

# Pdf 2V0-17.25 Braindumps - 2V0-17.25 New Dumps Ebook

Get 2025 Update VCP-VCF 2V0-17.25 Dumps To Study The Latest Questions

1. An administrator is preparing to deploy a new VMware Cloud Foundation (VCF) fleet to an environment that does not have Internet access.

Which two binaries must be uploaded to the VCF Installer appliance before initiating the deployment?

(Choose two.)

- A. Identity Broker
- B. ESX
- C. NSX
- D. VCF Operations
- E. Lifecycle Manager

**Answer:** C, D

**Explanation:**

In VCF 9.x, air-gapped bring-up requires staging the required binaries in the VCF Installer. The documented list explicitly includes NSX and VCF Operations among the components to upload. The product guide states: "VMware Cloud Foundation required binaries include... NSX ... VMware Cloud Foundation Operations ... vCenter ... SDDC Manager..." (exact list excerpt). This list does not call for ESX images or the legacy "Lifecycle Manager."

Therefore, from the given options the two binaries that must be uploaded are NSX and VCF Operations. ESX is pre-imaged on hosts per preparation guidance and is not a required VCF Installer binary; "Lifecycle Manager" is not used in VCF 9.0 bring-up.

2. After a migration to VCF 9.0, an administrator must import only logging data newer than 90 days from Aria Operations for Logs 8.x into VCF Operations for Logs. If VCF Operations for Logs has enough space available, what is the correct way to achieve this?

- A. Configure log forwarding in Aria Operations for Logs.
- B. Import logs from an NFS archive used for Aria Operations for Logs.
- C. Initiate the transfer from the Control Panel in VCF Operations.
- D. Initiate the transfer from Aria Operations for Logs.

**Answer:** C

**Explanation:**

VCF 9.0 introduces Log Data Transfer initiated from VCF Operations. The docs say: "You can transfer log data for up to 90 days from Aria Operations for Logs 8.x... The migrated logs are stored in VCF Operations for logs." and "To transfer logs... navigate to the Logs Data Transfer card in Administration > Control Panel... click the INITIATE TRANSFER button... You can select the duration of logs to transfer..." (emphasis added).

They further clarify that simple forwarding does not transfer already ingested logs: "Forward logs... does not transfer already ingested logs. Transfer historical logs up to 90 days... using the Log Data Transfer feature in VCF Operations."

Hence, the correct action is to initiate the transfer in VCF Operations (Administration > Control Panel > Logs Data Transfer).

3. Which tool does an administrator use to collect and validate the initial inputs for the deployment of a VMware Cloud Foundation (VCF) fleet?

- A. SDDC Manager
- B. Cloud Builder

<https://drive.google.com/open?id=1BYInj7bM9z8E9qRyEWLd3u21h2mPJS1O>

First and foremost, even though our company has become the staunch force in this field for almost ten years and our 2V0-17.25 exam questions have enjoyed such a quick sale in the international market we still keep an affordable price for our customers. Second, we have prepared free demo in this website for our customers to have the first-hand experience of the 2V0-17.25 Latest Torrent compiled by our company before making their final decision. So do not hesitate any more, just hurry up to buy our 2V0-17.25 test question which will never let you down.

## VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Deploy, Configure, and Operate VMware Cloud Foundation (VCF):</b> This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>VMware Cloud Foundation Fundamentals:</b> This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>IT Architectures, Technologies, Standards:</b> This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Plan and Design the VMware by Broadcom Solution:</b> This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.</li> </ul>

## VMware Cloud Foundation 9.0 Administrator Training Material - 2V0-17.25 Updated Torrent & VMware Cloud Foundation 9.0 Administrator Reliable Practice

The wording is fully approved in our 2V0-17.25 Exam Guide. They handpicked what the 2V0-17.25 exam torrent usually tests in exam recent years and devoted their knowledge accumulated into these 2V0-17.25 study tools. Besides, they keep the quality and content according to the trend of the 2V0-17.25 practice exam. As approved 2V0-17.25 exam guide from professional experts their quality is unquestionable. Our agreeable staffs are obliging to offer help 24/7 without self-seeking intention and present our after-sales services in a most favorable light. We have patient colleagues offering help and solve your problems and questions of our materials all the way.

## VMware Cloud Foundation 9.0 Administrator Sample Questions (Q101-Q106):

### NEW QUESTION # 101

An administrator is tasked to deploy a new vSAN Storage Cluster to an existing VCF instance.

The VCF instance is deployed as a single workload domain. What must the administrator do to achieve this without deploying additional management components?

- A. Deploy a second cluster as a vSAN storage cluster in the existing workload domain.
- B. Deploy an additional workload domain with a vSAN storage cluster within the existing VCF instance.
- C. Deploy additional hosts as vSAN storage-only nodes within the existing cluster.
- D. Deploy an additional VCF instance and workload domain with a vSAN storage cluster.

**Answer: A**

Explanation:

The VCF 9.0 Architecture and Deployment Guide explains that within a single Workload Domain, administrators can scale resources by adding additional clusters, including compute or vSAN storage clusters. Specifically, "A Workload Domain can contain multiple clusters. You can deploy a new cluster, such as a vSAN cluster, into an existing domain without introducing new management components."

#### NEW QUESTION # 102

An administrator is tasked with resetting the identity management of a VMware Cloud Foundation (VCF) instance after initial configuration.

Which two steps should the administrator perform? (Choose two.)

- A. Delete all of the Single Sign-On configurations, excluding the provisioned user and groups.
- **B. Reconfigure the VCF Single Sign-On.**
- C. Disable Single Sign-On.
- D. Revert the VCF Single Sign-On configuration.
- **E. Delete all of the Single Sign-On configurations, including the identity broker configuration.**

**Answer: B,E**

Explanation:

Resetting identity management requires removing all existing Single Sign-On configurations, including the identity broker configuration, to fully clear the previous setup. After the reset, Single Sign-On must be reconfigured to establish a new identity management configuration for the VCF instance.

#### NEW QUESTION # 103

What is the recommended method for managing IP address allocation for VMware ESXi hosts in a VMware Cloud Foundation environment?

- **A. Static IP address assigned using VMware NSX IP Pools**
- B. Dynamic IP addresses assigned via DHCP with reservations
- C. Dynamic IP addresses assigned via DHCP and without any reservations
- D. Static IP addresses assigned manually

**Answer: A**

Explanation:

In a VMware Cloud Foundation environment, it is recommended to use static IP addresses that are managed via VMware NSX IP Pools. This method ensures consistency, scalability, and centralized management of IP addresses, which is essential for large environments. NSX IP Pools allow for efficient IP address allocation and management.

#### NEW QUESTION # 104

An administrator is deciding on a storage solution to create the first management workload domain for a new VMware Cloud Foundation (VCF) instance. Which three storage solutions can be used as principal storage? (Choose three.)

- **A. NFSv3**
- B. NVMe/TCP
- **C. VMFS on Fibre Channel (FC)**
- D. Virtual Volumes (vVols)
- **E. vSAN OSA**

**Answer: A,C,E**

Explanation:

The VCF 9.0 Architecture Guide outlines valid principal storage options for the management domain. It states: "The management domain must be deployed using vSAN, NFS, or Fibre Channel (FC). Supported protocols include NFSv3 and VMFS on FC." vSAN (including OSA) is the default recommended option, but NFSv3 and VMFS on FC are also supported for environments

where external storage arrays are required.

NVMe/TCP and vVols are not supported for the initial management domain's principal storage. vVols may be used in workload domains after deployment, but they are not a supported foundation for the management domain. Therefore, the three correct storage solutions for the first management workload domain are: VMFS on FC, NFSv3, and vSAN OSA.

### NEW QUESTION # 105

An administrator is enabling VMware's Virtual Machine Encryption for an existing VMware Cloud Foundation (VCF) Workload Domain in order to meet their organization's compliance regulations.

Which three steps should the administrator take to complete this task? (Choose three.)

- A. Apply the encryption policy to the existing VMs.
- B. Configure a Key Management Server (KMS) and add it to the vCenter.
- C. Apply the encryption policy to the ESXi hosts.
- D. Enable the encryption feature on the ESXi hosts.
- E. Enable SSH on the ESXi hosts to manage encryption keys.
- F. Create an encryption policy in vCenter.

**Answer: A,B,F**

Explanation:

You must configure and register a Key Management Server in vCenter to handle encryption keys. An encryption policy is created in vCenter to define the encryption settings that VMs will use. You then apply the encryption policy to the existing VMs to encrypt their disks.

<https://techdocs.broadcom.com/us/en/vmware-cis/vsphere/vsphere/8-0/vsphere-security-8-0/use-encryption-in-your-vsphere-environment/encrypt-an-existing-virtual-machine-or-virtual-disk.html>

### NEW QUESTION # 106

.....

Before the clients decide to buy our 2V0-17.25 test guide they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company's website. Firstly you could know the price and the version of our 2V0-17.25 study question, the quantity of the questions and the answers. Secondly you could look at the free demos of our 2V0-17.25 learning prep to see if the questions and the answers are valuable. And our pass rate of 2V0-17.25 exam questions is more than 98%.
