## New JN0-232 Test Pattern & JN0-232 Exam Objectives

The PDF version of our JN0-232 guide quiz is prepared for you to print it and read it everywhere. It is convenient for you to see the answers to the questions and remember them. After you buy the PDF version of our JN0-232 study material, you will get an E-mail from us in 5 to 10 minutes after payment. Once any new question is found, we will send you a link to download a new version of the JN0-232 training engine. So don't worry if you are left behind the trend.

## Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q12-Q17):

### NEW QUESTION # 12

You want to enable NextGen Web Filtering in SRX Series devices.  
In this scenario, which two actions will accomplish this task? (Choose two.)

- A. Configure an SSL proxy profile.
- B. Configure an SSL initiation profile.
- C. Generate a CA-signed certificate.
- D. Generate a self-signed certificate.

**Answer: A,D**

Explanation:

NextGen Web Filtering (NGWF) requires SSL proxy functionality to inspect HTTPS traffic. To enable NGWF:

- \* Option B: You can generate a self-signed certificate for SSL proxy functionality (or import a CA-signed certificate, but the course emphasizes self-signed for lab/demo purposes).
- \* Option D: You must configure an SSL proxy profile so that HTTPS traffic can be decrypted and inspected.
- \* Option A: A CA-signed certificate may be used in production but is not strictly required to enable NGWF.
- \* Option C: SSL initiation profiles are used for outbound SSL inspection initiated by the SRX, not for NGWF traffic interception.

Correct Actions: Generate a self-signed certificate, Configure an SSL proxy profile  
Reference: Juniper Networks - NextGen Web Filtering Configuration with SSL Proxy, Junos OS Security Fundamentals.

### NEW QUESTION # 13

You want to confirm that your SRX Series Firewall is connected to the SBL server.  
Which operational mode command would you use in this scenario?

- A. show security web filtering status
- B. show security utm anti-spam status
- C. show security utm content-filtering statistics
- D. show security utm anti-virus status

**Answer: A**

Explanation:

The SBL (SurfControl Web Filtering) server integration is part of UTM web filtering on SRX. To confirm that the firewall is properly connected and communicating with the SBL server, the command used is:

show security web filtering status

This command displays connectivity information with the SBL server, license status, and filtering operations.

Other options:

- \* Anti-virus (Option A) checks antivirus engine status.
- \* Content-filtering statistics (Option C) shows local content filtering counters.
- \* Anti-spam status (Option D) checks spam engine connectivity.

Correct Command: show security web filtering status

Reference: Juniper Networks - UTM Web Filtering Operational Commands, Junos OS Security Fundamentals.

### NEW QUESTION # 14

What is transit traffic in the Junos OS?

- A. It is traffic that is processed by the control plane.
- B. It is traffic that requires special handling by the Routing Engine.
- C. It is traffic that is rate-limited to prevent denial-of-service attacks.
- D. It is traffic that is processed solely through the forwarding plane.

**Answer: D**

Explanation:

In Junos OS, traffic is classified into three main categories:

\* Transit traffic:

- \* Defined as traffic that enters one interface and exits another interface.
- \* It is handled entirely in the forwarding plane (Packet Forwarding Engine).
- \* Example: User data packets moving between trust and untrust zones.

\* Correct #Option A.

\* Exception traffic:

- \* Traffic requiring processing by the Routing Engine (control plane), such as routing updates or management traffic.
- \* Matches Option C/D, but that is not transit traffic.

\* Control traffic:

- \* Management or routing-related, handled by the control plane.

\* Rate-limiting (Option B):

- \* This applies specifically to exception traffic to protect the Routing Engine, not to transit traffic.

Correct Statement: Transit traffic is traffic that is processed solely through the forwarding plane.

Reference: Juniper Networks - Traffic Types (Transit, Exception, Control), Junos OS Security Fundamentals.

### NEW QUESTION # 15

Which UI enables you to manage, monitor, and maintain multiple firewalls using a single interface?

- A. Security Director

- B. Secure Connect
- C. Juniper Identity Management Service
- D. Juniper Secure Analytics

**Answer: A**

Explanation:

- \* Security Director (Option B):A Junos Space application that provides a centralized interface for managing, monitoring, and maintaining multiple SRX firewalls.
- \* Juniper Secure Analytics (Option A):Focuses on SIEM/log analysis, not centralized firewall management.
- \* Identity Management Service (Option C):Provides user identity integration for policy enforcement, not a management UI.
- \* Secure Connect (Option D):A VPN client solution, not a firewall management platform.

Correct UI:Security Director

Reference:Juniper Networks -Junos Space Security Director Overview, Junos OS Security Fundamentals.

#### **NEW QUESTION # 16**

When traffic enters an interface, which two results does a route lookup determine? (Choose two.)

- A. DNS name
- B. ingress interface
- **C. egress security zone**
- **D. egress interface**

**Answer: C,D**

Explanation:

When a packet enters an SRX interface, a route lookup is performed:

- \* It determines the egress interface (Option B) by checking the destination IP against the routing table.
- \* Once the egress interface is known, its associated egress security zone (Option D) is also determined.
- \* The ingress interface (Option A) is already known when the packet arrives, so the route lookup does not determine it.
- \* DNS name (Option C): DNS is unrelated to routing lookups.

Correct Results:egress interface, egress security zone

Reference:Juniper Networks -Packet Flow and Route Lookup, Junos OS Security Fundamentals.

#### **NEW QUESTION # 17**

.....

Thus, it leads to making your practice quite convenient. Juniper JN0-232 desktop software functions on Windows-based computers and works without a functional internet connection. Juniper JN0-232 Exam Questions always provide ease to their consumers. therefore, the committed team is present around the clock to fix any problem.
