes are made to employee data through specific actions. Utilizing the "Actions" menu in the People Profile to update employee information initiates the Event Reason Derivation process. This mechanism automatically determines the appropriate event reason based on the nature of the data change. In contrast, inserting a new record via the history UI, deleting a record in the history UI, or using the "Add New Hire" function does not trigger Event Reason Derivation. These actions either bypass the derivation process or involve scenarios where event reasons are manually selected.

Therefore, the correct answer is:

B: Using Actions menu in People Profile

This approach ensures that event reasons are accurately derived and recorded in line with the configured business rules in SAP SuccessFactors Employee Central.

質問 # 32

How are business rules handled in Employee Central Quick Actions?

- A. The system supports all onSave rules.
- B. The system does NOT support onPostSave rules.
- C. onView rules are supported when the fields are included in the template.
- D. onChange rules are supported when the fields are included in the template.

正解: C、D

質問 # 33

A customer needs to create a custom field that appears only for legal entity France. How do you create the required field?

- A. Create a field in the Legal Entity France object in Configure Object Definition.
- B. Create a field in the legalEntity HRIS element in the Corporate Data Model. Add field criteria to only display the field when the country is France.
- **C. Create a field in the Legal Entity object in Configure Object Definition. Add field criteria to only display the field when country is France.**
- D. Create a field in the legalEntity HRIS element in the Country Specific Field Corporate Data Model.

正解: C

解説:

To create a custom field that appears only for legal entity France:

Use Configure Object Definition to add the field in the Legal Entity object.

Add field criteria to display the field conditionally based on the country being France.

This approach allows you to manage country-specific fields without modifying the Corporate Data Model directly.

質問 # 34

How do you create country/region-specific fields (CSF) for a country that does NOT have pre- delivered Legal Entity CSF fields?

Note: There are 3 correct answers to this question.

- A. Create a composite association on the new generic object to Legal Entity.
- **B. Update the field criteria of the association.**
- **C. Create a new generic object.**
- **D. Create a composite association to the new generic object on Legal Entity.**
- E. Update the condition and condition values of the association.

正解: B、C、D

解説:

To create country/region-specific fields (CSF) for a country that does not have pre-delivered Legal Entity CSF fields, follow these steps:

Create a New Generic Object: Develop a new generic object to define the specific fields required for the country/region. This object will store the additional data fields pertinent to the Legal Entity.

Create a Composite Association to the New Generic Object on Legal Entity: Establish a composite association from the Legal Entity to the newly created generic object. This association links the Legal Entity to the country/region-specific fields, enabling the system to recognize and utilize these fields appropriately.

Update the Field Criteria of the Association: Modify the field criteria within the association to ensure that the new fields are correctly associated with the Legal Entity. This step involves setting conditions that determine when the new fields are applicable, based on factors such as country/region.

These steps align with the standard procedures for extending the data model in SAP SuccessFactors Employee Central to accommodate country/region-specific requirements.
