

# Hot 300-610 Latest Dump Free PDF | Efficient Latest 300-610 Exam Vce: Designing Cisco Data Center Infrastructure

BTW, DOWNLOAD part of ITExamDownload 300-610 dumps from Cloud Storage: <https://drive.google.com/open?id=1JeR-eQ21LZYo3WpoQdQcKdH4LrEO5N91>

Once you use our 300-610 exam materials, you don't have to worry about consuming too much time, because high efficiency is our great advantage. You only need to spend 20 to 30 hours on practicing and consolidating of our 300-610 learning material, you will have a good result. After years of development practice, our 300-610 test torrent is absolutely the best. You will embrace a better future if you choose our 300-610 exam materials.

## What is Cisco 300-610 Exam certification?

Cisco 300-610 Exam certification is an IT certification that is advanced in the field of computer networking. It is a professional exam that is designed to test the skills and expertise of IT professionals. The Cisco 300-610 Exam certification exam is designed to test the competency of the IT professionals to plan, design, maintain and monitor the Cisco Data Center Infrastructure. This exam validates that you have all the skills and knowledge required to install, configure, troubleshoot and monitor a Cisco Data Center Infrastructure which includes Cisco Nexus Switches and Cisco Unified Computing System (UCS). Credit voucher greatly varies suggests. As compared to other similar IT certifications like Checkpoint Certified Security Expert R77.10, this Cisco 300-610 Exam Certification exam is considered more difficult as it covers a wide range of topics related to networking infrastructure. **300-610 Dumps** is an online, self-paced training package that helps you prepare for the exam.

## 300-610 exam cram pdf, high Cisco 300-610 pass mark

The more you can clear your doubts, the more easily you can pass the Designing Cisco Data Center Infrastructure (300-610) exam. ITExamDownload 300-610 practice test works amazingly to help you understand the 300-610 exam pattern and how you can attempt the real Cisco Exam Questions. It is just like the final 300-610 exam pattern and you can change its settings. When you take ITExamDownload Cisco 300-610 Practice Exams, you can know whether you are ready for the finals or not. It shows you the real picture of your hard work and how easy it will be to clear the 300-610 exam if you are ready for it.

Cisco 300-610 certification exam is designed to test professionals' knowledge and expertise in designing Cisco data center infrastructure. Designing Cisco Data Center Infrastructure certification exam is ideal for IT professionals who are interested in expanding their knowledge of data center infrastructure design. 300-610 Exam covers a wide range of topics, including data center design, network design, storage design, compute design, and automation.

## Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q311-Q316):

### NEW QUESTION # 311

Which two paths are provided by deploying an OOB management network in a data center that uses Cisco Nexus switches?  
(Choose two.)

- A. Layer 2 for a vPC peer link
- B. Layer 3 for server traffic
- C. Layer 3 for vPC keepalive packets
- D. Layer 3 for monitoring purposes
- E. Layer 2 for server traffic

**Answer: C,D**

### NEW QUESTION # 312

Which statement describes differences between training and inference in AI learning models?

- A. The inference process requires high throughput to enable rapid training on large datasets.
- B. The training process is more optimized for low latency, which enables faster analysis of large datasets.
- C. The inference process requires continuous model adjustments to maintain accuracy with new data.
- D. The training process is more computationally demanding because it processes new data.

**Answer: D**

Explanation:

Training ingests and processes massive datasets through many iterations (forward and backward passes), requiring far more compute resources than inference. Inference, by contrast, uses the finalized model to make predictions and is optimized for low-latency execution.

### NEW QUESTION # 313

An engineer needs to design a network solution for a client-server farm that uses a pair of Cisco Nexus 9000 Series Switches that are configured with vPCs. Each server must connect to both switches by using two network interfaces, and the switches must always initiate the negotiation with the server. Which mode should be enabled to ensure that traffic is forwarded from the server to a data center network?

- A. auto PAgP
- B. active LACP
- C. desirable PAgP
- D. auto LACP

**Answer: B**

Explanation:

LACP (Link Aggregation Control Protocol) is an open standard protocol widely used and supported by Nexus switches and servers.

Active LACP mode means the switch actively sends LACP packets to initiate the negotiation and form the LAG.

Since the switches must always initiate the negotiation, the switch ports must be in active mode.

Servers typically use passive LACP mode, responding to negotiation initiated by the switch.

### NEW QUESTION # 314

A company wants to use the Cisco hyperconverged system in two data centers. The company plans to implement five HX servers in each data center, and there is no connectivity between the data centers or between the data centers and the internet.

Which solution must the company implement in each data center?

- A. ROBO HX cluster
- B. stretched HX cluster

- C. standard HX cluster
- D. edge HX cluster

**Answer: C**

### NEW QUESTION # 315

A Cisco engineer is discussing a data center design scenario that consists of 24 Cisco UCS B200M6 Blade servers, 2 Cisco UCS 6454 Fabric Interconnects, and 3 Cisco UCS 5108 server chassis. In the proposed configuration, the server links, which are vNICs on the blades, are associated with a single uplink port. Server-to-server Layer 2 traffic is locally switched, server-to-network traffic goes out on its pinned uplink port, and each server MAC address must be learned before traffic can be forwarded to it. Which feature stipulates that traffic is forwarded to a server only if it is received on a pinned uplink port for this server?

- A. MAC address table visualization
- B. RPF check
- C. host F Port channeling
- D. native VLAN tagging on both sides

**Answer: A**

### NEW QUESTION # 316
