No matter how busy you are, you must reserve some time to study. As we all know, knowledge is wealth. If you have a strong competitiveness in the society, no one can ignore you. Then here comes the good news that our C-ACDET-2506 practice materials are suitable for you. For the advantage of our C-ACDET-2506 Exam Questions is high-efficient. No only we can give the latest and most accurate knowledge on the subject, but also we can help you pass the exam and get the C-ACDET-2506 certification in the least time.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Reliable Latest C-ACDET-2506 Test Labs offer you accurate Reliable Exam Blueprint | SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite

Our goal is to increase customer's satisfaction and always put customers in the first place. As for us, the customer is God. We provide you with 24-hour online service for our C-ACDET-2506 study tool. If you have any questions, please send us an e-mail. We will promptly provide feedback to you and we sincerely help you to solve the problem. Our specialists check daily to find whether there is an update on the C-ACDET-2506 study tool. If there is an update system, we will automatically send it to you. Therefore, we can guarantee that our C-ACDET-2506 Test Torrent has the latest knowledge and keep up with the pace of change. Many people are worried about electronic viruses of online shopping. But you don't have to worry about our products. Our C-ACDET-2506 exam materials are absolutely safe and virus-free. If you encounter installation problems, we have professional staff to provide you with remote online guidance. We always put your needs in the first place.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q51-Q56):

NEW QUESTION # 51
During which SAP Activate Methodology phase do you migrate the configuration to Production?

- A. Migrate
- B. Push
- C. Deploy
- D. Move

Answer: C

NEW QUESTION # 52
You want to apply a preset filter to a custom field so that it only shows valid values based on the value of another field. What do you use to apply predefined filter criteria for a field?

- A. Load Relation types and Relation entries
- B. Define a Visibility Condition in the Conditions tab
- C. Enable field property "Enable for Template Field Setter" in the Advanced tab
- D. Populate the "Relation Name" and "NameTableConstraintFieldPath" in the Advanced tab
- E. Enable field property "Use relationship chooser" in the Advanced tab

Answer: D

NEW QUESTION # 53
You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? (Select 3 correct answers)

- A. Publish the form template within the test site in order to add the form fields in the package.
- B. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- C. Discard any other packages that appear in My Action Items.
- D. Make sure you update the string resource files in the production site before migrating the corresponding configurations from test to production site.
- E. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.

Answer: B,D,E

Explanation:
When migrating field configurations in SAP Ariba, it's essential to prepare all dependent components to avoid migration errors.
* Enumerations (B): These must be imported into Production before migrating fields that reference them, since the fields depend on the enumerated values to validate configurations.

* String Resource Files (C):These contain translations and label customizations. They should be uploaded and updated in Production first to ensure that migrated fields have the proper localized text.
* Flex Master Data (E):Since fields referencing FMD templates rely on these data structures, the templates and their associated data must exist in Production before migrating the fields that depend on them.Discarding unrelated packages (A) or publishing form templates (D) is unrelated or unnecessary for field migration workflows; fields and forms are handled separately.SAP best practices emphasize preparing all referenced master data and resource files to ensure smooth and error-free field migration.

NEW QUESTION # 54

Which syntax is used for writing custom Validity Conditions?

- A. Scheme
- B. Regular expression
- C. Python
- D. XML

Answer: B

Explanation:
SAP Ariba uses an expression language based on Object-Graph Navigation Language (OGNL) to define custom validity conditions on fields. Within these expressions,regular expressions (regex)are supported to perform complex pattern validations, such as validating email formats or custom string structures. Other programming languages like Python, Scheme, or XML are not supported for this purpose. The use of regular expressions within SAP Ariba's validity conditions provides powerful, flexible validation capabilities, allowing administrators to enforce data quality rules precisely at the field level, consistent with official SAP Ariba documentation on validation expressions.

NEW QUESTION # 55

A customer has requested that a Contracts field be added to an export event. After creating the field, assigning the appropriate check box in the advanced section, and publishing, this field still cannot be found in the export.
What can be done to rectify this? Note: There are 2 correct answers to this question.

- A. The data definition needs to be refreshed.
- B. A custom visibility expression needs to be added stating isVisibleinExport == true.
- C. The field must be accepted and published in the data definition.
- D. Custom fields cannot be added to import/exports.

Answer: A,C

NEW QUESTION # 56

......

As we know, there are nothing best, only something better for we are keeping developing and face competion all the time.
